MIL-W-60305A
AMENDMENT 2(EA)
4 March 1976

SUPERSEDING
AMENDMENT 1(MU)
7 July 1971

INTERIM AMENDMENT

MILITARY SPECIFICATION

WARHEAD, 2.75 INCH ROCKET, SMOKE, WP, M156

(WITH BURSTER AND FUZE)

This amendment forms a part of Military Specification MIL-W-60305A, dated 7 July 1971, and is approved for use by all Departments and Agencies of the Department of Defense.

Page 1

2.1: Delete "MIL-STD-129" in its entirety.

Under "DRAWINGS" delete "C9209570" in its entirety and substitute the following:

8796521 - Marking and Sealing for Ammunition Fiber Containers.
8796522 - Marking Diagram and Sealing for Wood Packing Boxes.

Under "DRAWINGS" delete "US ARMY MUNITIONS COMMAND" and substitute, "US ARMY ARMAMENT COMMAND."

Add: "19-48-4015-12P1000 - Palletization of White Phosphorus (WP) and Plasticized White Phosphorus (PWP) Load Ammunition."

Page 3

4.2.1: Delete the second sentence in its entirety and substitute the following:

"In the lot of finished warheads the loaded fuzes shall be from one manufacturer made under one interfix number and the loaded bursters shall be from one manufacturer made under one interfix number, but no more than 5 lots of loaded fuzes or bursters shall be in any one lot of finished warheads."

4.2.2.2: Delete in its entirety and substitute the following:

"4.2.2.2 For ballistic test (proof testing). A random sample of 24 warheads shall be selected from each lot. Each warhead shall be marked with an identification number. Should one round fail to produce high order detonation an additional sample of 24 warheads shall be randomly selected and marked with an identification number."

Page 4

4.2.3.3(a): Under "Critical" add "WP leakage or evidence of leakage."

4.2.3.3(a): Delete 103 characteristic in its entirety.

4.2.6: Delete in its entirety and substitute the following:

"4.2.6 Acceptance/rejection criteria. If two warheads fail to produce high order detonation the lot shall be rejected. If one warhead fails to produce high order detonation; test an additional 24 samples. Should one or more of these additional 24 samples fail to produce a high order detonation; the lot shall be rejected."

Page 5

5.1: Change "in fiber cans" to "in a fiber can."

5.2: Delete last sentence in its entirety.

5.3: Delete in its entirety and substitute the following:

"5.3 Marking. Marking of unit packages and shipping containers will be accomplished in accordance with the instructions shown on drawings 8796521 and 8796522, except that the descriptive nomenclature shall be "Warhead, 2.75 Inch Rocket, Smoke, WP, M156."

Add the following:

"5.4 Palletization. When specified in the contract or order, warheads, packed as specified in 5.2, shall be palletized in accordance with Drawing 19-48-4015-12P1000, unit 14 on page 8, except that the arrangement shall be 5 by 5."

Check the source to verify that this is the current version before use.

6.6: Add the following:

"6.6 Lot formation. The provisions of 4.2.1 are designed to avoid proliferation of small lots during LAP of warheads, because of discrepancies in the delivered lot sizes of fuzes and bursters with planned lot sizes of warheads. They are not intended to permit indiscriminate mixing of fuzes and bursters in warhead lots. Fuzes and bursters should be introduced into the LAP process in an orderly manner to insure that the practical minimum number lots of fuzes and bursters appear in each warhead lot."
