INCH-POUND
MIL-B-49458A(ER)
AMENDMENT 1
9 August 1994

MILITARY SPECIFICATION

BATTERIES, NON-RECHARGEABLE, LITHIUM MANGANESE DIOXIDE

This amendment forms a part of MIL-B-49458A(ER), dated 21 July 1994, and is approved for use by the Army Research Laboratory, Department of the Army, and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 16

Paragraph 4.7.1.5.3, second line - Delete "inspection battery lot" and substitute "contract lot".

PAGE 22

Paragraph 4.8.12 - Delete in its entirety and substitute:

4.8.12 Electrolyte leakage test. At no time shall there be potting substances or cell jackets applied to the cells designed for this test. The cells shall be numbered and weighed to the nearest milligram. The weight shall be recorded and the amount of electrolyte in each cell known. The cells shall be tested as described in a or b below, depending on the type of cell closure method used in production:

a. Hermetically sealed cells: These cells shall be stored for four weeks at 130°F (54°C).

b. Non-hermetically sealed cells: These cells shall be temperature cycled for 12 hours at +160°F (71°C) and ten hours at -60°F (-51°C), with one hour intervals between to change temperatures. This 24 hour cycle shall be repeated seven times for a total of seven days.

At the end of each test, the cells shall be removed and allowed to cool at room temperature for at least two hours. Each cell shall then be weighed to the nearest milligram. The weight loss shall be recorded. The weight loss shall not exceed 1.0 percent of the total electrolyte weight. The electrolyte salt weight shall not be used in this computation."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
