(Copies of specifications; standards, drawings, and publications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the Contracting Officer).

3. REQUIREMENTS

3.1 Material. - Materials shall be in accordance with the applicable drawings and specifications.

3.2 Assembly. - The Charge, Mine ejection assembly training shall comply with all requirements specified on drawing 9287629 as applicable, all associated drawings and with all requirements specified in applicable specifications.

3.3 Workmanship. - All parts and assemblies shall be fabricated and finished in a thorough workmanlike manner. They shall be free of burrs, chips, sharp edges, cracks, unblended radii, surface defects, dirt, grease, rust, corrosion products, and other foreign matter. The cleaning method used shall not be injurious to any parts, nor shall the parts be contaminated by the cleaning agents. All marking and stamping shall be neat and sharply defined.

3.4 Submission of results of contractor-conducted examinations and tests. - The contractor shall forward copies of the result of any of his examinations or tests to the designated address as specified in 6.4.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection and standard quality assurance provisions. - Unless otherwise specified herein or in the contract, the provisions of MIL-A-48078 shall apply and are hereby made a part of this detail specification.

4.2 Classification of' inspections. - The following type of inspection shall be conducted on his item.:

a. Quality Conformance lnspection

4.3 First article inspection. - None required

4.4 Quality conformance inspection

4. 4.3 Testing

4. 4.3.1 Resistance (See dwg. no's, 9287553, 9287554 or 9287555 as applicable). - Major B Defect. Each charge shall be tested for the specified requirement in accordance with 4.5.1. Any charge failing to meet the requirement shall be classed defective and removed from the lot. (Non-destructive test).

4.4.4 Inspection equipment. - The inspection equipment required to perform the inspections and tests Prescribed in this specification is identified in the 'Paragraph/Reference Inspection Method' column in the tables starting with paragraph 4.4.2.1, and the test. method paragraphs (see 4.5). The contractor shall submit for approval, inspection equipment designs in accordance with the terms of the contract. See Section 6 of MIL-A-48078, and section 6.3 herein.

4.5 Test method and procedures

4.5.1 Resistance test. - The resistance between the primer contact pin and the plug charge shall be tested using approved test equipment. Any sample failing to have a resistance measurement within the required resistance range shall be .ssed defective.

5* PREPARATION FOR DELIVERY

5.1 Packaging. - Packaging shall be as specified on dwg. 9295002.

5.2 Packing and marking. - Packing and marking shall be as specified on dwg. 9295002.

6. NOTES

6.1 Intended use. - The charge covered by this specification is intended for use In the training mine canister for purposes of training personnel in the use of the M56 sub-system.

6.2 Ordering data. - See MIL-A-48078.

6.3 Submission of' inspection equipment designs for approval See MIL-A-48078. Submit equipment designs as required to Commander: Picatinny Arsenal; ATTN: SARPA-QA-T-T, Dover, New Jersey 07801.
