FEDERAL SPECIFICATION

SCALLOPS, CHILLED AND FROZEN

This specification was approved by the Secretary, U.S. Department of Agriculture, for the use of all Federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This specification covers the requirements for raw, chilled or frozen scallops for use by the Federal agencies where refrigeration facilities are available.

1.2 Classification. Scallops shall be of the following types, species, and grades as specified (see 6.1).

Types:

Type I - Chilled Raw Scallops
Type II - Frozen Raw Scallops
Type III - Individually Quick Frozen (IQF) Raw Scallops
Type IV - Individually Quick Frozen (IQF) Raw, Breaded Scallops

Species:

a. Sea-*Placopecten magellanicus*

b. Calico-*Pecten gibbus*

c. Weathervane-*Patinopecten caurinus*

d. Bay-*Pecten irradians*

e. Other species as specified

Grades:

USDC - Grade A
USDC - Grade B

FSC 8905

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

Federal Specifications:

PPP-B-636 - Boxes, Shipping, Fiberboard
PPP-B-1163 - Box, Corrugated Fiberboard, High Compression Strength, Weather-Resistant, Wax-Resin, Impregnated

Federal Standard:

FED-STD-123 - Marking for Shipment (Civil Agencies)

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(Single copies of this specification and other Federal specifications required by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers, at the General Services Administration Regional Offices in Boston, New York, Washington, DC, Atlanta, Chicago, Kansas City, MO., Fort Worth, Denver, San Francisco, Los Angeles, and Seattle, WA.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standard:

MIL-STD-129 - Marking for Shipment and Storage

(Copies of specifications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

LAWS AND REGULATIONS

US Department of Health, Education and Welfare

Federal Food, Drug and Cosmetic Act and Regulations Promulgated Thereunder

(Application for copies should be addressed to the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.)

U.S. Department of Commerce

Title 50, Chapter II, Subchapter G - Processed Fishery Products, Processed Products thereof, and Certain Other Processed Food Products:

Part 260 - Inspection and Certification
Part 266 - United States Standards for Grades of Molluscan Shellfish Products

(Application for copies should be addressed to the U.S. Department of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, Fishery Research and Inspection Division, Washington, DC 20240.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless a specific issue is identified, the issue in effect on date of invitation for bids or request for proposal shall apply:

National Motor Freight Traffic Association, Inc., Agent

National Motor Freight Classification

(Application for copies should be addressed to the American Trucking Associations, Inc., Traffic Department, 1616 P Street, N.W., Washington, DC 20036.)

Uniform Freight Classification Committee, Agent

Uniform Freight Classification

(Application for copies should be addressed to the Uniform Classification Committee, Room 1106, 222 South Riverside Plaza, Chicago, IL 60606.)

3. REQUIREMENTS

3.1 Material.

3.1.1 Scallops. The scallops shall be prepared from clean, wholesome adequately drained, whole adductor muscles of the scallop. The portion of the scallop used shall be only the adductor muscle "eye" which controls the shell movement. The product shall be handled and processed in accordance with the U.S. Standard for Grades of Molluscan Shellfish Products, Part 266, Subpart A - U.S. Standard for Grades of Frozen Raw Scallops and Subpart B - U.S. Standards for Grades of Frozen Raw Breaded Scallops and Fried Scallops, as applicable.

Check the source to verify that this is the currentversion before use.

3.2 Processing.

3.2.1 Type I, fresh (chilled). Fresh scallops shall be held at temperatures between 32° and 40°F (0° and 4.4°C) until delivery (maximum of 72 hours from time of landing).

3.2.2 Type II, frozen (regular). The scallop meats shall be placed in a freezer suitably equipped to ensure that the scallops are solidly frozen and exhibits an internal temperature of 0°F (-18°C) or lower within 24 hours of placement into the freezer. Frozen raw scallops shall be maintained at 0°F (-18°C) or lower until time of delivery. The time between packaging and entering the freezer shall not exceed 4 hours and the temperature of scallops during this period shall not exceed 40°F (4.4°C). Frozen scallop meats furnished under this specification shall not be accepted if they have been frozen more than 180 days at the time of delivery calculated from the time the scallops were initially frozen. The product shall be in excellent condition at time of delivery and shall exhibit no evidence of thawing or refreezing.

3.2.3 Type III, frozen (IQF) raw. The product shall be frozen prior to packaging as follows:

(a) Freezing equipment. Cryogenic freezing equipment (gaseous nitrogen tunnel, rotating drum, plate freezer or other type of "quick freeze" equipment) shall be used to reduce the temperature to 0°F (-18°C) or less in the thickest part of the product within one hour after the product enters the freezer.

(b) Glazing. The type III scallops shall be individually water glazed after freezing and prior to packaging. The amount of glaze shall not exceed 10 percent of the frozen weight of the individual scallop.

