(INCH-POUND)

MIL-C-39012/25E
23 July 1991
SUPERSEDING
MIL-C-39012/25D
6 October 1983

MILITARY SPECIFICATION SHEET

CONNECTORS, COAXIAL, RADIOFREQUENCY
(HARDWARE FOR RADIOFREQUENCY COAXIAL CONNECTORS)

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and the issue of the following specification listed in that issue of the Department of Defense Index of Specifications and Standards (DODISS) specified in the solicitation: MIL-C-39012.

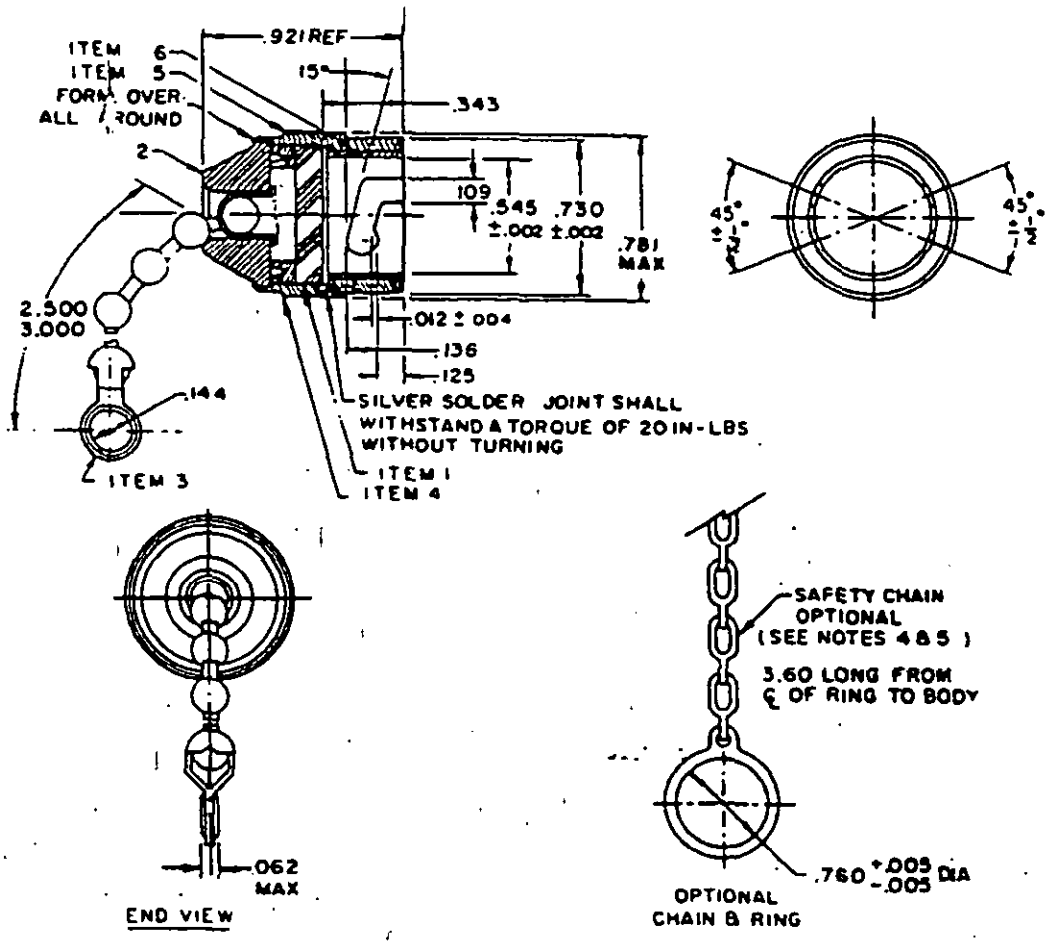

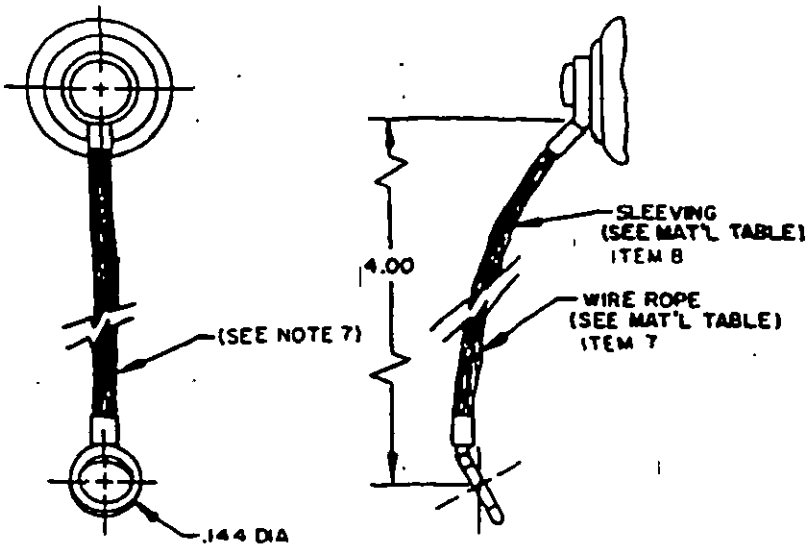

FIGURE 1. M39012/25-0001 cover for series C female connectors with bead chain.
M39012/25-0002 cover for series C female connectors with safety chain.
M39012/25-0101 cover for series C female connectors with wire rope.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Item	Material	Description
1	Silicon rubber	Gasket
2	Brass	Disc
3	Steel	Chain assembly
4	Silicon rubber	V-groove gasket
5	Brass	Coupling sleeve
6	Brass	Bayonet sleeve
7	SST	Wire rope
8	Teflon or nylon or equivalent	Covering

Inches	mm	Inches	mm
.002	0.05	.545	13.84
.004	0.10	.730	18.54
.005	0.13	.760	19.30
.012	0.30	.781	19.84
.062	1.57	.921	23.39
.109	2.77	2.5000	63.50
.125	3.18	3.000	76.20
.136	3.45	3.600	91.44
.144	3.66	4.000	101.60

NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerance is ±.005 (0.13 mm).
4. Safety chain: (Optional) corrosion resistant steel, passivated type II, class 6, trade number OO, in accordance with RR-C-271.
5. The chain shall withstand a tensile force as specified. The force shall be applied at a rate of approximately 100 pounds per minute. The applied force shall be 30 pounds for bead chain and 75 pounds for safety chain. The force shall be attached to the hole in the standard coupling.
