COMMERCIAL ITEM DESCRIPTION

RACK, DISTRIBUTOR, DESK

The General Services Administration has authorized the use of this commercial item description.

1. SCOPE: This commercial item description covers distributor racks which provide a series of open vertical filing compartments.

2. SALIENT CHARACTERISTICS:

A. Construction. The distributor racks shall be the vertical type with 40.6 cm (16") nominal filing capacity (8 compartments). The racks shall be fabricated of metal.

Configuration. The racks shall consist essentially of a base and dividing partitions which form a series of open vertical compartments. The dividing partitions may be stationary or designed to allow removal or adjustment to vary the number or size of compartments. The base shall be in one piece and shall be provided with attached rubber, cork, felt, or other suitable type feet, or manufactured in such a manner as to preclude the possibility of scratching or marring the surface under the rack. The racks shall rest firmly on a flat surface and shall be sturdily constructed and sufficiently rigid.

Metal. The metal shall be commercial quality cold rolled steel, except for dividers which may be steel wire. The metal shall be bright, smooth, free from rust, scale, pits, scratches, crimps, and buckles.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document, should be sent to: General Services Administration, Federal Supply Service, 26 Federal Plaza, New York N.Y. 10278 ATTN: Engineering Branch (2FYEE).

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Finish. Shall be in accordance with normal commercial practice. All finishes shall level out to produce a smooth uniform surface and color, without runs, wrinkles, grit or areas of thin film. All parts shall be thoroughly coated with a commercially acceptable finish.

Color. Shall be as specified, or, if not specified, at the option of the manufacturer.

Dimensions. The overall dimensions shall not be less than 17.8 cm (7") high and 20.3 cm (8") deep and not more than 25.4 cm (10") high and 30.5 cm (12") deep. The width dimension shall be 40.6 ± 2.54 cm (16 ± 1").

Base. The base of the racks shall be at least 0.437 - 0.493 mm (26 gage - 0.0172" to 0.0194") thick steel, in accordance with Manufacturer's Standard Gage for Steel Sheets.

Dividers. The dividers shall be at least 0.569 - 0.645 mm (24 gage - 0.0224" to 0.0254") thick steel, in accordance with Manufacturer's Standard Gage for Steel Sheets. If steel wire is used, it shall be not less than 3.76 mm (No.9 - 0.148") diameter, (Birmingham Wire Gage). Removable dividers shall have a locking feature so they cannot be knocked out of position under normal usage.

Identification marking. Each rack shall be marked with the manufacturer's name or with a trademark of such known character that the source of manufacture may be readily determined.

B. Workmanship. The method of fabricating, assembling, and finishing the rack shall be in accordance with the best commercial practices. All parts shall be free of burrs and sharp edges, and all corners rounded. Racks shall be free of any defects affecting appearance or serviceability.

3. QUALITY ASSURANCE:

A. Responsibility for Inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in this commercial item description, where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

B. Contractor Certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices.

C. Sampling. Samples shall be selected for inspection in accordance with MIL-STD-105 A lot shall consist of a number of sample units manufactured by the same process from the same components at the same time. Random samples shall be drawn from each lot for the end item inspection. The sample unit shall be one rack. The inspection level for construction, materials and workmanship shall be S-4 and the AQL shall be 4.0 percent defective.

4. REGULATORY REQUIREMENTS: The offeror/contractor is encouraged to use recovered materials in accordance Paragraph 23.403 of the Federal Acquisition Regulation.

5. PACKAGING, PACKING, MARKING AND PALLETIZATION: Shall be as specified in the contract or purchase order.

6. REFERENCED DOCUMENTS: The issue of the referenced documents in effect on the date of the solicitation for offers or request for proposals shall be used to determine conformance with the requirements of this commercial item description.

A. Federal Regulations

Federal Acquisition Regulation. Paragraph 23.403

Copies of the U.S. Code may be obtained through the Congressional Sales Office, U.S. Government Printing Office, Washington D.C. 20402.

B. Military Standard

7. ORDERING DATA: Purchasers shall specify the following in the contract or purchase order:

(a). Title, number, and date of this commercial item description
(b). Color (if specific color is required)
(c). Unit of issue and quantity
(d). Packaging, packing, marking and palletization requirements.

MILITARY INTERESTS:

DoD has no registered interest in revisions and amendments to this commercial item description until further notice.
