INCH-POUND
MIL-M-24784/4(SH)
6 September 1994

ASSOCIATED DETAIL SPECIFICATION

MANUAL, COMMERCIAL OFF-THE-SHELF (COTS)
EQUIPMENT REQUIREMENTS

This specification is approved for use by the Naval Sea Systems Command, Department of the Navy, and is available for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope. This specification covers the review of commercial off-the-shelf (COTS) manuals (see 6.5.1) and establishes requirements for supplemental data for COTS manuals. This specification is intended as a guide for reviewing personnel to determine the adequacy of existing COTS manuals, and for specifying additional data required to supplement an existing COTS manual. The acceptability of a COTS manual and the need for supplemental data shall be dependent upon the Governments usage philosophy for each particular item of equipment.

1.2 Application. This specification is applicable to manuals that support equipment designed and manufactured for commercial use. It applies to manuals that support commercial equipment used in a commercial or military environment. This specification is not applicable for acquisition of manuals that support developmental items.

2. APPLICABLE DOCUMENTS

2.1 Government documents.

2.1.1 Specifications, standards, and handbooks. The following specifications, standards and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the issue of the Department of Defense Index of Specifications and Standards (DODISS) and supplement thereto, cited in the solicitation (see 6.2).

Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: Commander, SEA 03R42, Naval Sea Systems Command, 2531 Jefferson Davis Hwy, Arlington, VA 22242-5160 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.

AMSC N6946 AREA TMSS
DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

SPECIFICATIONS

MILITARY

MIL-P-38790 - Printing Production of Technical Manuals: General Requirements For.
MIL-M-24784 - Manual, Technical: General Acquisition and Development Requirements.
MIL-M-24784/1 - Manual, Technical Change Package Requirements.
MIL-M-24784/2 - Manual, Technical Revision Requirements.

(Unless otherwise indicated, copies of federal and military specifications, standards, and handbooks are available from the Standardization Documents Order Desk, Building 4D, 700 Robbins Avenue, Philadelphia, PA 19111-5094.)

2.1.2 Other Government documents. The following other Government documents, drawings and publications form a part of this document to the extent specified herein. Unless otherwise specified, the issues are those cited in the solicitation.

REGULATIONS

DEPARTMENT OF DEFENSE

DFAR - Subpart 27.4 - Defense Federal Acquisition Regulation: Technical Data, Other Data, Computer Software, and Copyrights.
DFAR - Part 52 - Defense Federal Acquisition Regulation: Solicitation Provisions and Contract Clauses.

HANDBOOK

Cataloging Handbook H4/H8 Commercial and Government Entity (CAGE).

PUBLIC LAW AND EXECUTIVE ORDER

Public Law 91-596.
Executive Order 12196.

(Application for copies should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402).

2.2 Order of precedence. In the event of a conflict between the text of this document and the references cited herein (except for associated detail specifications), the text of this specification shall take precedence. When a generic requirement is in conflict with a unique requirement from the governing associated detail specification, the unique requirement shall take precedence. Nothing in this specification, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

Check the source to verify that this is the current version before use.

3. REQUIREMENTS

3.1 General. A copy of the existing COTS manual shall be required for review by the Government [see Manual Evaluation Checklist (Appendix 4A) and Acceptability Certification (Appendix 4B)] to determine whether or not the manual proves acceptable or nonacceptable. An acceptable commercial manual shall contain the data listed in the following subparagraphs, arranged in a sequence that provides continuity. If a manual covers different models, series, or configurations of the equipment, the differences shall be clarified by the use of different data sheets, errata sheets, change sheets, or be included in the text or table(s) in the manual. The manual shall precisely reflect the hardware configuration of the equipment or system acquired by the Government. The amount of data required shall be determined by the complexity or simplicity of the equipment and the usage philosophy of the Government for a particular item of equipment. Usage philosophy includes installation plans, maintenance concept, operational environment, and sparing support approach. The manual shall consist of all data (volumes, folders, inserts, specification sheets, and other documents) required for operation and maintenance of the equipment or system as determined by the Government.

3.1.1 Style and format. The existing COTS manual shall meet the following requirements:

3.1.1.1 Comprehensibility and readability. The text and text-graphics combination of the manual shall be at the level of understanding of the intended user. The reading grade level shall be that of the intended user.

