FEDERAL SPECIFICATION

PUNCHES, CUTTING

This Interim Amendment was developed by Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C., 20406, based upon currently available technical information. It is recommended that Federal agencies use this Interim Amendment in procurement and forward recommendations for changes to the preparing activity at the address shown above. The General Services Administration has authorized Federal agencies to use this Interim Amendment as a valid exception to Federal Specification GGG-P-833a, dated January 14, 1966.

PAGE 1

Paragraph 2.1: Insert "ZZ-B-206 - Belting, Flat; Conveyor, Rubber."

PAGE 3

Table II, fifth column: Delete "1-1/8" as diameter of hole for size 21 punch and substitute "1-7/8".

PAGE 6

Paragraph 4.4.1: Delete second sentence and substitute: "Each sample punch shall be tested by punching at least 10 holes in 1/4-inch thick extra heavy leather in accordance with KK-L-258 or flat, rubber conveyor belting in accordance with type A or ZZ-B-206." Third sentence: After "leather" insert "or belting".
