MILITARY SPECIFICATION:

STUDS, BOLTS, HEX CAP SCREWS, AND NUTS

This amendment forms a part of Military Specification MIL-S-001222G(SHIPS), dated 13 January 1976, and is approved for use by the Naval Sea Systems Command and is available for use by all Departments and Agencies of the Department of Defense.

2.2: Under AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI) add:

"B1.12 - Class 5 Interference-fit Thread."

PAGE 4

Table I: footnote 3, delete second sentence.

PAGE 5

Table II: for Grade 5 steels over 1-1/2-inch diameter, Machined specimens Yield strength, delete "90" and substitute "58".

PAGE 7

Table III: for Grade 5 nuts 1/4 to 1 inch, types II and IV, delete "170" and substitute "72".

PAGE 10

3.4.1: add "Class 5 interference-fit threads shall be in accordance with ANSI B1.12."

PAGE 13

3.5.1: delete and substitute:

"3.5.1 Material identification. Each fastener 1/4 inch size and over, (grades 1 and 2 excluded) shall be marked to identify the material. In addition, all externally threaded grade 500 (nickel-copper-aluminum) and grade T7 (titanium) fasteners 1/4 inch and larger shall be marked with the heat or lot number and the manufacturer's symbol. Marking shall be of permanent type and may be raised or depressed. Stamping shall be made with low stress (round radius) die stamps. Marking shall be applied to the head of the hex cap screws, the nut end of tap end studs, either end of continuous studs, and the top face (not washer face) of nuts. Manufacturer's identification symbols are required for fasteners procured to a lot definition "A". Manufacturer's symbol for fasteners procured to lot definition "B" is optional (see 4.2)."

PAGE 15

3.5.1.1: delete.

PAGE 16

Table VIII: for Mechanical tests, delete "MIL-STD-105, special inspection level S-1, AQL = 1.5" and substitute "2/".

After footnote 1/, add

2/

Lot size (pieces)	Sample size	Acceptable defects
50 and less	2	0
51 - 500	3	0
501 - 3500	5	0
Over 3500	8	0
