4.4.4 Delete: ". . . MIL-E-5272, Procedure X11" and substitute ". . MIL-STD-810, Method 514.3, Test Procedure I. Test Condition I - 3.2.5".

4.4.7.1.1 Delete and substitute:

"4.4.7.1.1 Temperature conditioning. Cartridges shall be loaded into acceptance M20 Initiators with end caps to cover the gas ports during the conditioning period. The temperature of the propellant within the cartridges shall be considered as the conditioning temperature and will be determined by means of the thermocouple attached to the center of the propellant charge of a specimen cartridge assembled in a standard initiator test device. The conditioning time shall be one hour longer than the time necessary to bring the element contained in the specimen cartridge to the required temperature."

5.1 Delete and substitute:

"5.1 Packing and marking. Packing and marking shall be in accordance with Drawings C8864168, C8864169 and C9214156. Drawing C8864169 shall be for domestic shipment only."

Changes from previous issue. The margins of this specification are marked with an asterisk to indicate where changes (additions, modifications, corrections, deletions) from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccurancies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this documents based on the entire content irrespective of the marginal notations and relationship to the last previous issue.
