# COMMERCIAL ITEM DESCRIPTION

## MEAT TENDERIZER, ELECTRIC

The General Services Administration has authorized the use of this commercial item description in preference to Military specification MIL-M-17312.

## 1. CLASSIFICATION

1.1 Classification. This commercial item description covers two types of meat tenderizers as follows:

Type I - 120 volts, 60 hertz, single phase
Type II - 220 volts, 50 hertz, single phase

1.2 Part identification number. The part identification number shall consist of the commercial item description number and the type number as follows:

AA50027 - 1
- 1 — Type
- AA50027 — CID number

## 2. SALIENT CHARACTERISTICS

2.1 Description. The meat tenderizer shall be driven by a minimum of 1/2 horsepower motor equipped with thermal overload. The motor and drive shall be enclosed in a stainless steel or aluminum housing. The cutting knife assembly shall be enclosed in a removable, transparent, high impact plastic cover. The meat tenderizer shall consist of a steel or aluminum base and frame. The removable cover shall have a feed opening slot to accept a 1 inch thick by 7 inch wide piece of meat. An integral safety switch shall be provided to prevent the machine from operating when the cover is in the open position. The cutting knife assembly and tines or stripper shall be stainless steel and easily removed from the tenderizer as a unit for cleaning and servicing. The meat tenderizer shall be equipped with a double pole, on-off switch, with a minimum 1 horsepower rating. The meat dispensing chute shall be not less than 5 inches above the working surface. The maximum overall dimensions shall be 20 inches wide by 16 inches deep by 22 inches high.

FSC 7320

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

2.2 Electrical characteristics. The type I meat tenderizer shall be rated for operation on 120 volts, 60 hertz, single phase power source, and shall be equipped with a 6 feet long, UL listed, three conductor cord with a NEMA 5-15P plug. The type II meat tenderizer shall be rated for operation on 220 volts, 50 hertz, single phase power source, and shall be equipped with a 6 feet long, UL listed, three conductor cord without a plug.

2.3 Standards compliance. The meat tenderizer shall comply with the applicable requirements of UL Standard No. 763 and NSF Standard No. 8. Plugs shall comply with the applicable requirements of the National Electrical Manufacturers Association (NEMA) Standard WD1.

2.4 Data name plate (Government unique requirement (see 5.4)). The meat tenderizer shall be furnished with a data name plate in accordance with the applicable requirements of MIL-STD-130 except the requirements for: (a) Methods of applying, (b) Identification tags, (c) Information not required, and (d) Optional marking information shall not apply. The data plates shall be made of minimum 20 gauge corrosion-resisting metal and attached to the meat tenderizer by rivets, screws or welding in such a manner as to meet the applicable National Sanitation Foundation sanitary requirements for this equipment. The plate shall contain the following information which shall be stamped, engraved or applied by photosensitive means:

National Stock Number
Procurement Contract Number
Specification Data
Manufacturer's Name, Address and Telephone Number
Supplier's Name, Address and Telephone Number (List only if different from Manufacturer)
Manufacturer's Model Number
Government Approved Manual Number (when specified see 5.2)

Each plate shall be placed so that it is readily visible to the operator during normal operating use and so as to not adversely affect the life and utility of the meat tenderizer.

2.5 User instructions. The meat tenderizer shall have an instruction plate or decalcomania located on the outside front in view of the operator. The plate or decalcomania shall display a message warning the operator to keep hands away from the rotating knife area, to disconnect the unit from power before cleaning or servicing, or not to operate the meat tenderizer without the interlock cover in place.

3. QUALITY ASSURANCE

3.1 Certification. The contractor shall certify that the product offered meets the salient characteristics and requirements of the description and, except for those government unique requirements specified, conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same as the product offered for sale in the commercial

marketplace. The contractor shall certify the product meets the "Government unique" requirements except when specific quality assurance provisions are specified for the Government unique requirements. In this case, the contractor shall provide data resulting from inspection conducted in accordance with the specified quality assurance. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

4. PACKAGING

4.1 Packaging and packing. Packaging and packing shall be commercial or export, as specified (see 5.2).

4.2 Commercial packaging and packing. Each tenderizer shall be cleaned, preserved, packaged, packed, and unitized in accordance with ASTM D 3951.

4.3 Export packaging and packing.

4.3.1 Export packaging. Each tenderizer shall be cleaned, preserved, and cushioned to protect against corrosion, deterioration, and physical damage during shipping and storage. Disassembled parts and accessories shall be packaged in a fiberboard box conforming to type CF or SF, class domestic, style optional of PPP-B-636.

4.3.2 Export packing. Each tenderizer, with its packaged parts, shall be packed in a box conforming to type CF or SF, grade V3c, V2s, V3s, or V4s, style optional of PPP-B-636, or a wood cleated plywood box conforming to overseas type, style optional, type 2 load of PPP-B-601; or in a wood cleated fiberboard box conforming to class II of PPP-B-591. Each box shall be waterproofed with a sealed case liner conforming to type I, II, or IV, grade optional of MIL-L-10547. Each box shall be closed and strapped in accordance with PPP-B-601 or PPP-B-591, as applicable.

4.3.3 Palletization. When specified (see 5.2), shipping containers shall be palletized in accordance with MIL-STD-147.

4.4 Marking (commercial and export). Marking of unit packs, shipping containers, and palletized unit loads shall be in accordance with MIL-STD-129 or ASTM D 3951, as applicable.

5. NOTES

5.1 Intended use. The meat tenderizers are intended to blend and knit small pieces of meat into tenderized steaks.

5.2 Ordering data. Acquisition documents should specify the following:

a. Title, number, and date of this document.
b. Type required (see 1.1).
c. Government approved manual number to be included on the data name plate when manuals are purchased under the contract (see 2.4).
d. Selection of applicable packaging and packing required (see 4.1).
e. When palletization of shipping containers is required (see 4.3.3).

5.3 Sources of documents.

5.3.1 Sources of nongovernment association documents.

UL Standard No. 763 - Motor Operated Commercial Food Preparation Equipment is available from:

Underwriters Laboratories, Inc. (UL)
333 Pfingsten Road
Northbrook, IL 60062

NSF Standard No. 8 - Commercial Powered Food Preparation Equipment is available from:

National Sanitation Foundation (NSF)
3475 Plymouth Road
P.O. Box 1468
Ann Arbor, MI 48106

Standard WD1 - General Purpose Wiring Devices and NEMA 5-15P plugs are available from:

National Electrical Manufacturers Association (NEMA)
155 East 44th Street
New York, NY 10017

ASTM D 3951 - Standard Practice for Commercial Packaging is available from:

The American Society for Testing and Materials (ASTM)
1916 Race Street
Philadelphia, PA 19103-1187

5.3.2 Sources of governmental documents.

Military documents are available from:

Naval Publications and Forms Center
5801 Tabor Avenue
Philadelphia, PA 19120
