DEPARTMENT OF DEFENSE
NAVAL SEA SYSTEMS COMMAND

Washington, DC 20362-5101

Procedures For Submission of Application For Approval of Nonstandard General Purpose Electronic Test Equipment.

1. This Military Standard is approved for use by the Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

2. Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, Naval Sea Systems Command, SEA 55Z3, Department of the Navy, Washington, DC 20362-5101 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

1. SCOPE

1.1 Purpose. This standard establishes uniform procedures for submission of nonstandard general purpose electronic test equipment (GPETE) applications. The procedures include the steps necessary to prepare applications, which, upon approval, allow acquisition deviation from preferred equipment listed in MIL-STD-1364 while minimizing GPETE proliferation.

1.2 Application. This standard applies to all direct Navy acquisitions of nonstandard GPETE and those acquisitions through contractors and subcontractors when required in the contractural document. In order to take advantage of the potential cost benefits possible through the use of preferred, dedicated instrumentation, GPETE plug-ins (GP-I) and GPETE ancilliary equipment (GAE) are considered to be GPETE and subject to the application procedures contained herein. Use of nonstandard GPETE application procedures allowing acquisition deviation from GSI listed in MIL-HDBK-265 is not mandatory. Users are encouraged, however, to submit applications for guidance purposes.

2. REFERENCED DOCUMENTS

2.1 Government documents.

2.1.1 Specification, standard, and handbook. Unless otherwise specified, the following specification, standard, and handbook of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation form a part of this standard to the extent specified herein.

SPECIFICATION

MILITARY
MIL-T-28800 - Test Equipment for Use With Electrical and Electronic Equipment, General Specification for.

STANDARD

MILITARY
MIL-STD-1364 - Standard General Purpose Electronic Test Equipment.

HANDBOOK

MILITARY
MIL-HDBK-265 - Standard General Purpose Electronic Test Equipment Support Items.

Check the source to verify that this is the current version before use.

2.1.2 Other Government publications. The following other Government publications form a part of this standard to the extent specified herein.

PUBLICATIONS

NAVAL SUPPLY SYSTEMS COMMAND (NAVSUP)
NAVSUP 4000 - Navy Management Data List (Master Cross Reference List)

SHIPS PARTS CONTROL CENTER (SPCC)
SPCC - Master Index of Allowance Parts List/Allowance Equipment List (MIAPL)

(Copies of specifications, standards, handbooks and publications required by contractors in connection with specific acquisition functions should be obtained from the contracting activity or as directed by the contracting officer.)

2.2 Order of precedence. In the event of a conflict between the text of this standard and the references cited herein, the text of this standard shall take precedence.

3. DEFINITIONS

3.1 GPETE. GPETE is electronic test equipment containing the capability of generating, modifying, or measuring a range of electronic functions required to test two or more systems or equipments of basically different design.

3.2 Standard GPETE. Standard GPETE equipment which has been determined by the Naval Sea Systems Command (NAVSEA) to closely meet Navy requirements. This equipment is listed in MIL-STD-1364 and is preferred for acquisition and approved for service use.

3.3 Nonstandard GPETE. Nonstandard GPETE are items of GPETE not listed in MIL-STD-1364 as preferred for acquisition.

3.4 GPETE support item (GSI). GSI is the complement of equipment, supplemental to GPETE, which is necessary to facilitate a complete test measurement capability. Standard GSI is listed in MIL-HDBK-265 and is preferred for acquisition and approved for service use.

3.5 GP-I. GP-I is a removable assembly intended to complete or augment the operational capability of a specific item of GPETE (examples: oscilloscope preamplifier plug-ins, hetrodyne frequency extender plug-ins, digital word generator plug-ins, and so forth).

3.6 GAE. GAE is a self-contained unit intended to augment the operational capability of a specific item of GPETE or group of GPETE (examples: self-contained transfer oscillators, self-contained modulators, self-contained tracking generators, and so forth).

4. GENERAL REQUIREMENTS

4.1 Guidelines for selection of nonstandard GPETE. An application for nonstandard GPETE shall be submitted to support a planned acquisition when a Navy activity determines that GPETE listed in MIL-STD-1364 does not meet established needs. Users shall consider the criteria specified in 4.1.1 and 4.1.2 when selecting nonstandard GPETE.