3.1.1.2 Arrangement. The overall arrangement of content, even though vendor unique, shall be organized in a manner sufficient to provide continuity of descriptions, processes, and procedures.

3.1.1.3 Legibility. The entire publication shall be clear and easily read. Text shall be no smaller than 8-point (1 point = 1/72 inch). Parts lists shall be no smaller than 6-point. Lettering on diagrams shall be no smaller than 6-point.

3.1.1.4 Size. Manuals size shall be no smaller than 4 by 5 1/2 inches and no larger than 17 by 11 inches.

3.1.1.5 Safety. The manual shall include safety information that is consistent with the safety standards established by the Occupational Safety and Health Act (OSHA), Public Law 91-596, and Executive Order 12196.

3.1.1.6 Warnings, cautions, notes. The manual shall contain warnings, cautions, and notes similar to those specified in Appendix D of MIL-M-24784.

3.1.1.7 Federal protection standards. Information concerning the use, transportation, handling, storage or disposal of fuel, toxic or hazardous substances, chemicals, ordnance, and munitions shall be clearly stated and shall be consistent with Federal Protection Standards.

3.1.1.8 Illustrations. The manual shall contain illustrations similar to those specified in MIL-M-24784 to support the text. The illustrations shall be integrated with the text or their location shall be referenced in the text.

Source: https://assist.dla.mil -- Downloaded: 20260-20T02:18Z
Check the source to verify that this is the current version before use.

3.1.1.9 Maintenance. The manual shall reflect the maintenance philosophy of the hardware as established by the manufacturer, and the maintenance philosophy shall be such that it can be applied by the intended Government user.

3.2 Content requirements. Except as determined otherwise by the Government, acceptable commercial off-the-shelf manuals shall contain, but not be limited to the following:

(a) Front matter: Cover or title page, table of contents, and safety precautions.
(b) Introduction.
(c) Preparation for use.
(d) Installation instructions.
(e) Principles of operation (at the level required to support maintenance).
(f) Operating instructions.
(g) Maintenance and servicing instructions (preventive and corrective).
(h) Reprogramming.
(i) Preparation for shipment.
(j) Storage.
(k) Parts list.
(l) Illustrations and diagrams.
(m) Overhaul instructions (as applicable).

3.2.1 Front matter.

3.2.1.1 Cover title page. The manual shall have a cover, title page, or first page showing the date the manual was issued, revision designator (if applicable), the manufacturer's identification name and address, the equipment name, the manufacturer's model designation, and serial or identification numbers for the equipment covered. See Federal Acquisition Regulations (FAR) concerning contract numbers and markings on publications.

3.2.1.2 Table of contents. A manual containing more than 25 pages shall include a table of contents. It shall list all parts, chapters, sections, and paragraphs in the order or presentation and with the same title used in the text. It shall include a list of illustrations and a list of tables if the manual contains more than 10 illustrations or tables.

3.2.1.3 Safety precautions. The manual shall contain safety precautions where hazards, such as high voltage, may be present during installation, operation, or maintenance of the equipment. Health hazards, such as electrostatic discharge, radio frequency radiation, radioactive materials, the presence of poisonous fumes or explosive gases, and the depletion of oxygen from the air in a closed environment, shall be preceded by a warning or caution at the point in the procedure where the hazard is likely to be encountered. See Appendix D of MIL-M-24784 for similar requirements.

3.2.2 Introduction. The manual shall contain an introduction, or introductory material, containing the following:

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

(a) Purpose and functions.
(b) Capabilities.
(c) Performance characteristics.
(d) Description (equipment model, dimensions, weight, volume, and center-of-gravity, when applicable).
(e) Power and utility information.
(f) Environmental information.
(g) List of items furnished.
(h) List of additional items required for operation and maintenance, but not supplied with equipment.
(i) Tools and test equipment.
(j) Warranty information.
(k) Shipping and handling precautions.
(l) Storage data.

3.2.3 Preparation for use. The manual shall contain unpacking and assembling instructions. Inspection for in-shipment damage and instructions on how to handle damaged equipment shall be included.

3.2.4 Installation instructions. Special installation instructions shall include requirements for foundations, ventilation, clearances, plumbing and electrical connections, mountings, wiring runs, initial lubrication, and alignment as applicable.

