FEDERAL SPECIFICATION

SOAP, SADDLE (LEATHER GOODS)

This specification was approved by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Saddle soap covered by this specification shall be of one type and shall be furnished in the following capacity containers, as specified (see 6.2):

2.0 ounce
1.0 pound

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issues in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

Federal Specifications:

| | | |
|---|---|---|
| PPP-C-96 | - | Cans, Metal, 28 Gage and Lighter. |
| PPP-B-636 | - | Boxes, Shipping, Fiberboard. |

Federal Standards:

| | | |
|---|---|---|
| FED-STD-123 | - | Marking for Domestic Shipment (Civil Agencies). |
| FED-STD-536 | - | Soap and Soap-Products (Including Synthetic Detergents); Sampling and Testing. |

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Check the source to verify that this is the current version before use.

(Single copies of this specification and other Federal Specifications require by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers at the General Services Administration Regional Offices in Boston, New York, Washington, D.C., Atlanta, Chicago, Kansas City, Mo., Ft. Worth, Denver, San Francisco, Los Angeles, and Seattle, Washington.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

Laws and Regulations:

21 CFR191 - Federal Hazardous Substances Act.

(The code of Federal Regulations (CFR) and the Federal Register (FR) are for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402. When indicated, reprints of certain regulations may be obtained from the Federal agency responsible for issuance thereof.

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless a specific issue is identified, the issue in effect on date of invitation for bids or request for proposal shall apply:

National Motor Freight Traffic Association, Inc., Agent

National Motor Freight Classification

(Application for copies should be addressed to the American Trucking Associations, Inc., Tariff Order Section, 1616 P Street, N.W., Washington, D.C. 20036.)

Uniform Classification Committee, Agent

Uniform Freight Classification

(Application for copies should be addressed to the Uniform Classification Committee, Room 1106, 222 South Riverside Plaza, Chicago, Illinois 60606.)

3. REQUIREMENTS

3.1 Material. Saddle soap shall be a homogeneous paste consisting of soap, waxes, and oils in aqueous emulsion (see 3.4).

3.2 Odor. The odor of saddle soap as received shall not be rancid, putrid, or acrid.

3.3 Consistency. The soap shall be non-flowing smooth paste over a temperature range of 5° to 38°C., with no separation of vehicle and in a proper form for application when tested as specified in 4.3.2.

3.4 Composition. The soap shall conform to the requirements shown in table I, when tested as specified in table III.

TABLE I. Composition

| | Minimum | Maximum |
|---|---|---|
| | Percent | Percent |
| Moisture and matter volatile at 105°C. | - | 76.0 |
| Free alkali as sodium hydroxide. | - | 0.1 |
| Free acid as oleic acid. | - | 0.3 |
| Alkaline salts as sodium carbonate. | - | 0.2 |
| Anhydrous soap. | 16.0 | - |
| Unsaponified saponifiable matter. | - | 7.0 |
| Unsaponifiable matter. | 3.0 | - |
| Matter insoluble in water (matter insoluble in water must be organic material). | - | - |

3.5 Labeling. Each container of saddle soap shall be legible, and neatly printed, stencilled, lithographed, or silk screened directly on the top of the can with the following information, precautions, and directions for use and shall conform to the Federal Hazardous Act:

STOCK NUMBER
SOAP, SADDLE (LEATHER GOODS)
FOR CLEANING AND MAINTENANCE
OF LEATHER GOODS.

Check the source to verify that this is the current version before use.

CAUTION:
NEVER USE ON SUEDE
OR FABRIC
KEEP CONTAINER TIGHTLY CLOSED
STORE IN COOL DRY PLACE
AVOID CONTACT WITH EYES AND EYE LIDS.

DIRECTIONS FOR USE:
"REMOVE LOOSE DIRT. DAMPEN A SOFT CLOTH OR SPONGE, SQUEEZING OUT EXCESS WATER. WORK SOAP INTO A LATHER AND APPLY TO LEATHER IN A CIRCULAR MOTION. WIPE AND BUFF WITH A SOFT CLOTH. CLOSE COVER TIGHTLY AFTER USE."

MANUFACTURERS NAME AND ADDRESS
DATE OF PACK AND LOT NUMBER

3.6 Workmanship. The saddle soap shall be a high quality product free from foreign matter. The finished product shall conform to the quality of product established by this specification. The occurrence of defects shall not exceed the applicable acceptable quality levels.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Inspection. Sampling for inspection shall be performed in accordance with MIL-STD-105, except where otherwise indicated hereinafter.

4.2 Component and material inspection. In accordance with 4.1, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified, or qualified in this specification or applicable purchase documents.

