COMMERCIAL ITEM DESCRIPTION

DISK, FLEXIBLE, TWO-SIDED, HIGH-DENSITY, UNFORMATTED, 3.8 TRACKS PER MILLIMETER (TPMM) (96 TRACKS PER INCH (TPI)), 130 MILLIMETERS (5.25 INCHES)

The General Services Administration has authorized the use of this commercial item description (CID).

Abstract. This CID covers the general requirements for a two-sided, high-density, unformatted, 130 millimeters (5.25 inches) flexible disk.

Part or Identifying Number (PIN). The PIN for the CID shall be as shown in the following example:

Salient characteristics.

Recording surfaces. This flexible disk shall have two recording surfaces.

Number of tracks. There shall be 80 discrete concentric data tracks in the recording area for data interchange on each side of this disk.

Track density. This flexible disk shall have 3.8 tpmm (96 tpi).

Disk format. This flexible disk shall be unformatted.

Disk density. This flexible disk shall be high density with a minimum of 1.5 megabytes (Mb) of unformatted memory.

Flux transitions per radian (ftpr). The ftpr for this flexible disk shall be 13,262 ftpr.

Jacket. The jacket shall be square with a side 133.3 millimeters ±0.4 millimeter (5.250 inches ±.015 inch).

Jacket thickness. The jacket thickness shall be 1.397 millimeters to 1.905 millimeters (.055 inch to .075 inch).

Operating surface temperature. This flexible disk shall withstand an operating temperature at its surface in the range from 10 to 51.5°C (40 to 125°F) at a relative humidity of 8 to 80 percent.

Design and construction. Flexible disks supplied to this CID shall be as specified herein and shall meet the requirements of ANSI X3.162.

Used or reconditioned material. A manufacturer shall not furnish any flexible disk which is used or reconditioned or is comprised of used or reconditioned material.

Regulatory requirements. This section is not applicable to this CID.

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Quality assurance provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection, examination, and test requirements specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections, examinations, or tests set forth in this description where such inspections, examinations, and tests are deemed necessary to assure supplies and services conform to prescribed requirements.

Contractor certification statement. The contractor shall certify and maintain objective quality evidence that the product offered meets the requirements of this CID, and that the product conforms to the producer's own drawings, specifications, standards, quality assurances practices, and is the same as the product provided as a bid sample. The Government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Certificate of compliance. A certificate of compliance shall accompany all flexible disks supplied to this CID. The letter of certification shall state that the flexible disk meets all the requirements of ANSI X3.162, and all requirements of this CID.

Packaging.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or purchase order.

Notes. This section contains relevant information which is useful to buyers, users, and suppliers in the process of acquiring the item, but is not mandatory.

Referenced documents. The following documents, of the issue in effect on date of invitation for bids for request for proposal, form a part of this CID to the extent specified herein.
