COMMERCIAL ITEM DESCRIPTION

DISINFECTANT-DETERGENT, GENERAL PURPOSE (IODOPHOR)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification O-D-1833.

Salient characteristics:

The product shall be a solution containing as active ingredients iodine complexed with a nonionic synthetic detergent.

EPA registration. The product shall be registered by the Environmental Protection Agency (EPA) as a disinfectant suitable for use in hospitals, clinics or any other medical-related facility. The product shall be labeled with directions for dilution and use. The product and its label shall comply with the Regulations for the Enforcement of the Federal Insecticide, Fungicide and Rodenticide Act (Code of Federal Regulations, Title 40, Parts 162-180). When used as directed, the product shall be non-staining.

Effectiveness. When used as directed on the label, the use-dilution solution, prepared with hard water containing 400 ppm hardness (as calcium carbonate), shall be:

bactericidal against	Staphylococcus aureus (ATCC No. 6538) Salmonella choleraesuis (ATCC No. 10708) Pseudomonas aeruginosa (ATCC No. 15442);
tuberculocidal against	Mycobacterium tuberculosis var. Bovis (BCG);
fungicidal against	Trichophyton mentagrophytes (ATCC No. 9533); and
virucida, against	Adenovirus Type 5-2 Herpes simplex Vaccina Influenza A_2.

Effectiveness shall be documented by data from test methods and conditions acceptable under the Environmental Protection Agency (EPA) "Efficacy Data Requirements" and "Confirmatory Data Requirements" DIS/TSS 1-10.

Color. The color of the product shall be amber. There shall be no colorants other than iodine in the product.

Effect on conductive flooring. When conductive flooring which meets the requirements of NFPA Standard No. 56A is washed with the use-dilution of the product and allowed to dry without rinsing, it shall still meet the conductivity requirements of NFPA Standard 56A. The issue of NFPA Standard 56A in effect on the date of the solicitation shall be used to determine compliance.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing, and marking. The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

Notes: Purchasers should specify in the contract the size containers of the product required.

Check the source to verify that this is the current version before use.

Bid evaluation. Bids shall be evaluated on the basis of price per gallon of use-dilution solution obtainable. This is calculated as follows:

$$\text{Price per gallon of use-dilution solution} = \frac{A \times B}{C}$$

Where: A = bid price per container of product,
B = ounces of product needed to make one gallon of use-dilution solution,
C = ounces of product per container.

Bidders shall state on their bid the amount of product (in ounces) required to make one gallon of use-dilution solution as stated on the label. Where more than one use-dilution is stated on the label, the use-dilution with the largest quantity of product per gallon of use-dilution solution shall be used in determining the cost.

Intended use. The iodophor disinfectant-detergent covered by this commercial item description is intended to be used to disinfect hard surfaces such as floors, washable walls, metal furniture, etc. in cafeterias, locker rooms and sick rooms. The product is a cleaner as well as a disinfectant, however to assure adequate disinfection gross filth and heavy soil should be removed prior to disinfection. DO NOT MIX THIS PRODUCT WITH ANY OTHER SOAP OR CLEANING PRODUCT. Soaps and alkaline cleaning products reduce or destroy its disinfectant strength. READ AND FOLLOW LABEL DIRECTIONS.

NFPA Standard 56A is available from the National Fire Protection Association, 60 Batterymarch Street, Boston, MA 02110.