4.3 Inspection of the end item.

4.3.1 Examination of the end item. The end item shall be examined in accordance with the classification of defects in the following applicable sub-paragraphs and at the inspection levels and acceptable quality levels (AQLs) set forth in 4.3.1.5. Random samples shall be drawn from each lot of end items for examination of visual, net contents, and preparation for delivery defects. The lot size for purposes of determining the sample size in accordance with MIL-STD-105 shall be expressed in units of filled primary containers of the same capacity, consisting of saddle soap manufactured in one batch, for examinations in 4.3.1.1, 4.3.1.2, 4.3.1.3, and in units of shipping containers for examination under 4.3.1.4.

4.3.1.1 Examination of the primary container. The sample unit for this examination shall be one filled primary container.

| Examine | Defect |
|---|---|
| Construction | Not type and class specified (see 5.1). |
| Closure | Not type specified: imperfect. |
| Exterior coating | Not as specified. |
| Workmanship | Dented, abraded, dirty, split, punctured; any other defect affecting serviceability; any seepage of contents. |
| Markings | Missing; incomplete, incorrect, not as specified. |
| Labeling | Missing, not as specified (see 3.5 and 5.3.3). |

4.3.1.2 Examination of contents of the primary container. The sample unit for this examination shall be the contents of one filled primary container.

| Examine | Defect |
|---|---|
| Form and workmanship | Not uniform, not homegeneous, contains lumps, separates out, presence of foreign material. Odor is putrid, rancid or acrid. |

4.3.1.3 Examination of the end item for net contents. The sample unit for this examination shall be one filled primary container. The quality of the lot shall be unacceptable if the average net contents per container is less than specified or indicated for all sample units examined.

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:18Z
Check the source to verify that this is the currentversion before use.

4.3.1.4 Examination of preparation for delivery requirements. An examination shall be made to determine that the packaging, packing, and marking complies with the section 5 requirements. The sample unit shall be one shipping container, fully packed, selected just prior to the closing operation. Closed shipping containers shall be examined for closure defects. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be S-2 and the AQL shall be 2.5 defects, expressed in terms of defects per hundred units.

| Examine | Defect |
|---|---|
| Markings | Incorrect; incomplete; illegible; omitted; of improper size, location, sequence, or method of application. |
| Materials | Any nonconforming component; component missing, damaged, or otherwise defective. |
| Workmanship | Inadequate application of components: such as incomplete closure of container flaps, loose strapping, inadequate stapling, or improper taping.<br>Bulged or distorted containers. |

4.3.1.5 Inspection levels and acceptable quality levels (AQLs) for examinations. The inspection levels, for determining the sample size, and the acceptable quality levels (AQLs), expressed in defects per hundred units, shall be as follows:

| Examination paragraph | Inspection levels | AQLs |
|---|---|---|
| 4.3.1.1 | I | 2.5 |
| 4.3.1.2 | I | 2.5 |
| 4.3.1.3 | S-2 | - |

4.3.2 Testing of the end item. The end item shall be tested for the applicable physical and chemical characteristics specified in table II for each inspection lot. The lot size for test purposes shall be the number of filled primary containers of the same capacity. The sample unit shall be one pound of saddle soap. The sample size shall be as listed below. The quality of the lot shall be unacceptable if there is any failure of any test sample to meet any test requirement.

Check the source to verify that this is the current version before use.

| Lot size | Sample size |
|---|---|
| 800 or less | 2 |
| 801 up to and including 22,000 | 3 |
| 22,001 or more | 5 |

TABLE II. Instructions for testing of the end item

| Characteristic | Specification reference | | Number Determinations per Sample unit 1/ | Results reported as | |
|---|---|---|---|---|---|
| | Requirement | Paragraph | | Pass or fail | Numerically to nearest |
| Moisture and volatile matter | Table I | 4.4.2 | 1 | - | 0.1 percent |
| Free alkali (as sodium hydroxide) | Table I | 4.4.2 | 1 | - | 0.01 percent |
| Free acid (as oleic acid) | Table I | 4.4.2 | 1 | - | 0.01 percent |
| Alkaline salts (as sodium carbonate) | Table I | 4.4.2 | 1 | - | 0.01 percent |
| Anhydrous soap | Table I | 4.4.2 | 1 | - | 0.1 percent |
| Unsaponified saponifiable matter | Table I | 4.4.2 | 1 | - | 0.1 percent |
| Unsaponifiable matter | Table I | 4.4.2 | 1 | - | 0.1 percent |
| Matter insoluble in water | | | | | |
| Percentage | Table I | 4.4.2 | 1 | - | 0.01 percent |
| Identity | Table I | 4.4.2 | 1 | X | - |
| Consistency | 3.3 | 4.4.1 | 1 | X | - |

1/ Test reports shall include all values on which results are based.

Check the source to verify that this is the current version before use.

4.4 Test procedures.

4.4.1 Consistency. An original container of soap shall be cooled to 5° plus or minus 1°C. and maintained at this temperature for 2 hours. Examine and note whether any liquid has separated from the paste. Note whether the soap is soft and smooth to the touch and capable of readily being taken up with a brush or cloth without crumbling. Tilt the container and note whether any of the material flows or runs. Repeat the procedure specified above, except that the soap shall be maintained at a temperature of 38° plus or minus 1°C. for 2 hours and note results as above. The separation of a few drops of liquid which are reabsorbed when the soap is permitted to cool, shall not be considered as failure to meet this test.

