FEDERAL SPECIFICATION

FLATIRONS, ELECTRIC, (DRY) (EXCLUDES TRAVEL IRON)

This amendment, which forms a part of Federal Specification W-F-441C, dated October 29, 1971, was approved by the Commissioner, Federal Supply Service, General Services Administration for use of all Federal agencies.

PAGE 4

Paragraph 3.11.3. Delete and substitute:

3.11.3 Electrical connections. Electrical connections within the body of the flatiron shall be as specified in 3.11.3.1 or 3.11.3.2 as applicable.

3.11.3.1 When the flatiron is equipped with a detachable cord, the electrical connections shall be continuous from fixed terminal to fixed terminal. Connections to terminals shall be secured by welding or brazing except that connections to threaded type terminals shall be mechanically secured with a nut or screw.

3.11.3.2 When the flatiron is equipped with a non-detachable cord, the electrical connections to fixed terminals shall be secured by welding or brazing except that connections to threaded type terminals shall be mechanically secured with a nut or screw. Splice type connections shall be made in such a manner that they conform to the requirements of 3.2.
