COMMERCIAL ITEM DESCRIPTION

TUBE, DRINKING (Plastic)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification L-T-785C, Type I, style 3 and Type II.

Salient characteristics:

The plastic drinking tubes (straws) shall be available in the following types as specified:

Type I - Rigid
Type II - Flexible

The type II drinking tube shall have a corrugated section, 1/2 inch minimum in length, which allows the tube to be adjustable by bending to any angle through an arc of approximately 130 degrees. The top of the corrugated section shall be located 1-3/4 inches plus or minus 1/4 inch from the top of the tube.

Material. The plastic shall be clean, sanitary, and free from toxic ingredients. The raw materials and finished drinking tubes shall conform to the applicable requirements of the Federal Food, Drug and Cosmetic Act as Amended: Title 21, CFR Subchapter B, Parts 170 to 199.

Color. The color of the tubes shall be either white or clear.

	Dimensions, (in inches)		
	Length	Inside Diameter	Wall thickness
Type I - Rigid	7-3/4 + 1/4, - 1/8	0.245 ± 0.01	0.007 ± 0.002
Type II - Flexible	7-3/4 ± 1/4	0.235 ± 0.035	0.007 ± 0.002

Softening. The tubes shall be suitable for use with hot liquids up to 180 degrees Fahrenheit, without distortion or impairment due to softening of the plastic.

Wrapping. The drinking tubes shall be individually wrapped or unwrapped, as specified.

Workmanship. The tubes shall be straight, clean, free from rough and uneven edges, circular in cross-section, and free from defects which may impair appearance and serviceability.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

Sampling.

Lot. All drinking tubes of the same type presented for inspection at one time shall be considered a lot for purposes of inspection.

Sampling for visual and dimensional inspection. A random sample of drinking tubes shall be selected from each lot in accordance with Military Standard MIL-STD-105, `SAMPLING PROCEDURES AND TABLES FOR INSPECTION BY ATTRIBUTES', and visually and dimensionally examined using special inspection level S-3, AQL 4.0 expressed in terms of percent defective.

Examination for preparation for delivery. A random sample of unit, intermediate and shipping containers (as applicable) shall be selected from each lot and examined for conformance with the preservation, packaging, packing, labeling and marking required in the contract or order. Samples shall be selected in accordance with MIL-STD-105, Inspection level S-2, AQL 4.0 expressed in terms of defects per hundred unit.

Regulatory requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistant with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing supplier's employees to undue hazards from recovered materials.

Unit of issue. One package containing four hundred tubes shall constitute one unit.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.