3.2.5 Principles of operation. The manual shall contain principles of operation information at the technical level necessary for the intended user.

3.2.6 Operating instructions. Operating instructions shall include:

(a) Illustrations and explanations of the uses and functions of all controls and indicators (including settings and readings, if applicable).
(b) Initial adjustments and control settings.
(c) Start up procedures.
(d) Normal operation.
(e) Operation under emergency, adverse, or abnormal conditions (if different from normal operating procedures).
(f) Shut down procedures.
(g) Emergency shutdowns (if required).
(h) Interface instructions.

3.2.7 Maintenance and servicing instructions (preventive and corrective). Instructions shall include a list of test equipment, special tools, and materials needed for maintenance and service. This list shall include nomenclature, part and model number, application, range, and accuracy. Instructions or illustrations shall explain or show how test connections are made. Actions and normal indications shall be defined for each test.

3.2.7.1 Cleaning and lubrication. Periodic cleaning and lubrication information, covering types of cleaning agents or lubricants (commercial or military) shall be included. Frequency of lubrications and intervals (monthly, quarterly, and semiannually, hours of operation, mileage, and so forth) shall be presented. Lubrication points and required amounts shall be identified. When

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

applicable pictorial format for lubrication instructions shall be included to clearly illustrate location of each lubrication point. Cleaning and lubrication during repair, replacement, or reassembly shall be included in the instructions covering those actions. (Refer to 3.2.7.5.)

3.2.7.2 Performance verification. Instructions for calibration of the Test, Measurement, and Diagnostic Equipment (TMDE) needed to restore the equipment to serviceable accuracy (performance verification) shall be provided. These instructions shall be complete step-by-step procedures which will enable the user to check the accuracy of the indications or readings. The location of test connections and the values expected at these points shall be included. Adjustment of built-in self test features shall be included when applicable. Data shall include the recommended frequency of adjustments and verification checks required. When appropriate, the data shall allow for the accomplishment of these adjustments by utilizing a wiring harness, test points, and so forth, that are accessible from outside the equipment case. Data shall include a list of the additional equipment, such as temperature, vacuum, pressure, hydraulic or pneumatic gauges, decade boxes, voltmeters, signal generators, required to accomplish the verification. The listing shall show methods of use or application, range of scales, and specific minimum tolerances or percentages of accuracy.

3.2.7.3 Inspection. Instructions, including scheduling, for inspection of equipment for damage and wear shall be provided with emphasis on allowable service limits such as wear, backlash, end play, balance, and length and depth of scoring. Allowable service limits are acceptable wear tolerances which will not impair performance. They are not to be confused with manufacturing tolerances.

3.2.7.4 Troubleshooting. Malfunctions that might occur during operation of the equipment shall be identified. Troubleshooting data, and fault isolation techniques shall include:

(a) the indication or symptom of trouble,
(b) the instructions necessary, including test hookups, to determine the cause, and
(c) action or reference to action to restore the equipment to operating conditions.

Applicable information shall be in chart form, logic tree form, in tabular format with appropriate headings, or as logic, block, or schematic diagrams. The established maintenance concept for the associated equipment shall dictate the depth of the troubleshooting such as, localizing a defective circuit card assembly and ending the action by removing and replacing the circuit card assembly as contrasted with the carrying out the troubleshooting process on the defective circuit card assembly to determine the specific piece part that is defective.

3.2.7.5 Disassembly, repair, replacement, and reassembly. Sequential instructions for disassembling, repairing, replacing, and reassembling the equipment shall be provided. Test, adjustment, and check-out data after reassembly shall be provided. Illustrations, including exploded views, shall be used as necessary to support each of these functions.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

3.2.8 Reprogramming. A description of reprogrammable memory, reprogramming theory, program setup, program confidence check-out, program loading, and programming procedures shall be provided for equipment having a reprogrammable memory.

3.2.9 Preparation for shipment. Manuals shall contain instructions for the following, as applicable:

(a) Disassembly, removal, and separate packaging of electrostatic sensitive discharge devices or fragile components.
(b) Use of reusable shipping cases or containers.
(c) Special cradles.
(d) Mounting.
(e) Securing.
(f) Covering and preservation.
(g) Precautions for shipment.
(h) Shipment and unloading.

