COMMERCIAL ITEM DESCRIPTION

HANGERS, CLOTHES (WIRE) AND TROUSER GUARDS

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification RR-H-1102.

This commercial item description covers wire clothes hangers and trouser guards, as specified.

Salient characteristics:

ITEM 1: Hangers. Wire used for the complete hanger shall be steel, minimum diameter 0.0895 inches. Hangers shall be coated with enamel or lacquer. Widths of hangers shall be 15-3/4 inches minimum.

ITEM 2: Trouser guards. Trouser guards shall be made of paperboard or chipboard, free of surface contaminants and transferable matter. They shall be designed to cover the horizontal wire hangers and be shaped to give a curved support to trousers hung thereon. Ends shall have slots to keep the guard in place. A latex or noncrystalline abrasive strip shall be applied along the longitudinal axis of the guard, equidistant from both edges. Overall length of the guards, including the two end locks, shall be 16-3/4 inches minimum. The grooved dimension shall be 15-1/4 inches minimum to 15-1/2 inches maximum.

Workmanship. Hangers shall be free from any splinters, sharp edges, projections, or other defects that might snag or tear garments. Surfaces shall be free from flaws, cracked or peeling enamel or lacquer, and other defects which impair serviceability or appearance. Trouser guards shall be cleanly cut and free from defects that would impair appearance or serviceability.

Quality Assurance:

Inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification, where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Sampling. Sampling for inspection shall be in accordance with MIL-STD-105. Examine for visual and dimensional defects using level S-4, AQL 6.5 percent defective.

Regulatory requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Governments policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

Preservation,packaging,packing,labeling,and marking (Civil Agencies). The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Packaging (DoD). The packaging shall be in accordance with ASTM Standard D3951
