COMMERCIAL ITEM DESCRIPTION

TRUNKS, GENERAL PURPOSE

The General Services Administration has authorized the use of this commercial item description.

1. SCOPE. This commercial item description covers general purpose trunks for wear by male and female military personnel.

2. CLASSIFICATION

2.1 Sizes. The trunks shall be available in sizes Extra-small (26-28); Small (30-32); Medium (34-36); Large (38-40) and Extra-Large (42-44). The finished dimensions shall be as stated in Table I.

NOTE: The sizes Extra-Small, Small, Medium, Large and Extra-Large may be abbreviated as XSM, SM, MED, LG and XLG.

3. SALIENT CHARACTERISTICS

3.1 Salient characteristics. The trunks shall be a boxer-style with a covered elastic waistband and a concealed drawcord, bound V-notch at outer leg seam, double-lapped and double-stitched seams, except for the notch binding and hem.

3.2 Material

3.2.1 Basic material. The basic material shall be a minimum of 50 percent cotton and the balance polyester, twill, 6.5 to 7.5 ounces per square yard. The material shall have minimum breaking strength of 170 pounds when tested in accordance with ASTM D 5034. The color shall be olive green. The dyed cloth shall show a minimum rating of 4 when tested for colorfastness to light, combined laundering and bleaching, (after 3 wash and dry cycles) and shall have an AATCC Chromatic Transference Scale rating of not lower than 2.5.

3.3 Elastic. The elastic webbing for the waistband shall be white, 2 inch wide cotton, polyester, or a cotton/ polyester blend. The weight of the webbing shall be 1.25 ounces per linear yard with a minimum thickness of 0.048 inch. The elastic shall comply with the finished measurements in Table I. Test procedure for weight shall be in accordance with ASTM D 3776 Opt. C and test for thickness shall be in accordance with ASTM D 1777.

Beneficial comments recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Defense Personnel Support Center, Clothing and Textiles Directorate, Attn: DPSC-FSSD, 2800 South 20th Street, Philadelphia, PA 19101-8419.

AMSC N/A FSC 8415

DISTRIBUTION STATEMENT A. *Approved for public release; distribution is unlimited.*

Check the source to verify that this is the current version before use.

3.4 Drawcord. The drawcord shall be of a proper length to accommodate the waist and hips. The braid for the tubular drawcord shall be cotton, polyester, or polyester/cotton in a solid or flat construction in an olive green shade and approximately 3/16 inch in diameter/width. The dyed cord shall have a minimum rating of 4 for colorfastness to light, laundering (after 3 wash and dry cycles), and crocking when tested in accordance with AATCC 16 and 16A, AATCC 61-test 3A, and AATCC 8 respectively, and shall have a minimum breaking strength of 75 pounds when tested in accordance with ASTM D 5034. The cord shall be knotted at each end.

3.5 Binding. The binding for the leg opening shall be of basic cloth, and shall finish 5/16 to 3/8 inch in width on the outside.

3.6 Thread. The thread shall be cotton or spun polyester, or cotton covered-polyester thread, dyed to an olive green shade. The cotton thread shall be 2, 3 or 4 ply, having a minimum breaking strength of 1.5 pounds. The polyester thread shall be 3 ply, having a minimum breaking strength of 2.2 pounds. The cotton-covered polyester thread shall be 2 ply or 3 ply, having a minimum breaking strength of 2.6 pounds. The testing for breaking strength shall conform to ASTM D 2256.

3.7 Label. A commercial-type printed cloth label is acceptable containing the contractor's name, contract number, size and National Stock Number (NSN) caught on the stitching of the commercial label. The commercial label shall include fiber and laundering information. The printing shall show fastness to laundering.

3.8 Label/tag. Each item shall be individually bar-coded with the type VIII, class 17 label/tag of DDD-L-20. This label/tag shall be located so that it is completely visible on the item when it is folded and/or packaged as specified and so that it causes no damage to the item.

3.9 Sizes and measurements. The finished trunk shall conform to the measurements in Table I.

Table I - Finished Measurements

Dimension	X-Small	Small	Medium	Large	X-Large	Tolerance
Waist-Relaxed 1/	10	11	12	13	14	± 1/2
Waist-Maximum 2/	18	19	20	21	22	± 1/2
Front Seam 3/	11-1/2	12	12-1/2	13	13-1/2	± 1/2
Back Seam 4/	15	15-1/2	16	16-1/2	17	± 1/2
Side Seam 5/	12-1/2	13	13-1/2	14	14-1/2	± 1/2
Inseam 6/	5	6	6-1/2	7	7-1/2	± 1/2
Thigh 7/	24-1/2	25-1/2	26-1/2	27-1/2	28-1/2	± 1/2

1/ Measure from folded side to folded side along top edge of waist.
2/ Measure from folded side to folded side along top edge of waist with waistband stretched taut.
3/ Measure from top of waist along front rise to the intersection of inseam.
4/ Measure from top of waist along back rise to the intersection of inseam.
5/ Measure from top of waist along side seam to bottom of leg at lower front corner of notch.
6/ Measure from leg opening to leg opening along crotch seam.
7/ Twice the measurement from the crotch seam to top of notch at side seam.

3.10 Workmanship. The finished trunk shall conform to the quality of product established by this document. The occurrence of defects shall not exceed the contractor's own quality assurance standards and the quality assurance standards defined by the technical data in the bid package.

4. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with Public Law 94-580; and in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE

5.1 Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the quality assurance practices. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for, under the provisions of the contract. Reliance on contractor quality assurance systems shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the government for acceptance comply with all requirements of the contract. The contractor shall furnish a certificate of compliance to ensure fiber content of basic cloth, elastic, drawcord braid and thread requirements have been met.

5.2 Visual examination. Each trunk shall be examined for the defects listed in section 5.3 in accordance with ANSI/ASQC-Z1.4.

5.3 Defects. Any hole, cut, tear, or color not as specified; any spot or stain (outside); thread ends not removed; label missing, incorrect, or illegible; measurement of components not as specified; bar code omitted or not readable by scanner, human-readable interpretation (HRI) omitted or illegible; bar code not visible on folded, packaged item; bar code causes damage to the item; fullness of elastic waistband not distributed evenly; drawcord caught in stitching other than center back seam; hem uneven, binding twisted or distorted; seam twisted, puckered, or pleated affecting appearance, threadbreaks not secured by bartacking, open seams, raw edges, buttonhole for drawcord omitted or constructed through outside of trunks, size of buttonhole not corresponding with drawcord diameter/width, any component or requirement not as specified any item not packaged in accordance with the contract or purcahse order.

5.4 Market acceptability criteria. The item offered must have been sold to the commercial market or to the Government, and the contractor shall certify and provide supporting doucmentation as to its serviceability and the long term (five years) availability of all necessary maintenance and logistics support parts and materials.

5.5 Warranty. The item offered shall include the standard warranty given to the commercial market beginning with the date of delivery of the individual items.

6. PACKAGING. The preservation, packing, and marking shall be as specified in the contract or purchase order.