6. Bayonets of connector shall lock in bottom slot and shall maintain the connector interface free of dust and moisture.
7. The wire rope shall be specified in MIL-W-83420, type 2, composition B.

.124	3.15	2.700	68.58
.144	3.66	4.000	101.60
.25	6.4		

NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerance is ±.005 (0.13 mm).
4. Standard coupling number 6AD (brass), bead chain number 6 (monel metal or stainless steel), and offset coupling number 6AD (brass), as supplied by the Bead Chain Manufacturing Company, Bridgeport, Connecticut, or equal.
5. The bead chain assembly to be finished with nickel plate, in lieu of silver, conforming to class 1, type V of QQ-N-290. (Exception: Parts which are fabricated of monel metal or stainless steel are not required to be plated, provided such parts will pass the corrosion test of MIL-C-39012.) The wire rope shall be specified in MIL-W-83420, type 2, composition B.
6. The offset coupling must rotate freely after riveting.
7. Safety chain: (Optional) corrosion resistant steel, passivated type II, class 6, trade number 00, in accordance with RR-C-271.
8. The chain shall withstand a tensile force as specified. The force shall be applied at a rate of approximately 100 pounds per minute. The applied force shall be 30 pounds for bead chain and 75 pounds for safety chain. The force shall be attached to the hole in the standard coupling.
9. Bayonets of connector shall lock in bottom slot and shall maintain the connector interface free of dust and moisture.
10. For alternate construction only.

