INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

CUTTER, WIRE ROPE, HAND OPERATED

This interim amendment was developed by the Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C. 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this interim amendment as a valid exception to Federal Specification GGG-C-800b, dated February 27, 1964.

PAGE 8

Paragraph 3.14.1, line 2, between the words "iron" and "or", insert "ductile iron"; line 5, between the words "reamed" and "hole", insert "or shell-cored cast"; and line 12, between the words "counterbored" and "bolt", insert "or shell-cored cast".

Paragraph 3.14.2, line 4, between the words "reamed" and "hole", insert "or shell-cored cast".

Paragraph 3.14.4, delete the second sentence and substitute:

The die shall be of high grade tool steel hardened to Rockwell C reading of between 58 and 66, and be securely fastened in the upper side of the base directly in line with the descending cutting blade.
