MILITARY SPECIFICATION

NOSECUP ASSEMBLIES, CHEMICAL-BIOLOGICAL MASK, C10

This amendment forms a part of MIL-N-51287C(EA), dated 8 August 1983, and is approved for use within the Chemical Research, Development and Engineering Center, Department of the Army and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 1

2.1, Add:

"Federal Register, Environmental Protection Agency (EPA).

(Application for copies of this Code of Federal Register should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.)"

PAGE 3

2.2: Make the following changes:

ASTM D 412: Delete current title and substitute "Rubber Properties in Tension."
ASTM D 572: Delete current title and substitute "Rubber-Deterioration by Heat and Oxygen."
ASTM D 573: Delete current title and substitute "Rubber-Deterioration In An Air Oven."
ASTM D 624: Delete current title and substitute "Rubber Property-Tear Resistance."
ASTM D 2240: Delete current title and substitute "Rubber Property-Durometer Hardness."

PAGE 4

3.5, Delete "methods, or" and substitute "methods, curing process controls, or".

FSC 4240

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

PAGE 6

4.1.2.2 a (4)(d), Delete "proposed cure times and temperatures" and substitute "Proposed cure times and temperatures with tolerances".

PAGE 7

4.1.2.2 b, Delete in its entirety and substitute the following:

"b. Toxicity clearance testing. If the above information is not sufficient to establish non-toxicity of the rubber formulation, the contractor shall perform the following tests:

a. Rabbit eye irritation using artificial sweat extract of cured test material, EPA, Federal Register, Vol. 44, No. 145, procedure 772.112-24.

b. Primary skin irritation in rabbits using patches of test material, EPA, Federal Register, Vol. 44, No. 145, procedure 112-25.

c. Dermal sensitization in guinea pigs, EPA, Federal Register, Vol. 44, No. 145, procedure 772.122-26.

d. Prophetic patch testing on at least 100 human subjects in accordance with the test method described in "Occupational Diseases of the Skin" by Schwartz, Tulipan, and Birmingham.

Negative results in all of the above tests would indicate that, acutely, the material is dermatologically safe. All tests shall be performed under the supervision of competent medical authorities in the field of dermatology. A copy of the test results and the evaluation thereof by the medical authorities described above shall be furnished to the contracting officer. The Surgeon General will determine if the material or formulation is acceptable from a toxicity standpoint. Production will not be initiated until approval is provided by the contracting officer."
