COMMERCIAL ITEM DESCRIPTION

SHEATH, PEN, AND PENCIL, POCKET (PLASTIC)

The General Services Administration has authorized the use of this commercial item description.

1. SCOPE: This commercial item description covers pocket sheaths of one size and style. The pocket sheath is intended for use as a holder and protector when carrying pens, pencils, scales and equipment in shirt pockets.

2. SALIENT CHARACTERISTICS:

2.1. The dimensions and features of the pocket sheath shall conform to Figure 1.
The color and sheath shall be clear with a matte finish or white with a plain or embossed finish.

2.2. The sheath material shall be homogenous and free of surface defects and uniform in appearance.

2.3. The sheath shall be constructed of flexible plastic 0.3556mm ± 0.0254mm (0.014 +/- 0.001 inches thick) and be comprised of no more than three pieces of plastic, with one piece each composing the front, back and downward projection front flap.

2.4. All seams shall be straight, uniform and adequate to insure flexibind strength. All cuts shall be straight, uniform and free of burrs and sharp corners.

2.5. The sheath shall pass the brittleness test when tested as specified in 4.2.

2.6 Workmanship. The sheath shall be free from defects that affect serviceability or appearance or may cause injury to the end user.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to General Services Administration Federal Supply Service, Engineering Branch, 26 Federal Plaza, New York, NY 10278.

3. REGULATORY REQUIREMENTS:

3.1 The offeror is encouraged to use recovered materials in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

3.2 Certification. The contractor shall certify that if polystyrene is used in the manufacture of this item, the polystyrene shall contain a minimum of 25 percent Postconsumer Recovered Materials in accordance with the 40 Code of Federal Regulations Part 247, Comprehensive Guideline for Procurement of Products Containing Recovered Material; Final rule. The government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provision of the contract.

4. QUALITY ASSURANCE PROVISIONS:

4.1 Suppliers are encouraged to use quality control (QC) techniques that exhibits control over their processes (e.g. Statistical process Controls). These techniques shall ensure quality levels equal to, or greater than, those cited in the applicable technical document or herein. For those product characteristics which are controlled by such a method, requirements for end item inspection or test may be considered to have been met. End item inspection / testing may be used by the offeror, or the Government representative, as a means to determine the effectiveness of the inprocess quality controls. Inprocess controls shall not be substituted for end item performance testing, unless it can be demonstrated that there exists a direct correlation between the process and product performance, such that end item performance testing is obviated.

For those characteristics for which there are no such controls, or for end item performance test, lot by lot sampling for inspection / shall be required. Sampling shall be in accordance with the American National Standards Institute (ANSI) / American Society of Quality Control (ASQC) ANSI/ASQC Z1.4 1993, Sampling Procedures and Tables for Inspection by Attributes. For Visual and Dimensional inspections the level shall be S-2 with an Acceptable Quality Level (AQL) of 4.0 Percent Defective. The sample unit shall be one sheath. For Tests (see below) , the Inspection Level shall be S-2 with an Acceptable Quality Level (AQL) of 4.0 percent defective, the sample unit shall be one sheath.

4.2 Brittleness Test
Test the specimen in accordance with ASTM D1790-90.
Note: In lieu of the above test, material data traceable by lot from the material manufacturer to the end fabricator may be used. The lower temperature limit shall be zero degrees Fahrenheit.

5 Packaging:
Packaging , packing and marking shall be specified in the contract or order.

6. Notes:

6.1 Applicable Documents. Issues of the applicable documents in effect on the date of invitation for bid or request for proposal form a part of this document to the extent specified herein. documents referenced herein:

6.2 40 code of Federal Regulations Part 247.
copies can be obtained by calling the 202-783-3238 or writing , Government Printing Office, Washington DC. When ordering ask for Title 40, Part 190-250 Stock # 869-013-00-146-0.

6.3 Application for copies of the ASTM test methods should be addressed to the: American Society for Testing and Material; 1916 Race Street, Philadelphia, PA 19103.

Application for copies of ANSI/ASQC Procedures should be addressed to: ANSI/ASQC Z1.4-1993, American Society of Quality Control, P.O. Box 3005, 611E Wisconsin Avenue Milwaukee, WI 53201-4606

6.4 Ordering Information. Purchasers shall select the required options permitted herein, and include the following information in procurement documents:

A. Title, number, and date of this commercial item description.
B. Purchasers shall specify packaging, packing, and any special marking.
C. Purchasers shall specify identification marking, if other than required.