3.2.10 Storage. Manuals shall contain instructions for the following:

(a) Indoor and outdoor storage.
(b) Temperature and other environmental limitations.
(c) Storage facilities.
(d) Dunnage.
(e) Ventilation.
(f) Revetting.
(g) Drainage.
(h) Staking.
(i) Grounding.
(j) Covering.
(k) Preservation.

3.2.11 Parts list. The manual shall include a parts list containing positive identification of parts for support of the equipment and shall include actual manufacturer or vendor part numbers or generic description necessary to obtain replacement parts.

3.2.11.1 Parts list illustrations. Clear and legible illustrations shall identify component parts and parts relationships.

3.2.11.2 Parts listings. Part numbers and part names shall be shown on illustrations or separately listed. When the illustrations do not contain part numbers and part names, both the illustrations and separate listings shall show either index, reference, or key numbers which will cross-reference illustrated parts to listed parts. The parts list shall cite the actual manufacturer or vendor and their part number or generic description. Parts in the listings shall be grouped by assemblies, subassemblies, and modules with the parts identified to the assembly from which they are components.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

3.2.11.3 Common commercial parts. Common commercial hardware and items that are not of special design, such as bolts, washers, nuts, screws, fittings, keys, hinges, wire, cable, gasket material, tubing, hose, and so forth, and are obtainable from a wide range of sources, shall be identified by part number or the notation "Commercial" instead of a part number. The part name (nomenclature or description) shall be complete enough to facilitate substitution of equivalent items from existing Government stock as in the example below. Examples:

Figure and Index No.	Part No.	Part Name (Nomenclature or Description)
2-4	Commercial	NUT, Hex head, plain steel 1/4-20 UNC-3B.
2-5	Commercial	WIRE, Electrical, copper, tin plated, No. 14 AWG, 19 strands of No. 27 AWG, 0.250 in. dia.

3.2.12 Operational and maintenance illustrations. Manuals shall contain illustrations (line drawings, photographs or halftones) for locating and identifying all components significant to operation and maintenance and to show configuration and parts relationship for removal and disassembly procedures. Photographs (prescreened) shall be detailed and sharp, free of heavy shadows, distorted objects, cluttered foregrounds or backgrounds, and give good contrast from white, middle tones, and black. Free hand sketches shall not be acceptable.

3.2.12.1 Diagrams. As applicable, the following diagrams shall be included in the manual:

(a) Simplified functional block.
(b) Locator.
(c) Piping.
(d) Plumbing.
(e) Hydraulic.
(f) Schematic.
(g) Electrical.
(h) Digital.
(i) Other, as necessary.

3.2.12.2 Symbols. Symbols used on illustrations and diagrams shall be standard or common to the trade or commodity. Where nonstandard symbols are used, explanations shall be provided.

3.2.13 Overhaul instructions. When applicable, the manual shall include overhaul instructions to return the equipment to mission capable condition. As a minimum, the instructions shall include the following:

(a) List of support equipment, special tools, and facilities required.
(b) List of mandatory parts.
(c) Preshop analysis, as applicable.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

(d) Step-by-step procedures for performing all functions including disassembly, removing, replacing, diagnosing, installing, repairing, assembly, in-process testing, adjusting, and inspecting.
(e) Final tests to ensure satisfactory performance of the equipment or system overhauled.

3.3 Supplemental data. After the Government determines that the commercial off-the-shelf manual meets the acceptability criteria of 3.1 and 3.2, and that supplemental data (see 6.5.2) is required, supplemental data shall be developed in contractor format and in accordance with the requirements on the Content and Format Selection Summary Sheet (Appendix 4C) or other applicable contractual document. This data shall supplement the basic COTS manual and shall not substantially duplicate any data contained in the existing COTS manual.

3.3.1 Identifying technical publication sheet. Unless otherwise specified, an Identification Sheet for Commercial Manuals (examples are shown on figures 4-1 and 4-2) shall be tailored to reflect only that information applicable to the acquisition. The appropriate distribution statement, disclosure notice, and authority notice shall appear in accordance with MIL-M-24784, as specified by the Government. Other pertinent data shall be inserted by the contractor as provided by the Government.

