COMMERCIAL ITEM DESCRIPTION

GAGE, THICKNESS, OPHTHALMIC LENS

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers one type of gauge suitable for use in measuring the thickness of ophthalmic lenses.

Salient characteristics:

The style and design shall conform to Figure 1. The gage shall be a degree measuring type graduated in millimeter with vernier scale.

Shall have adjustable point and locking screw.

Gage shall be capable of measuring ophthalmic lens thickness from 0 to 13 millimeters. Scale shall be graduated 1 millimeter increments and vernier in tenths of a millimeter. Jaw depth shall allow measurements to be made to the center of a 71 mm diameter lens.

The handles shall be made of 1010 carbon steel, having a Rockwell hardness of 90 t 92 "B" scale. Finish shall be either satin or nickel plated.

The quadrant shall be made of high leaded brass, composition 353, 342, 360 or 377 of Federal Specification QQ-B-626. The temper shall be hard.

The spring shall be made of high carbon steel such as 1050, 1080, 1095 or alloy steel such as 6150 or 9254, properly tempered for the application.

Each instrument shall be legibly and permanently marked with the name or trademark of the manufacturer.

Workmanship. The gauge shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One gauge, as specified, constitutes one unit.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U. S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations. Intermediate and exterior package quantities and labeling and marking shall be as specified in the contract and/or order.