4.1.1 Existence in Navy inventory. The nonstandard GPETE is currently in the Navy inventory and has spare parts support. Existence in Navy inventory may be found by consulting NAVSUP 4000. Support information is available in the Navy Ships Parts Control Center (SPCC) MIAPL.

4.1.2 Environmental suitability. The nonstandard GPETE shall be suitable for use in the intended environment. Environmental type, class, and style requirements of the nonstandard GPETE shall be in accordance with MIL-T-28800.

5. DETAILED REQUIREMENTS

5.1 Application submission procedure. When a Navy activity determines a requirement to acquire nonstandard GPETE, the application contained in the request for approval (see 6.1) shall be prepared and submitted to: Naval Electronic Systems Engineering Activity (NESEA), St. Inigoes, MD 20684-0010, Attn: Code 2261 (MIL-STD-1387 application). Applications prepared by a contractor shall be submitted to the applicable Navy program manager.

5.2 Application review. Each nonstandard GPETE application will be reviewed within ten working days from the date of receipt at NESEA. A nonstandard GPETE control number will be assigned to each application and shall be referenced in all correspondence. Each nonstandard GPETE application will be evaluated for approval based on the application data, technical justification, and life-cycle cost. An item previously selected and proven in an equivalent system test application will be considered as a substitute to minimize proliferation. The applicant will be promptly advised if extended laboratory evaluation is required to process the application or if other delays occur. Applicants will be advised in writing of application approval, extension of approval, or disapproval.

5.3 Application approval. Nonstandard GPETE application approvals resulting from actions taken under this standard shall be interpreted as granting one-time authority to deviate from the standard GPETE models specified in MIL-STD-1364. Authority to initiate an acquisition and expend funds is beyond the scope of this document.

5.3.1 Term of approval. A nonstandard GPETE application approval will be valid for one year from the issue date except when based on specific out-year projections. Contact NESEA if the approval period will expire prior to acquisition initiation and an extension is required. The applicant shall stipulate the reason for the extension request and specify the extension period required.

Check the source to verify that this is the current version before use.

5.4 Application disapproval. Nonstandard GPETE applications will be disapproved when they are incomplete or not technically justified. The applicant will be notified in writing and will be given the reasons for the application disapproval.

5.4.1 Resubmission after disapproval. If a nonstandard GPETE application has been disapproved and the applicant wishes to reapply, the new application shall include cited omissions or additional justification as described in the disapproval letter. The applicant may contact NESEA Code 2261 for clarification or questions.

5.5 SPCC requirements. The nonstandard GPETE control number shall be referenced in the remarks portion of any funded Military Standard Requisition and Issue Procedure requisitions (DD Form 1348) passed to SPCC for acquisition. SPCC will reject any requirement for nonstandard GPETE which does not include a nonstandard GPETE control number.

6. NOTES

6.1 Data requirements. When this standard is used in an acquisition which incorporates a DD Form 1423, Contract Data Requirement List (CDRL), the data requirements identified below shall be developed as specified by an approved Data Item Description (DD Form 1664) and delivered in accordance with the approved CDRL incorporated into the contract. When the provisions of the DoD FAR Supplement, Part 27, Sub-Part 27.475-1 (DD Form 1423) are invoked and the DD Form 1423 is not used, the data specified below shall be delivered by the contractor in accordance with the contract or purchase order requirements. Deliverable data required by this standard is cited in the following paragraph.

Paragraph no.	Data requirement title	Applicable DID no.	Options
5.1	Request for approval of nonstandard general purpose electronic test equipment	DI-MISC-80056A	

(Data item descriptions related to this standard, and identified in section 6 will be approved and listed as such in DoD 5010.12-L., AMSDL. Copies of data item descriptions required by the contractors in connection with specific acquisition functions should be obtained from the Naval Publications and Forms Center or as directed by the contracting officer).

6.2 Subject term (key word) listing.

Ancilliary equipment, GPETE
Inventory, Navy
Plug-in, GPETE
Support item, GPETE

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
