PAGE 34

Add the following paragraph:

"4.5.6 Shorting bar resistance. The resistance of each shorting bar circuit shall be measured between test points TP2 and E3, using an approved ohmmeter. Observation shall be made for compliance with the requirements of paragraph 3.12."

* Add new paragrph:

"4.5.7 Inspect of gap between projectile body and base. Gap shall be inspected using an approved feeler gage as specified on drawing 9215220. The feeler gage shall be cleaned with a clean dry rag immediately after each inspection such that the gage is free of any base/body gap sealant. No solvent or other substance other than a clean dry rag shall be used to clean the gage. The gap between the projectile body and base shall be inspected within fifteen (15) minutes after the sealant is applied to the shoulder of the base."

The margins of this amendment are marked with an asterisk or vertical line to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