3.3.2 Style, format, and form.

3.3.2.1 Style and format. Unless otherwise specified, supplemental data shall be in contractor style and format.

3.3.2.2 Form. Supplemental data shall be a separately numbered and bound manual (except as specified in 3.3.2.3) and shall be in one or more of the following forms as specified by the Government:

(a) Review draft copy (RDC).
(b) Preliminary technical manual (PTM).
(c) Final reproducible copy (FRC).
(d) Photolithographic negatives (see MIL-P-38790).
(e) Digitized media.
(f) Direct image (see MIL-M-38790).

3.3.2.3 Insert pages. If supplemental pages are less than 50 percent of the existing manual and can be inserted into the existing COTS manual (that is the manual is not permanently bound), supplemental data may be developed as change pages (insert pages, appendix pages, and so forth) and issued as a change package.

3.3.3 Content. Content of the supplemental data shall be as specified on the applicable Content and Format Selection Summary Sheet (Appendix 4C) or other contractual document provided by the Government. Unless otherwise specified, the data shall be presented in accordance with the requirements specified and in the following order:

(a) Cover and title page (see 3.2.1.1).
(b) List of effective pages (see 3.3.10).
(c) Safety precautions.

Source: https://assist.dla.mil -- Downloaded: 20260-20T02:18Z
Check the source to verify that this is the current version before use.

(d) Table of contents.
(e) Reporting of errors statement (see MIL-M-24784).
(f) Maintenance forms and records.
(g) Administrative storage.
(h) Destruction of military material to prevent enemy use.
(i) Lubrication instructions (see 3.3.11).
(j) Preventive maintenance checks and services.
(k) Spare and repair parts (see 3.3.12).
(l) Recommended changes, user activity comment sheet, or technical manual deficiency report applicable to the particular service, as provided by the Government.
(m) Other requirements as specified (when using manuals evaluation checklist as a guide, other required data may be indicated thereon).

3.3.4 Copyrights and proprietary information credit line. Technical manuals shall not contain copyrighted material except as specified in the Federal Acquisition Regulations and Defense Federal Acquisition Regulation Supplement. When copyrighted material is to be included in a technical publication, the developer shall obtain prior written permission from the copyright owner or authorized agent for its use. The signed, written permission shall be delivered together with the final reproducible copy. The written permission shall contain a statement declaring whether or not a copyright credit line is required. When it is necessary to include copyright and proprietary material, it shall be clearly identified and the following warning statement shall be included on the title page:

"This document contains copyright or proprietary materials. Infringement of copyright or proprietary material may violate existing Federal laws and statutes and result in criminal penalties, imprisonment, or removal from office."

3.3.5 Warranty information. If applicable, the COTS manual supplemental data shall contain warranty information pertinent to the equipment covered. It shall include data such as duration of warranty and serial numbers of equipment covered. If warranty is covered separately or in another available document, reference shall be made to that document.

3.3.6 Advertising. Except for the identity of the manufacturer or contractor, supplemental data shall not contain advertising.

3.3.7 Equipment and model coverage. Only equipment and models, accessories, and components specified shall be covered in the supplemental data.

3.3.8 End item identification. Unless otherwise specified, the federal item name, national stock number (NSN), part number, model number, and applicable contract number shall be overprinted on the cover or the first page of the manual.

3.3.9 Publication number and date. The publication number, assigned by the Government, and date shall be overprinted on the cover and first page of the supplement in accordance with MIL-M-24784 or as specified by the Government.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

3.3.10 List of effective pages. A list of effective pages that will include the basic COTS manual and the supplemental data, shall be in accordance with MIL-M-24784.

3.3.11 Lubrication instructions. If required, separate lubrication charts or instructions shall be included in the manual. All lubricants, fluids, and associated products identified in the manual, supplemental data, or separate lubrication chart must have a Government identifier, (military specification number, NSN, and so forth) which identifies the product beyond the product name and provides the user with requisitioning information.

3.3.12 Spare and repair parts. If required, the COTS manuals shall be supplemented with applicable spare and repair parts breakdown information. Supplemental data shall not duplicate data in the existing manual. The parts breakdown data shall be presented in contractor format and in the following order:

(a) Introduction (Section I).
(b) Parts list and illustrations (Section II).
(c) Special support equipment list and illustrations (Section III).
(d) Cross-reference indexes (Section IV).

