COMMERCIAL ITEM DESCRIPTION

MOP, WET, COTTON (WITH FIXED HANDLE)

The General Services Administration has authorized the use of this commercial item description by all Federal agencies.

1. SCOPE

1.1 Scope. This commercial item description (CID) covers a cotton mop with a fixed handle for use in swabbing floors and decks.

2. SALIENT CHARACTERISTICS

2.1 Materials.

2.1.1 Wood. The wood for the handles shall be hardwood, Douglas fir, or southern yellow pine. The wood shall be free of knots, shakes, wane, worm holes, heart center, rot, dote, and brash. The wood shall not have a cross grain or spiral grain sloping more than 1 inch in 15 inches (1 cm in 15 cm).

2.1.2 Yarn. The yarn for the mophead shall be not less than 4-ply bleached or unbleached cotton yarn, with a minimum breaking strength of 15 lbs (67 N), and measuring a maximum of 600 yds/lb (1220 m/kg). when tested in accordance with ASTM D 204.

2.1.3 Wrapping twine. The wrapping twine shall be either a cotton seine twine, 3-ply, 20 strands per ply, with a minimum breaking strength of 108 lbs (480 N) and measuring a maximum of 100 yds/lb (202 m/kg); or a 5 ply twine with a minimum breaking strength of 186 lbs (827 N) and measuring a maximum of 88 yds/lb (177 m/kg).

2.2 Design.

Figure 1

2.2.1 Handles. The handles shall be composed of wood in accordance with 2.1.1, 60 ±1/2 inches (152.4 ±1.3 cm) in length and 1 ±1/8 inch (2.5 ±0.3 cm) in diameter. The finished handles shall be straight, rounded at both ends and of uniform diameter. Each handle shall be sanded smooth and completely coated with a clear permanent waterproof coating.

2.2.2 Mophead. The swab shall consist of not less than 1-1/2 lbs (0.68 kg) of the cotton yard specified by 2.1.2. Individual strands shall not be less than 38 inches (96.5 cm) in length. The finished mophead shall measure not less than 17 inches (43.2 cm) in length and the ends of the strand shall be evenly trimmed.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Branch (7FXEE), 819 Taylor Street, Fort Worth, TX 76102

Check the source to verify that this is the current version before use.

2.2.3 Construction. The handle shall be notched and drilled as necessary to facilitate secure attachment of the mophead. The mophead shall be firmly attached to the handle with the twine specified in 2.1.3. The twine shall be secured to the handle by passing through a hole in the handle and secured in some manner. The finished mop shall have the mophead yarns distributed evenly around the handle. Sufficient turns of the twine shall be used to hold the mophead securely on the handle. The mopheads shall not show any looseness when the mophead is grasped and pulled and twisted while holding the handle secure.

2.3 Workmanship. The handle shall be clean, straight, of uniform diameter, and not showing any defects in wood quality, finish, or assembly. The mopheads shall be securely attached to the handle and shall not be tangled or show any dirt. The mops shall have no defects that affect appearance, function, or serviceability.

2.4 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met.

3. REGULATORY REQUIREMENTS.

3.1 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Product conformance. The products provided shall meet the salient characteristics of this CID, shall conform to the producer's own drawings, specifications, standards, and quality assurance practices, and shall be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

5. PACKAGING, PACKING AND MARKING

5.1 Packaging, packing and marking. The packaging, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Ordering data. Purchases should select the preferred options permitted herein and include the following information in procurement documents:

a. Title, number, and date of this CID.
b. The packaging, packing and marking desired

6.2 Referenced documents.

Copies of ASTM standards are available from ASTM, 100 Bar Harbor Dr., West Conshohocken, PA 19428-2959, (610-832-9500).

6.3 National Stock Numbers. NSN 7920-00-224-8726 is the only known item to reference this document.
