COMMERCIAL ITEM DESCRIPTION
BINDER, AWARD CERTIFICATE

This Commercial Item Description is approved by the Commisioner, Federal Supply Services, General Services Administration, for the use of all Federal agencies.

This description covers a binder which is used to contain and protect 10-1/8 x 12-1/8 award certificates.

1. Salient Characteristics

A. Design of binder. The binder opens as a book, and the inside of the back cover will have ribbon retainers at each corner to securely retain the certificate. The binder is intended for normal presentation.

B. Construction. The binder shall consist of front and back chipboard cover and a joining hinge area. When opened, the binder shall be at least 12-5/8 inches high and no more than 22 inches wide, including the 1/2 inch center hinge score. When closed, the binder shall be not less than 10-3/8 inches wide. The outside covering material shall be turned and glued over the edges to cover the margins inside the front and back cover boards and the hinged area. There shall be no cover board in the hinge area. The lining material shall extend over the inside of the back and front cover to a point that overlaps the turned edge of the outside covering. An inside hinge reinforcement strip of not less than 2-3/8 inch wide and glued under the lining shall be included and shall be the same color as the covering material.

C. Materials. The covering material shall be light weight, levant grain, regular finish, imitation leather. The inside lining shall be either Granada tag cloth backed by a sheet of white bleached chemical wood bond paper, or number 2 felt-finished text paper, such as Wausau felt. The front and back covers shall be of 0.100 inch $\pm$ 0.002 inch chipboard. The panels shall accommodate 12-1/8 inch x 10-1/8 inch award certificates.

D. Colors. The covering material shall be a dark blue near match to color chip 15044 of Federal Standard 595 (within a range of color chips 15042 to 15045) and the lining material shall be a white near match to color chip 37875 of Federal Standard 595 (within a range of color chips 37875 to 37886). Colors shall be tested in accordance with para. 2C.

E. Corner ribbon retainers. The inside of the back cover shall have four diagonally mounted, 11/16 inch ± 1/32 inch wide grosgrain white corner ribbon retainers. The opening side of the ribbon retainers shall be located no further than 3/4 of an inch from each of the four corners of the back lining sheet. The ends of these ribbon retainers shall be folded and glued under the back lining sheet.

F. Inside decoration. The inside of the front cover shall have a diagonally mounted, 7/8 inch ± 1/16 inch wide; red, white and blue grosgrain ribbon. This ribbon shall be located in the upper right hand corner(with the red stripe nearer the right corner). This ribbon shall be mounted such that,it is located 3/4 ± 1/16 inch in the horizontal and vertical direction from the corner of the front lining sheet. The ends of this ribbon shall be folded and glued under the front lining sheet.

G. The ribbons used shall be colorfast (see 2C).

H. Outside decoration. A gold-colored border shall be heat stamped on the outside of the front cover. The border shall consist of 3 lines which follow the outer edges of the binder. The lines shall appear straight (except for the corners) and concentric with the outside of the cover.

Line 1 shall be 1/16 inch ± 1/32 inch wide and located 5/8 ± 1/32 inch from the outer edge.

Line 2 shall be 1/16 inch ± 1/32 inch wide and located 1/8 ± 1/32 inch from the inside edge of Line 1.

Line 3 shall be 1/16 inch wide ± 1/32 inch and located 3/8 ± 1/32 inch from the inside edge of line 2.

Workmanship - Completed binders shall present a neat, finished appearance both inside and outside. The binders shall be free from defects which may affect their durability, serviceability, or appearance.

2. QUALITY ASSURANCE PROVISIONS

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the government. The Government reserves the right to perform any of the inspections set forth in the Commercial Item Description, where such inspections are deemed necessary to assure that supplies and services conform to the prescribed requirements.

Sampling and Examination. Each lot of binders shall be inspected for conformance to the requirements herein. Inspection shall be in accordance with MIL-STD-105 using the sampling plans specified below.

A. Visual and dimensional characteristics - Inspection Level S-3 with an Acceptable Quality Level (AQL) of 4.0 percent defective. The sample unit shall be one binder.

B. Packaging, Packing, and Marking -Inspection Level S-2 with an (AQL) of 4.0 percent defective. The sample unit shall be one fully prepared shipping container.

C. Sampling for testing - inspection level S-1 with an acceptable quality level (AQL) of 4.0 percent defective. The sample unit shall be one binder.

1.) Color shall be determined visually as a general match to the applicable color as determined in accordance with ASTM D 1729. If doubt remains regarding this general match, the color shall be inspected in accordance with ASTM D 2244, and a color variance of $\triangle$ E 1.75 maximum shall be considered acceptable.

2.) Colorfastness shall be tested for by using the following procedures.

There shall be no transfer ,bleeding or discoloration of colors, apparent to the naked eye after testing. The ribbon shall be tested as a part of an assembled binder. Two pieces of white blotting paper shall be cut to a size such that they could be slipped under the ribbon and contact the full length and width of the visible portion of the ribbon. One piece of the blotting paper shall be uniformly dampened with water and slipped under the ribbon to contact it as described above. The other piece of dry blotting paper shall be placed on top of the ribbon and held in place, until such time as the dry blotting paper becomes uniformly dampened. Then, carefully remove both pieces of blotting paper and examine them and the ribbon,and adjacent binder surfaces, for conformance. Allow the ribbon to fully air dry and, again, examine for conformance (see 1G).

3. Preparation for Delivery

Packaging, packing and marking shall be as specified in the contract or order. Packaging and packing shall be adequate to protect the binders from damage that will affect their durability, serviceability or appearance.

4. Regulatory Requirements

The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.