4.4.2 Composition. The composition of the saddle soap shall be determined according to the methods in FED-STD-536 as shown in table III.

TABLE III. Test methods

| Determination | Method No. |
|---|---|
| Moisture and volatile matter (oven method) | 201 |
| Free alkali or free acid | 302 |
| Matter insoluble in water | 303 |
| Alkaline salts | 304 |
| Total anhydrous soap and combined alkali | 401 |
| Unsaponifiable matter | 602 |
| Unsaponified saponifiable matter | 603 |

5. PREPARATION FOR DELIVERY

5.1 Packaging. Packaging shall be level A, B, or C, as specified (see 6.2).

5.1.1 Level A (military requirements). One pound of saddle soap shall be packaged in a metal can conforming to type V, class 1 or 2 of PPP-C-96. The exterior coating shall conform to plan B of PPP-C-96.

5.1.2 Level B (civil agencies).

5.1.2.1 Unit package.

5.1.2.1.1 2 ounce container. Each 2 ounce (oz) container of saddle soap shall be packaged in a round, compound lined, double seamed metal container fitted with a curled edge slip cover conforming to type VI of

Source: https://assist.dla.mil -- Downloaded: 202610-26T11:18Z
Check the source to verify that this is the current version before use.

PPP-C-96. The exterior of the can shall be protected with a commercial grade exterior coating.

5.1.2.1.2 One pound container. Each one pound of saddle soap shall be packaged in a plastic or metal container. The plastic container shall be made of a high density plastic which is compatible with the ingredients used to formulate the saddle soap. A friction type cover shall be furnished. The metal can shall be made from 90 pound - 1/4 pound electrolytic tinplate with drawn body and slip cover. The edges of the body and cover are not curled, and the side wall of the cover shall have four lugs to provide a tight fit. The exterior of the can shall be protected with a commercial grade exterior coating.

5.1.2.2 Intermediate package.

5.1.2.2.1 2 oz container. Forty-eight 2 oz containers of saddle soap shall be packaged in a snug-fitting fiberboard box conforming to style RSC, class-domestic of PPP-B-636. Partitions and separator pads for the 2 oz containers shall be made of the same material as the box. Box closure shall be in accordance with the appendix of PPP-B-636.

5.1.2.2.2 One pound container. No intermediate packaging required.

5.1.3 Level C. The saddle soap shall be packaged to afford adequate protection against physical damage during shipment from the supply source to the first receiving activity. The supplier may use his standard practice when it meets this requirement.

5.2 Packing. Packing shall be level A, B, or C, as specified (see 6.2).

5.2.1 Level A.

5.2.1.1 Military requirements. One pound containers of saddle soap, packaged as specified in 5.1, shall be packed in fiberboard shipping containers in accordance with the exterior packing requirements for overseas shipment in the appendix of PPP-C-96.

5.2.1.2 Civil agencies. One hundred and ninety-two 2 oz containers; or twelve 1-pound containers of saddle soap, packaged as specified in 5.1, shall be packed in a fiberboard shipping container conforming to PPP-B-636, class weather-resistant, and closed, waterproofed and reinforced in accordance with the appendix of PPP-B-636.

Source: https://assist.dla.mil -- Downloaded: 202640-26T11:18Z
Check the source to verify that this is the currentversion before use.

5.2.2 Level B.

5.2.2.1 Military requirements. One pound containers of saddle soap, packaged as specified in 5.1, shall be packed in fiberboard shipping containers in accordance with the exterior packing requirements for domestic shipment in the appendix of PPP-C-96.

5.2.2.2 Civil agencies. One hundred and ninety-two 2 oz containers; or twelve 1-pound containers of saddle soap, packaged as specified in 5.1, shall be packed in a fiberboard shipping container conforming to PPP-B-636, class domestic, and closed in accordance with method II as specified in the appendix of PPP-B-636.

5.2.3 Level C. Saddle soap, packaged as specified in 5.1, shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with Uniform Freight Classification Rules or National Motor Freight Classification Rules, as applicable.

5.3 Marking.

5.3.1 Civil agencies. In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with FED-STD-123.

5.3.2 Military requirements. In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

5.3.3 Special marking. In addition each shipping container of the saddle soap shall be marked with the information specified in 3.5.

6. NOTES

6.1 Intended use. Saddle soap covered by this specification is intended for use in the cleaning and maintenance of leather goods and to a certain extent to preserve and extend the useful life of such items as leather footwear, handbags, luggage, coats, upholstery, gloves, belts, and sports equipment.

6.2 Ordering data. Purchasers should exercise any desired options offered herein and procurement documents should specify the following:

(a) Title, number, and date of this specification.
(b) Size of saddle soap required (see 1.1).
(c) Selection of applicable levels of packaging and packing (see 5.1 and 5.2).
