INTERIM AMENDMENT
TO
FEDERAL SPECIFICATION

AX, (SINGLE BIT, DOUBLE BIT, PICK HEAD
AND MATTOCK HEAD)

This Interim Amendment was developed by the General Services Administration, Federal Supply Service, Standardization Division, Washington, D.C. 20405, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized Federal agencies to use this Interim Amendment as a valid exception to Federal Specification GGG-A-926c, dated July 13, 1961.

PAGE 7

Paragraph 3.8: Delete the last two sentences and substitute:

The handle shall not be painted or varnished but may be coated with linseed oil. The unpolished surfaces of the head shall be coated with red paint or red enamel. The ax shall be similar to figure 9 and shall conform to the weights and dimensions shown in table IV.

PAGE 9

Table IV: Delete and substitute:
