COMMERCIAL ITEM DESCRIPTION

BRUSHES, SCRUB

The General Services Administration has authorized the use of this commercial item description by all Federal agencies.

1. SCOPE. This commercial item description (CID) covers several types of household scrub brushes.

2. CLASSIFICATION. Select one of the following types and styles:

Type I - Brush, Scrub, Hand
Type II - Brush, Scrub, Household
Type III - Brush, Scrub, Pot and Pan
Type IV - Brush, Scrub, General Utility

Style A - Polyamide filler 0.012" (.3 mm) in diameter.
Style B - Polyamide filler 0.022" (.6 mm) in diameter.
Style C - Tampico filler.
Style D - Polypropylene or palmyra filler

3. SALIENT CHARACTERISTICS

3.1 Materials.

3.1.1 Handles. At the option of the manufacturer, the handles shall be composed of wood or general purpose impact resistant polypropylene or styrene-butadiene. Wood handles shall be knot-free, clear, closed grained and straight grained. Polypropylene and styrene-butadiene handles shall be free from any imperfections.

3.1.2 Filler.

3.1.2.1 Style A. Style A brush filler shall be polymide filament. Polymide filament shall have an average diameter of 0.012 inch (0.3 mm), without artificial color added or white.

3.1.2.1 Style B. Style B brush filler shall be polymide filament. Polymide filament shall have an average diameter of 0.022 inch (0.6 mm), without artificial color added or white.

3.1.2.2 Style C. Style C brush filler shall be natural tampico fiber. Tampico fiber shall be new, unused, commercially available tula tampico fiber.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Branch (7FXEE), 819 Taylor Street, Fort Worth, TX 76102

3.1.2.3 Style D. Style D brush fillers shall be natural palmyra fiber or polypropylene filament. The palmyra shall be a straight, resilient, new and unused, commercially available palmyra fiber. Polypropylene filler shall have a minimum diameter of 0.025 inch.

3.1.3 Metal components. Any metal components, such as staple wire, shall be inherently corrosion resistant, or plated to resist corrosion.

3.2 Design. The brush shall be similar in appearance to the specified drawing. Wood blocks shall be solid, plastic blocks may be molded with a depression in the back at the manufacturer's option. All edges of the blocks shall be rounded. Staples and filler shall be driven to the bottom of the tuft holes and the staples imbedded in the block of the bottom of the holes. The filler shall be firmly and permanently attached to the block so that when a tuft is grasped it is not removable when pulled by hand. The blocks shall be permanently marked with the manufacturer's name or recognized trademark.

3.2.1 Type I, hand scrub brush. The type I brush shall be constructed similar to figure 1, have style A filler, and shall meet the dimensional requirements of table I.

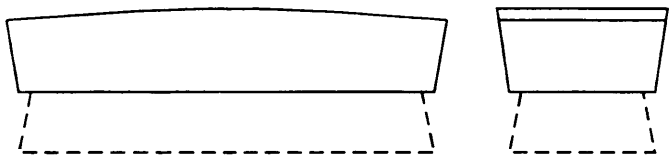

Figure 1

Table I, Type I brush

Characteristic	Dimension
Block	
Length, overall	4-1/4 ±1/4 inches (10.8 ±0.6 cm)
Width at widest point	1-3/4 ±1/4 inches (4.4 ±0.6 cm)
Thickness	3/4 ±1/8 inch (1.9 ±0.3 cm)
Filler (Style A)	
Length clear of block	9/16 inch (1.4 cm) minimum
Weight	1.1 ounce (31 g) minimum

3.2.2 Type II, household scrub brush. The type II brush shall be constructed similar to figure 2, have style C filler, and shall meet the dimensional requirements of table II.

Table II, Type II brush

Characteristic	Dimension
Block	
Length, overall	10-3/4 ±1/4 inches (27.3 ±0.6 cm)
Width at widest point	2-3/4 ±1/4 inches (7.0 ±0.6 cm)
Thickness	3/4 ±1/8 inch (1.9 ±0.3 cm)
Tuft holes	
Number	110 minimum
Depth	5/16 ±1/16 inch (0.79 ±0.16 cm)
Filler (style C)	
Length clear of block	1-1/8 inch (2.8 cm) minimum
Weight	3.0 ounce (85 g) minimum

3.2.3 Type III, pot and pan scrub brush. The type III brush shall be constructed similar to figure 3, have style B filler, and shall meet the dimensional requirements of table III.

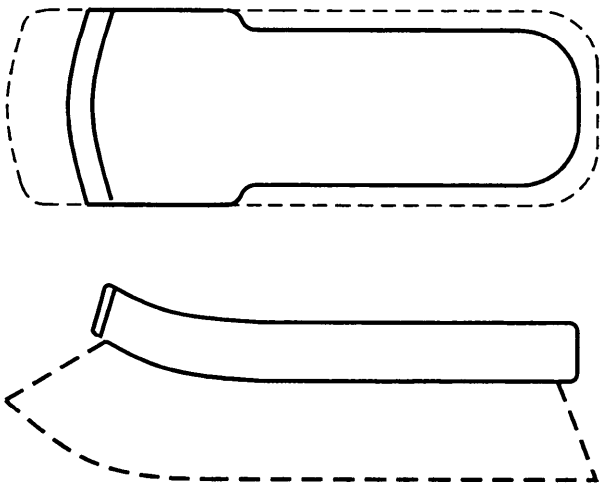

Figure 3

Table III, Type III brush

Characteristic	Dimension
Block	
Length, overall	6-1/8 +1/2, -1/8 inches (15.6 +1.3 -0.3 cm)
Width at widest point	2-1/2 ±1/4 inches (6.4 ±0.6 cm)
Thickness	3/4 +1/4 -1/8 inch (1.9 +0.6 -0.3 cm)
Depth of tuft holes	1/4 inch (0.6 cm) minimum
Filler length clear of block	1-3/8 inch (3.5 cm) minimum

3.2.4 Type IV, general utility scrub brush. The type IV brush shall be constructed similar to figure 4, shall have either style B or D filler as specified by the contract or purchase order, and shall meet the dimensional requirements of table IV.

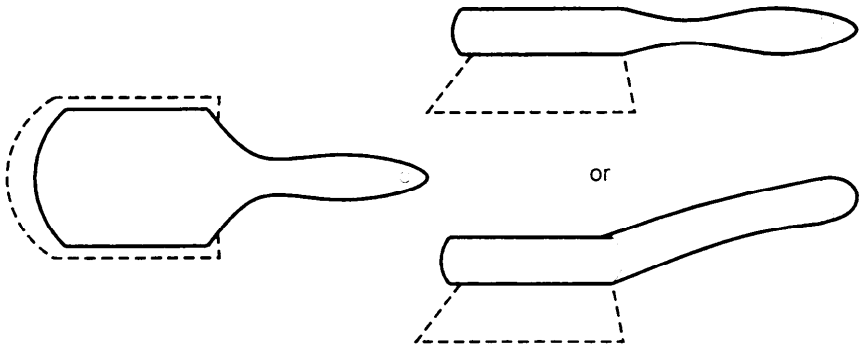

Figure 4

Table IV, Type IV brush

Characteristic	Dimension
Block	
Length, overall	8-1/2 inches (21.6 cm) minimum
Length of brush head	3-1/2 inches (8.9 cm) minimum
Width at widest	3 inches (7.6 cm) minimum
Thickness of brush head	3/4 inch (1.9 cm) minimum
Filler	
Style B	
Length clear of block	1-1/4 inch (3.2 cm) minimum
Style D	
Length clear of block	2 inches (5.1 cm) minimum
Weight	
Palmyra	2.5 ounce (71 g) minimum
Polypropylene	1.75 ounce (50 g) minimum

3.3 Workmanship. The finished brushes shall be free from splinters, surface defects, flashing, or other defects that may affect serviceability, durability or appearance. The brush filler material shall be evenly and uniformly trimmed to conform with the dimensional requirements.

3.4 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met.

4. REGULATORY REQUIREMENTS

4.1 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this CID, shall conform to the producer's own drawings, specifications, standards, and quality assurance practices, and shall be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

Check the source to verify that this is the current version before use.

6. PACKAGING, PACKING AND MARKING

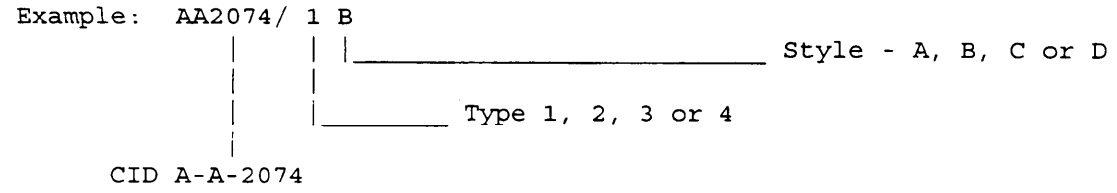

6.1 Packaging, packing and marking. The packaging, packing, and marking shall be as specified in the contract or order.

7. NOTES

7.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

a. Title, number, and date of this CID.
b. Type, style and diameter of filament (style A only).
c. The packaging, packing and marking desired

7.2 Part Identification Number (PIN). This part numbering system is intended for identification and cross-indexing of the item by the government only and does not constitute a requirement for the contractor.

7.3 National Stock Numbers. The following NSNs (with the appropriate part number) are known to use this document:

NSN	Part Number
7920-00-619-9162	AA2074/1A
7920-00-282-2470	AA2074/2C
7920-00-061-0037	AA2074/3B
7920-00-061-0038	AA2074/4B
7920-01-067-6203	AA2074/4D
