COMMERCIAL ITEM DESCRIPTION

REFLECTOR SET, HIGHWAY WARNING, TRIANGULAR

The General Services Administration has authorized the use of this commercial item description, for all federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This commercial item description covers triangular warning devices designed for storage in motor vehicles and used to warn approaching traffic of the presence of a stopped vehicle.

1.2 Classification. The warning devices shall be furnished in the following sets, as specified:

Set 1 - One warning device
Set 2 - Two warning devices
Set 3 - Three warning devices

2. SALIENT CHARACTERISTICS

2.1 Description. Each warning device shall be an equilateral triangle. Each warning device shall comply with the requirements of FMVSS No. 125 (49 CFR Part 571.125). The warning device shall be permanently and legibly marked with the symbol DOT, or the statement that the warning device complies with FMVSS No. 125.

2.1.1 Dimensions. Sides shall be not less than 17 inches nor more than 22 inches long.

2.1.2 Color. The warning device colors shall be in accordance with FMVSS No. 125.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

FSC 9905

2.1.3 Containers. The warning devices shall be collapsible without the use of tools and stored in a reusable container. The container shall support the elements of the warning device(s) to prevent damage to the reflective surfaces. The Set 1 container may be separate or an integral part of the warning device. The Set 2 and Set 3 warning devices intended to be sold for use as a set with a single vehicle may be enclosed in a single container.

2.1.4 Workmanship. The warning devices shall function smoothly for the purpose intended. Reflective elements shall be free of cracks or chips. No defects that affect appearance, function or serviceability shall be permitted.

2.2 Metric Products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

2.3 Standard commercial product. The reflectors shall, as a minimum, be in accordance with the requirements of this CID and shall be the manufacturer's standard commercial product. A standard commercial product is a product which has been sold or is currently offered for sale on the commercial market through advertisements, manufacturer's catalogs, or brochures, and represents the latest production model.

3. REGULATORY REQUIREMENTS

3.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product offered for sale in the commercial marketplace. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

5. PACKAGING

5.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.

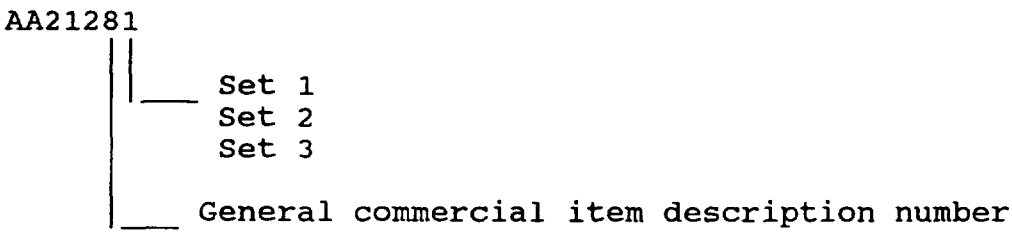

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. The set number required (see 1.2).

6.2 Part Identification Number. Reflector sets conforming with this commercial item description shall be identified by a part number configuration consisting of identification of a portion of the specification and set number. An example of the part number configuration is shown below. This part numbering system is intended for identification and cross-indexing of the item within the Federal cataloging system. Part numbers are not required to be placed on the product or container.

EXAMPLE:

6.3 National stock numbers (NSNs). The following is a list of NSNs assigned which correspond to this CID. The list may not be indicative of all possible NSNs associated with the CID.

NSN	Set
9905-00-148-9544	1
9905-00-534-8376	2
9905-00-148-9546	3

6.4 Source of Documents.

6.4.1 Copies if Federal Acquisition Requlations (CFR) are available from th Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.
