4. Dimensions apply after plating when applicable.
5. Free (crimp) prior to installation in the connector.
6. Alignment sleeve and body design optional, not to exceed maximum envelope dimensions.
7. For alternate split sleeve design, engaging force shall be less than preload spring force (I.D. tolerance does not apply).
8. Alignment surface O.D. shall be concentric with "A" diameter in accordance with table I.
9. This measurement should be taken only after the complete termination procedure is completed and the alignment sleeve properly assembled.
10. "B" is defined as the tolerance on the "A" diameter.
