COMMERCIAL ITEM DESCRIPTION
BRUSHES, TYPEWRITER

The General Services Administration has authorized the use of this commercial item description by all Federal agencies and replaces Federal Specification H-B-681 which is canceled.

1. **Scope:** This Commercial Item Description covers brushes use for dusting typewriters which have either wire, wood or plastic handles.

2. **Salient Characteristics:**

Styles: I - Cone-Shaped, Wire Handle
II - Paintbrush- Shaped, Wood or Plastic Handle

Note: Filaments for both styles shall be either Bristle or Synthetic

2.1 Material. Materials used in the brushes shall be as specified and shall meet the requirements of this commercial item description. Materials not specifically defined shall be of a quality equal to those specified.

2.1.1 Handles (wood & plastic). The handle shall be of standard artist type. The handle used shall be of hardwood or plastic in accordance with normal commercial practice. The handle shall be smoothly finished in lacquer or paint, if hardwood material is used. If plastic handles are used in the manufacture process they shall be of polypropylene foam plastic of any color, and shall have a smooth finish.

2.1.2 Filler Material. The filler material shall be either bristle or synthetic filament. The bristle shall be stiff resilient hog bristle which shall be clean and sterilized. The synthetic filament shall be level, black or natural colored synthetic polyamide. The butt ends of the bristle or synthetic filament shall be vulcanized in hard rubber or set in a suitable setting compound which will not become brittle.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration, Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278.

Table I. Physical Properties		
Requirements (minimum physical)	**Style I.**	**Style II.**
Length, over-all	11.5 inch (29.21 cm)	11.75 inch (29.81 cm)
Brush Head:		
Length, over-all	3.75 inch (9.53 cm)	
Length, before taper	2.75 inch (6.99 cm)	
Diameter before taper	1.5 inch (3.81 cm)	
Diameter at tip	0.5 inch (1.27 cm)	
(end of taper)		
Bristle or Synthetic filament:		
Length clear of ferrule (min)		1.5 inch (3.81 cm)
Hold in ferrule (min)		0.5 inch (1.27 cm)
Width, brushing surface		1.0 inch (2.54 cm)
Weight of bristle (min)		
(finished brush)	0.109 oz (3.09 g)	.093 oz (2.64 g)
Weight of synthetic filament		
(finished brush)	0.140 oz (3.97 g)	0.109 oz (3.09 g)
Diameter of synthetic filament	0.012 inch (.031 cm)	0.012 inch (.031 cm)
Wire:		
Diameter, single strand	.072 inch (.183 cm)	
Ferrule:		
Depth (min)		1.625 inch (4.13 cm)
Thickness of metal (min)		0.006 inch (1.53 cm)
Diameter handle end outside		0.374 inch (.95 cm)
Handle:		
Length clear of ferrule		8.5 inch (21.59 cm)

Table II. Requirements Polypropylene Plastic		
Property 23 degrees Celsius (73 degrees Fahrenheit)	**Units**	**Property Value**
Density	grams/ml.	0.900 min./ 0.915 max.
Tensile Yield Strength	psi	. 4500 min.
Izod Impact Strength	ft. lb./in.	0.5 min.
Rockwell Hardness	R. scale	85 min./ 100 max.

2.1.3 Ferrule. The ferrule shall be of non-corrosive metal or of metal made corrosion-resistant. The handle end of the ferrule shall be round and the brush end oval. The ferrule shall be soldered, interlocked, or welded, or shall be a round seamless ferrule as specified. It shall be fastened to the handle by crimping or nailing.

2.1.4 Wire. The wire used for the twisted-wire brush shall be steel brush wire, or staple wire. The wire shall be corrosion-resistant, or zinc coated, and of the type normally used by the manufacturer.

2.1.5 Polypropylene. The physical requirements shall be limited to those specified in table II. Clean, unburned plastic material in the form of imperfect parts, spurs, runners, or other scrap of the same composition as the virgin material and produced in molding or finishing operations, may be reground and mixed with the virgin material.

2.1.6 Physical Properties. The brushes shall conform to the requirements specified herein and in accordance with Table I.

2.2 Construction.

2.2.1 Style 1 (Cone Shaped). The hog bristle or synthetic filament shall be securely spiral-wound within the twisted wire, which shall also form the handle of the brush. The hand end of the brush shall have a loop. The bristles or filaments shall be approximately parallel to each other and at an angle of approximately 90° to the wire. The bristles or filaments shall be evenly distributed in the brush head and shall have a taper at the brush-head tip.

2.2.2 Style 2 (Paintbrush-Shaped). The brush filler material (hog bristle or synthetic filament) shall be set in a ferrule attached to the handle. The ends of the brush heads shall be trimmed square and have a flare.

2.3 Workmanship. Workmanship shall be in accordance with standard commercial practice. The brushes shall be free from defects which may affect their serviceability or appearance.

3. Regulatory Requirements: The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. Quality Assurance Provisions:

4.1 Product Conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

5. **Packaging:** Preservation, packing, palletization and marking shall be as specified in the contract or order.

6. **Notes:**

6.1 **Source of Documents.** The following documents form a part of the Commercial Item Description to the extent specified herein. Unless otherwise indicated, the issue in effect on the date of invitation for bids or request for proposal shall apply:

6.1.1 Federal Acquisition Regulation (FAR) may be obtained from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

6.2 **National Stock Number (NSN) Listing .** The following is a list of NSNs assigned which correspond to this CID. The list may not be indicative of all possible NSNs associated with the CID.
