COMMERCIAL ITEM DESCRIPTION

LABEL (Four Part, Tamper Evident)

The General Services Administration has authorized the use of this Commercial Item Description.

This Commercial Item Description covers a four part adhesive coated label that is tamper evident, for use in maintaining a chain of custody for clinical laboratory specimens.

Salient characteristics:

Shall be a tamper evident four (4) part label. Shall be constructed and adhesive coated in such a way that once the label is applied to a container or shipping bag the label cannot be removed in one piece, and will tend to shred. The label shall be fabricated of weak paper fibers. A label fabricated from vinyl or film material shall not be acceptable.

Shall be suitable for labeling and aiding in maintaining a chain of custody on urine, blood, or tissue specimens.

Shall be an overall dimensioned 1-1/2 X 4 inch rectangular size die-cut four (4) part label that is mounted on a carrier sheet. The corners of the four (4) part label shall be rounded or rectangular.

Shall have undersides of four (4) part label supplied with a pressure-sensitive aggressive type adhesive coating. The adhesive shall require no heat, moisture, or other preparation prior to labeling on a container, or a shipping bag made of paper or plastic.

Shall have a white and opaque finish on the top side of the four (4) part label that is suitable as a marking surface. The marking surface shall accept applied in and pencil marking without smudging or spreading.

AMSC N/A FSC 7530

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

The four (4) part label shall consist of a 1-1/4 X 4 inch primary label and three individual strips that are not attached to the primary strip. The three strips shall be mounted on the carrier sheet in a straight row across the top of the long dimension of the primary label. Each of the three strips shall be provided with a 1-1/4 X 1/4 inch space for applying markings.

Shall be supplied with the four (4) part label mounted on a carrier sheet backing. The carrier sheet shall be in the form of a 4-3/4 inch wide tractor feed perforated sheet. The surface of the carrier sheet backing shall allow each of the four (4) parts of the tamper evident style label to be deliberately peeled off in one piece without separation. Unless deliberately peeled off, there shall be no tendency for an accidental peel-off or separation of the label from the carrier sheet backing.

Workmanship. The four (4) part label and carrier sheet backing shall be free from defects which detract from their appearance or impair their serviceability.

Unit. Package (PG). One package containing two thousand labels, as specified, constitutes one unit.

QUALITY ASSURANCE PROVISIONS.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

Records. Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government upon the Government's request, at any time, or from time to time, during the performance of the contract and for a period of three years after delivery of the supplies to which such records relate.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Inspections and tests. Inspections and tests shall be conducted on the four (4) part label and carrier sheet backing in accordance with commercial practice. Sampling for the inspections and tests shall be in accordance with commercial practice.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified using conversion tables contained in the latest revision of Federal Standard No. 376, and all other requirements of this document are met.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug, and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction , the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal State, and local statutes, ordinances, and regulations.

Recovered material. The offeror/contractor is encouraged to use recovered material in accordance with Federal Acquisition Regulation Subpart 23.4 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.

Ordering data. (Intermediate/exterior package quantities, labeling, and marking must be specified in the contract and/or order).