3.3.12.1 Introduction - Section I. The introduction shall contain how-to-use information. The introduction shall explain the use of the parts equipment breakdown listings and the reference index(es). The column headings, symbols, abbreviations, codings, notes, and other data used shall be explained in detail.

3.3.12.2 Parts list and illustrations - Section II. All spare and repair parts shall be listed by assembly. They shall be shown on the associated parts breakdown illustration. Unless otherwise specified, these assembly illustrations and parts lists shall be arranged in top-down breakdown (next higher assembly) sequence.

3.3.12.3 Illustrations. Illustrations shall be detailed line drawings and identify all repairable or replaceable parts. Each assembly illustration (or set of illustrations, if multi-sheets) shall precede the associated parts listing. Exploded views shall be provided when specified. Figures shall be numbered in ascending numerical sequence, and each item illustrated shall be assigned an item or index number. Item or index numbers shall be arranged in numerical clockwise sequence. Leader lines, with arrowheads, shall be drawn from each of the callouts (item or index no.) to the items.

3.3.12.4 Parts list. The parts list for the associated illustration shall bear the same title as the illustration and shall contain the columns listed:

(a) Column (1), FIGURE-ITEM NO.
(b) Column (2), SMR CODE.
(c) Column (3), CAGEC (Commercial and Government Entity Code) per H4/H8.
(d) Column (4), PART NO. (actual manufacturers, vendors part, drawing, and military specification number).
(e) Column (5), DESCRIPTION AND USABLE ON CODE (UOC) (item name and provisioning nomenclature (if required) and UOC (when more than one model or configuration is covered in the manual)).
(f) Column (6), QTY (amount or number per figure or assembly)

Source: https://assist.dla.mil -- Downloaded: 2026l0-20T02:18Z
Check the source to verify that this is the currentversion before use.

3.3.12.5 Special support equipment - Section III. This section shall include special tools, test equipment, and special support equipment. Each tool or equipment shall be illustrated and a list prepared in the same format as for the parts list in section II. The basis of issue shall be stated for each kit or set on the last line of the Description and Usable on Code column. The basis of issue (BOI) provided by the Government, shall state the quantity per unit, division, company (CO), battery or other organizational structure or division, for example, BOI: 1 PER LETTERED CO. Items listed as part of a kit or set shall be shown as quantity per kit or set as applicable, and the BOI for the kit or set shall be stated for the kit or set line item entry.

3.3.12.6 Cross-reference indexes - Section IV. Unless otherwise specified, this section shall include the following indexes in the order presented:

(a) Figure and item number index. This index, keyed on figure and item number in numerical sequence, shall cross-reference applicable CAGEC number, part number, and the National Stock Number.
(b) Part number index. This index shall key on part number in alphanumeric sequence and reference applicable CAGEC, NSN, figure, and item number.
(c) National stock number (NSN) index. This index shall list the NSN by ascending National item identification number (NIIN), (the last nine digits). The NSN shall reference the applicable figure and item number.
(d) Reference designator index. When figures or illustrations, such as electronic circuit diagrams, use reference designators in lieu of item numbers, an index listed by reference number in alpha numerical order shall cross-reference the applicable figure and item numbers.
(e) Original equipment manufacturer (OEM) or true vendor. When applicable, the OEM part number shall be cross-referenced to true vendor part number. The part numbers shall be in alpha numeric sequence.

3.4 Accuracy. Essential corrections or changes to the manual shall be included in the supplemental data.

3.5 Changes and revisions to supplemental data. When the Government determines that changes or revisions are required to correct or update supplemental data, the data shall be changed or revised. Unless otherwise specified, changes and revisions shall be final reproducible copy and in the same style (including type style and point size) and format as the original supplemental data.

3.5.1 Change packages. When specified (see 6.2), change packages shall be in accordance with MIL-M-24784/1.

3.5.2 Revisions. When specified (see 6.2), revisions shall be in accordance with MIL-M-24784/2.

Source: https://assist.dla.mil -- Downloaded: 20260-20T02:18Z
Check the source to verify that this is the current version before use.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements (examinations and tests) as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in this specification where such inspections are deemed necessary to ensure supplies and services conform to prescribed requirements.

4.1.1 Responsibility for compliance. All items items shall meet all requirements of section 3.3 and 5. The insepction set forth in this specification shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirements in the specification shall not relieve the contractor of the responsibility of ensuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling in quality conformance does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to accept defective material.

