DATA ITEM DESCRIPTION

Form Approved
OMB No. 0704-0188

1 TITLE	2 IDENTIFICATION NUMBER
SCANNING ELECTRON MICROSCOPE ANALYSIS REPORT	DI-QCIC-80864

3 DESCRIPTION/PURPOSE

3.1 The purpose of the Scanning Electron Microscope (SEM) Analysis Report is to document the quality and acceptability of metallization on semiconductor dice. It addresses the specific metallization defects that are batch process orientated and that can best be identified utilizing this method.

4. APPROVAL DATE (YYMMDD)	5. OFFICE OF PRIMARY RESPONSIBILITY (OPR)	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
890622	G/Y253		

7. APPLICATION/INTERRELATIONSHIP

7.1 This Data Item Description (DID) contains the format and content preparation instructions for the data product resulting from the work task described in MIL-STD-883, Method 2018.

8. APPROVAL LIMITATION	9a. APPLICABLE FORMS	9b. AMSC NUMBER
		G4767

10. PREPARATION INSTRUCTIONS

10.1 Reference documents. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, revisions, shall be as specified in the contract.

10.2 Format. The report may be in the contractor's format.

10.3 Content. Refer to MIL-STD-883, Method 2018, for additional content clarification. The report shall include the following:

10.3.1 Title page. The title page shall contain:

a. Title of the report
b. Contract name and number
c. Contractor' name
d. Date of document preparation
e. Names of individuals who prepared the report
f. Security classification

(Continued on Page 2)

11. DISTRIBUTION STATEMENT

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

LOCK 10. PREPARATION INSTRUCTIONS (continued)

0.3.2 Photographs. There shall be a minimum of three photographs per lot. Two photographs hall show the worst case oxide steps and one photograph shall the worst case general etallization. If any photograph shows another apparent defect within the field of view, nother photograph shall be included to certify the extent of the apparent defect.

.0.3.3 Photograph information. The following information shall be traceable to each hotograph:

a. Manufacturer's lot identification number
b. SEM operator/inspector's identification
c. Date of SEM report.
d. Manufacturer
e. Device/circuit identification (type or part number)
f. Area of photographic documentation
g. Magnification
h. Electron beam accelerating voltage
i. Viewing angle
