COMMERCIAL ITEM DESCRIPTION

PACKING MATERIAL
(PLASTIC)

The General Services Administration has authorized the use of this commercial item description, for all federal agencies.

1. SCOPE AND CLASSIFICATION

1.1 Scope. This commercial item description covers plastic packing material for use with flanged connections, tanks, pump housings, valve stems and faucets used with petroleum derivate handling equipment.

1.2 Classification. Packing material shall be of the following types and sizes:

Type I - (Deleted), (use MIL-P-24377 for braided asbestos packing).
Type II - Plastic (virgin ptfe); solid type, without covering, lubrication or friction treatment.

Size - 1 - 5/32 inch diameter (0.396 cm)
Size - 2 - 1/4 inch diameter (0.635 cm)

2. SALIENT CHARACTERISTICS

2.1 Type II. Shall be constructed from twisted or extruded virgin, unsintered polytetrafluoroethylene (ptfe) resin, without covering, lubrication or friction treatment. Furnished in nominal cross-sectional diameters of 5/32 (0.396 cm) or 1/4 (0.635 cm) inch, as specified, 25 feet (7.62 meters) in length (minimum). The packing material shall be furnished in a self-dispensing can or box.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

FSC 5330

2.1.1 Dimensional tolerances. Cross-sectional diameter shall be within + or - 1/32 (0.79 cm) inch of stated nominal diameter. Length shall be minimum.

2.2 Metric Products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

2.3 Standard commercial product. The packing shall, as a minimum, be in accordance with the requirements of this CID and shall be the manufacturer's standard commercial product. A standard commercial product is a product which has been sold or is currently offered for sale on the commercial market through advertisements, manufacturer's catalogs, or brochures, and represents the latest production model.

3. REGULATORY REQUIREMENTS

3.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product offered for sale in the commercial marketplace. The government reserves the right to require proof of such conformance prior to the first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

5. PACKAGING

5.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T08:12Z
Check the source to verify that this is the current version before use.

a. Title, number and date of this commercial item description.
b. The size of packing material required.
c. The preservation, packing, and marking desired.

6.3 Part numbering. Material conforming with this commercial item description shall be identified by a part number configuration consisting of identification of a portion of the specification number and color. An example of the part number configuration is shown below. This part numbering system is intended for identification and cross-indexing of the item within the Federal cataloging system. Part numbers are not required to be placed on the product or container.

EXAMPLE:

AA11841
- ||___ Size 1 = 5/32 inch (0.396 cm)
- ||___ Size 2 = 1/4 inch (0.635 cm)
- |___ General commercial item description number

6.4 National stock numbers (NSNs). The following is a list of NSNs assigned which correspond to this CID. The list may not be indicative of all possible NSNs associated with the CID.

NSN	Type	Size
5330-00-085-1701	II	1
5330-00-085-1702	II	2

MILITARY INTEREST:

NONE: DoD has determined that no military activity has an official interest in this commercial item description.

PREPARING ACTIVITY:

GSA - FSS