(c) Handling of frozen product. Following the freezing process, the product shall be maintained at a uniform temperature of 0°F (-18°C) (or colder) while being packed, prepared and held (stored) at all times prior to delivery. The product shall be in excellent condition at time of delivery and shall exhibit no evidence of thawing or refreezing. Frozen scallop meats furnished under this specification shall not be accepted if they have been frozen more than 180 days at the time of delivery calculated from the time the scallops were initially frozen.

3.2.4 Type IV, frozen (IQF) raw breaded. The scallops shall be breaded prior to freezing. The product shall be frozen prior to packaging in accordance with the requirements of 3.2.3(a). Handling subsequent to freezing shall be in accordance with the requirements of 3.2.3(c).

Check the source to verify that this is the currentversion before use.

3.3 All requirements not specifically contained herein shall comply with the regulations of the US Department of Commerce on processed Fishery Products, Processed Products thereof, and Certain Other Processed Food Products - 50CFR, Chapter II, Subchapter G.

3.4 Plant qualification. The product shall be prepared in a type I Official Establishment under product inspection (contract basis) of the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, US Department of Commerce (USDC).

3.5 All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Certificate of compliance. Unless otherwise specified (see 6.1), the contractor shall furnish official certificates issued by USDC including inspection certificates, certificates of loading and certificates of sampling with a description of condition of containers and the condition under which the processed product is stored which show that the product complies with the terms of this specification and applicable procurement documents for which USDC has inspection responsibility.

4.2 Plant qualification. The product furnished under this document shall be unacceptable if not produced and stored in plants which currently meet the qualification conditions of 3.4.

4.3 Quality conformance inspection. Sampling for inspection shall be performed in accordance with Part 260 of the regulations of the US Department of Commerce on Processed Fishery Products, Processed Products Thereof, and Certain Other Processed Food Products - 50CFR, Chapter II, Subchapter G.

4.3.1 Component and material inspection. In accordance with 4.1, components and material shall be inspected in accordance with all the requirements of referenced specifications, drawings, and standards, unless otherwise excluded, amended, modified or qualified in this specification or applicable purchase document.

Source: https://assist.dla.mil -- Downloaded: 202640-26T12:02Z
Check the source to verify that this is the current version before use.

4.3.2 In-process inspection. Examination shall be made for conformance to 3.1.1 and to the time, temperature, and equipment requirements of 3.2.1 through 3.2.4. Any nonconformance with the specified requirements, reflected by actual examination or by records shall be cause for rejection of the lot and for correction of the process.

4.3.3 End item inspection. Examination of the finished product shall be made to determine compliance with the US Standard for Grades of Frozen Raw Scallops or US Standard for Grades of Frozen Raw Breaded Scallops and Frozen Fried Scallops.

4.3.3.1 Inspection for frozen storage limits. Examination shall be made to determine compliance with the storage limits of 3.2.2, 3.2.3 and 3.2.4. Storage temperature shall be ascertained by examination of storage records or other valid means or documentation. Nonconformance to one or more of these requirements, reflected by actual examination or by records as applicable, shall be cause for rejection of the lot.

4.3.4 Packaging inspection. Examination shall be made to determine compliance with 5.1. The inspection level shall be S-4 with an acceptable quality level (AQL) of 4.0 for major defects and 6.5 for minor defects. The lot size and sample size shall be expressed as cartons. The defects shall be as listed in table I for level B.

TABLE I. Examination of unit pack (carton)

Category		Defect
Major	Minor	
151		Imparts odor, flavor or color to product.
152		Carton other than specified type.
153		Tear or hole.
	201	Not closed or sealed.
154		Not lined, impregnated or coated (as applicable).
155		Not new or clean.
156		Weight of product greater than 10 pounds.

4.3.4.1 Examination of shipping containers. When shipping containers are required to be in accordance with PPP-B-636 or PPP-B-1163, examination for defects in construction, closure and reinforcement shall be in accordance with quality assurance provisions of the applicable box specification. In addition, the following classification of defects shall be included in the examination: Major: (1) National Stock Number, item description, contract number or date of pack markings missing, incorrect or illegible; (2) Weight of product greater than

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T12:02Z
Check the source to verify that this is the current version before use.

50 pounds; (3) Reinforcing bands are metallic or do not contrast with black. Minor: (1) Other required markings missing, incorrect or illegible; (2) Number and direction of reinforcing bands not as specified. Level C shipping containers shall be examined only for the aforementioned marking defects and for the closure method specified in 5.2.2.

5. PACKAGING

5.1 Preservation. The product shall be preserved in accordance with levels B or C, as specified (see 6.1).

5.1.1 Level B (type II, III and IV only). The product shall be unit packed in accordance with 5.1.1.1 or 5.1.1.2.

5.1.1.1 Cartons. Not more than 10 pounds (4.5 kg) of the product shall be filled into a paperboard carton of the type commercially used for unit packing this product, provided it is fabricated from pulp and is new, clean, and does not impart an odor, flavor, or color to the product. The interior of the carton shall be coated or impregnated with wax, or a food-type vinyl resin or polyethylene. Cartons that are not self-locking shall be sealed in accordance with good commercial practice.

