ADOPTION NOTICE

ASTM-B91, "Magnesium-Alloy Forgings", was adopted on 06-AUG-93 for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Army Research Laboratory Weapons and Materials Research Directorate, Attn: AMSRL-WM-M, Aberdeen Proving Ground, MD 21005-5069. Copies of this document may be purchased from the ASTM International, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959. http://www.astm.org/

ASTM-B91 in part, and ASTM-B661 in part replace QQ-M-40B along with Amendent 1. The two alloys M1A and TA54A mentioned in QQ-M-40B are not referenced in ASTM B91 because: 1. Magnesium alloy M1A has been used as an extrusion material and rarely if ever used as a forging alloy. 2. Magnesium alloy TA54A has not been produced for many years. When using ASTM-B91 for procurements the purchaser should select the preferred additional tests, options, and special inspection requirements offered in ASTM-B91, Section 4. "Ordering Information". These requisites along with the DoD Agency's selected supplementary tests and requirements then shall be included in the procurement documents and they should be justified only on the basis of need.
