MS36567-1	2-3/8	1-1/4	3/8

MATERIAL: The splash eliminator shall be fabricated of rubber or synthetic rubber, free from defects and of the highest quality material.

DESIGN: The splash eliminator shall be of a cylindrical shape with a brass screen in the outlet end and an inlet hole for the pump.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements as specified herein.

APPROVED 20 SEP 1968 REVISED

This military standard is approved by the Department of Defense and is mandatory on all activities. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