5.1.1.2 Alternative unit pack. The product, in the quantity specified in 5.1.1.1, shall be unit packed in a waxed carton made of bending chipboard not less than 0.020 inch (0.51 mm) thick. The carton shall be completely lined with one of the following materials.

(a) Bleached, semi-bleached, or unbleached kraft or sulphite paper or vegetable parchment having a minimum basis weight of 26 pounds per ream (24 by 36 - 500). The paper or parchment shall be wet-waxed on both sides with not less than 9 pounds per ream (24 by 36 - 500) of a fully refined paraffin wax.

(b) Polyethylene film, 0.0015 inch (0.04 mm) thick; or

(c) A 0.001 inch (0.025 mm) thick film formed by copolymerizing vinylidene chloride and vinyl chloride.

5.1.2 Level C. Not more than 10 pounds (4.5 kg) of the product shall be furnished in a commercial unit pack. The unit pack shall afford adequate protection against deterioration and physical damage during shipment from the supply source to the first consuming activity.

5.2 Packing. Not more than 50 pounds (23 kg) of scallops, preserved as specified in 5.1, shall be packed in a snug-fitting shipping container in accordance with level B or C, as specified (see 6.1 and 6.2).

Source: https://assist.dla.mil -- Downloaded: 202640-26T12:02Z
Check the source to verify that this is the current version before use.

5.2.1 Level B packing (types II, III and IV). The shipping container shall be a fiberboard box, constructed, closed and reinforced in accordance with style RSC, grade V3c, V3s or V4s of PPP-B-636. Alternatively, the shipping container shall be a wax-impregnated fiberboard box constructed in accordance with style RSC, class I, type SWCFI, grade 275 of PPP-B-1163. Closure of the wax-impregnated box shall be with hot-melt adhesive in accordance with the appendix of PPP-B-636. The wax-impregnated container shall be reinforced with two lengthwise bands and one girthwise band in accordance with the appendix of PPP-B-636. All shipping containers shall be reinforced with nonmetallic strapping or pressure-sensitive adhesive filament reinforced tape in accordance with the appendix of PPP-B-636. The reinforcing bands shall be uncolored or of a color which will contrast with black.

5.2.1.1 Alternate shipping containers. When specified (see 6.1 and 6.3), the shipping container shall be a fiberboard box, constructed, closed and reinforced in accordance with style RSC, grade W5c or W5s of PPP-B-636. Alternatively, the shipping container shall a wax-impregnated fiberboard box constructed in accordance with style RSC, class I, type SWCFI, grade 200 of PPP-B-1163. Closure of the wax-impregnated box shall be with hot melt adhesive in accordance with the appendix of PPP-B-636. The wax-impregnated container shall be reinforced with two lengthwise bands and one girthwise band in accordance with the appendix of PPP-B-636. All shipping containers shall be reinforced with nonmetallic strapping or pressure-sensitive adhesive filament reinforced tape in accordance with the appendix of PPP-B-636. The reinforcing bands shall be uncolored or of a color which will contrast with black.

5.2.2 Level C packing. The shipping container shall be in accordance with the Uniform Freight Classification or National Motor Freight Classification, as applicable, except that the closure of fiberboard boxes shall be in accordance with method II as specified in the appendix of PPP-B-636. The product shall be packed in a manner to ensure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies.

5.3 Labeling and marking.

5.3.1 Cartons. Commercial labeling will be acceptable providing it conforms with the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

5.3.2 Shipping containers. Shipping containers shall be marked in accordance with FED-STD-123 or MIL-STD-129, as applicable. In addition, the following information, as applicable, shall appear on the side, the marked end being to the left, and also on the top of the shipping container, in letters between 1 and 1-1/2 inches (25 to 38 mm) high, all letters being of equal height:

Check the source to verify that this is the current version before use.

KEEP REFRIGERATED (32° to 38°F (0° to 3°C))

OR

KEEP FROZEN (0°F or below) (-18°C or below)

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(a) Title, number, and date of this specification.
(b) Type, species, and grade of product required (see 1.2).
(c) When certificates of compliance are not required (see 4.1.1).
(d) Level of preservation and packing required (see 5.1 and 5.2).
(e) When the alternate packing specified in 5.2.1.1 is adequate (see 6.3).

6.2 Appropriate level of pack. Based on conditions known or expected to be encountered during shipping, handling, and storage of the specific item being procured, the contracting officer should select the appropriate level of pack in accordance with the criteria established in AR 700-15/NAVSUPINST 4030.28/ AFR 71-6/MCO 4030.33A/ or DLAR 4145.7, as applicable.

6.3 Use of alternate packing. Packing specified in 5.2.1.1 is intended for use when experience or knowledge of the destination and mode of shipment would indicate that a lower grade of board can be used.

6.4 Metric equivalents. Metric equivalents, indicated in parentheses throughout this document, are based on practices, conversion factors, and symbols specified in ASTM E 380 Standard for Metric Practice, and are for information only. In each instance, the value stated in US customary units shall be controlling.
