COMMERCIAL ITEM DESCRIPTION

BAG, SPECIMEN

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a leak proof plastic mailing bag for shipping a box containing bottles filled with urine specimens.

Salient characteristics:

Shall be a white opaque mailing bag, for shipping a fiberboard corrugated compartment box holding twelve (12) plastic screw cap bottles filled with urine specimens. The bag shall accommodate a box having overall dimensions of 3-1/2 H X 6-1/2 D X 8-3/4 L (inches).

Shall be constructed so that the bag closure and sealing is accomplished by a self-sealing adhesive closure and/or heat sealing.

Shall be approved by the United States Postal Service for shipping clinical specimens.

Shall be 11 X 15 inches in dimension. The long dimension shall also have a two (2) inch extended lip (flap). The lip shall include a perforation line and an adhesive strip for the self-sealing closure of the bag. Folding the self-sealing adhesive strip at the perforation line shall result in a sealed bag with a non leak barrier that acts as a liquid containment seal.

Shall have bag constructed with tear notches to facilitate easy opening of a sealed bag.

Shall be fabricated from heat sealable 3 mil thick nylon/polyethylene sheet material that provides a barrier against the transfer of odor, air, and moisture. The exposed surfaces of the assembled bag shall accept adhesive based labels, and markings that are applied directly to the bag by inks, typewriting, handwriting and printing.

AMSC N/A FSC 6530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Shall after sealing provide a barrier against leakage from the liquid contents within the bag. Any leakage from a urine filled bottle shall be contained within the bag, and the bag shall facilitate its transportation and handling by remaining odorproof, moisture proof and leakproof.

Shall be a puncture and tear resistant type bag. The construction of the bag shall be such to indicate evidence of an unauthorized attempt having been made to tamper with or open a sealed bag. Tampering with the sealed bag shall result in the adhesive seal stretching the plastic and the perforated line ripping the top of the adhesive based closure.

Shall have adhesive strip on the bag supplied with a protective liner covering that is readily removable when the bag is ready for use.

Workmanship. The specimen bag shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Package (PG). One package containing one thousand specimen bags, as specified, constitutes one unit.

QUALITY ASSURANCE PROVISIONS.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Check the source to verify that this is the current version before use.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerance specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug, and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction , the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. (Intermediate/exterior package quantities and labeling and marking must be specified in the contract and/or order).

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the document number and revision letter should be given.
2. The submitter of this form must complete blocks 4, 5, 6, and 7.
3. The preparing activity must provide a reply within 30 days from receipt of the form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