7. Safety chain: (Optional) corrosion resistant steel, passivated type II, class 6, trade number 00, in accordance with RR-C-271.
8. The chain shall withstand a tensile force as specified. The force shall be applied at a rate of approximately 100 pounds per minute. The applied force shall be 30 pounds for bead chain and 75 pounds for safety chain. The force shall be attached to the hole in the standard coupling.

2	Brass	Coupling nut
3	Silicone rubber	Gasket
4	Brass	Rivet
5	SST	Wire rope
6	Teflon or nylon or equivalent	Covering

Inches	mm	Inches	mm
.144	3.66	.718	18.24
.25	6.4	2.25	57.2
.4375	11.112	2.70	68.6
.515	13.08	4.00	101.6
.650	16.51		

NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerances are ±.02 (0.5 mm) for two place decimals and ±.005 (0.13 mm) for three place decimals.
4. Standard coupling number 6AD (brass), bead chain number 6 (monel metal or stainless steel), and offset coupling number 6AD (brass), as supplied by the Bead Chain Manufacturing Company, Bridgeport, Connecticut, or equal.
5. The bead chain assembly to be finished with nickel plate, in lieu of silver, conforming to class 1, type V of QQ-N-290. (Exception: Parts will pass the corrosion test of MIL-C-39012.) The wire rope shall be specified in MIL-W-83420, type 2, composition B.
6. The offset coupling must rotate freely after riveting.
7. Safety chain: (Optional) corrosion resistant steel, passivated type II, class 6, trade number 00, in accordance with RR-C-271.
8. The chain shall withstand a tensile force as specified. The force shall be applied at a rate of approximately 100 pounds per minute. The applied force shall be 30 pounds for bead chain and 75 pounds for safety chain. The force shall be attached to the hole in the standard coupling.
9. Caps shall maintain connector interface free of dust and moisture.
10. All undimensioned configurations are for reference only.

REQUIREMENTS:

Material: See table I.

TABLE I. Materials.

Component material	Applicable specification
Brass	QQ-B-613 or QQ-B-626
Copper beryllium	QQ-C-530 or QQ-C-533
Phosphor bronze	QQ-B-750
Soft copper	QQ-C-576
Aluminum	QQ-A-225/6
Steel-corrosion resisting	QQ-S-763
Flux	O-F-499
TFE fluorocarbon	L-P-403
Silicon rubber	ZZ-R-765 or MIL-R-5847
Brazing alloy silver	QQ-B-654
Soft solder	QQ-S-571

Design and construction: See figures 1 through 16.

Part or Identifying Number (PIN): M39012/25-(dash number from table II).

Corrosion (salt spray): Method 101, test condition B, MIL-STD-202.
The salt solution concentration shall be 5 percent.
Special detail: After exposure, hardware shall be washed, shaken and lightly brushed as specified in method 101 of MIL-STD-202, and then permitted to dry for 24 hours at 40°C. Hardware shall then be examined for evidence of corrosion and pitting and ease of coupling.

Qualification by similarity: Connector manufacturers may qualify all applicable PIN's for dust caps by similarity if they submit any representative sample of a bead chain, safty chain, and wire rope to applicable qualification testing. A manufacturer must be qualified to that connector series and material in order to be approved by similarity.

Cross reference data: See tables II and III.

1/ This hardware previously covered by MIL-C-71, MIL-C-3989, MIL-C-3608, REA49131, REB49047, REA49049, and REB49068.

2/ The dash number (-0001) in the PIN is sequentially assigned and is used to designate the material of the connector. The four-digit dash numbers as shown (-0001, -0002) designates the material as brass. Phosphor bronze is designated by insertion of 1 as the first digit of the four-digit number (-1001, -1002 etc.). A 2 is inserted to designate aluminum (-2001, -2002 etc.), and a 3 shall be inserted to designate corrosion resistant steel (-3001, -3002 etc.).