4.2 Quality control. Unless otherwise specified (see 6.2), the quality conformance inspection, Government inspection, validation, and verification for supplemental data shall be in accordance with MIL-M-24784.

5. PACKAGING

5.1 Packaging requirements. Unless otherwise specified (see 6.2), the packaging and preservation requirements for delivery of book plans, review draft copies, preliminary technical manuals, final reproducible copy, supplemental data, replenishment materials, changes, and revisions shall be in accordance with MIL-M-24784.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory.)

6.1 Intended use. Commercial off-the-shelf manuals and supplemental data are intended for support of commercial off-the-shelf (COTS) equipment used by the Department of Defense. (This specification is not intended to standardize the style, format, size, or content of commercial off-the-shelf manuals, but to provide evaluation criteria for acceptance of COTS manuals and provide the requirements for supplemental data for selection by the Government.)

6.2 Acquisition requirements. Acquisition documents must specify the following:

(a) Title, number, and date of this specification (or any TMCR referencing this specification).
(b) If a copyright license has been granted to the COTS manual or data, obtain permission for Government reproduction and use.

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

(c) A copy of the COTS manual for Government reproduction and use is required to determine whether it is acceptable (Appendix 4A) for use or whether supplemental data is required (see 3.1).
(d) When an existing COTS manual is acceptable, an acceptability certificate (Appendix 4B) shall be completed (see 3.1).
(e) Specification tailoring requirements for supplemental data by selection of content and format requirements (Appendix 4C) (see 3.3).
(f) An ITPS is other than as specified (see 3.3.1).
(g) Deliverable products as specified (see 3.3.2.2 and 3.3.2.3).
(h) When supplemental data is required, contents shall be specified (see 3.3.3).
(i) Changes to the supplemental manual shall be specified only when they pertain to technical manual corrections resulting from a hardware change or modification. They may also be specified if it has been determined that significant omissions of technical data or information has been identified. Do not specify a change to correct minor or editorial corrections. When changes are justified on the above basis, the change package shall include the correction of all outstanding temporary or interim changes and may include minor changes (see 3.5.1). The change package shall be developed in accordance with MIL-M-24784/1.
(j) Whenever the number of change pages is estimated to exceed approximately 25 percent of the total number of pages in the supplemental manual, an update revision shall be specified (see 3.5.2) and developed in accordance with MIL-M-24784/2.
(k) When the total number of pages requiring change exceeds approximately 50 percent of the total number of pages in the supplemental manual, a complete revision shall be specified (see 3.5.2) and developed in accordance with MIL-M-24784/2.
(l) What quality assurance data items are to be delivered in support of supplemental data (see 4.2, 6.4, and MIL-M-24784):

(1) Validation certification.
(2) Evaluation records.
(3) Verification incorporation certification.

(m) When preservation, packing, and marking are other than as specified (see Section 5. PACKAGING).

6.3 Technical manual acquisition. This specification (or a TMCR based on this specification) must be listed on the Contract Data Requirements List (DD Form 1423) in order to acquire the technical manuals described by this specification, except where DoD FAR Supplement 27.475-1 exempts the requirement for a DD Form 1423.

6.4 Consideration of data requirements. The following data requirements should be considered when this specification is applied on a contract. The applicable Data Item Descriptions (DIDs) should be reviewed in conjunction with the specific acquisition to ensure that only essential data are requested/provided

Source: https://assist.dla.mil -- Downloaded: 2026-10-20T02:18Z
Check the source to verify that this is the current version before use.

and that the DIDs are tailored to reflect the requirements of the specific acquisition. To ensure correct contractual application of the data requirements, a Contract Data Requirements List (DD Form 1423) must be prepared to obtain the data, except where DoD FAR Supplement 27.475-1 exempts the requirement for a DD Form 1423.

Reference Paragraph	DID Number	DID Title
4.2	DI-M-2196	Manual, Technical: Validation Certification
4.2	DI-M-2197	Manual, Technical: Evaluation Record
4.2	DI-M-2201	Manual, Technical: Verification Incorporation Certification

The above DIDs were those cleared as of the date of this specification. The current issue of DoD 5010.12-L, Acquisition Management Systems and Data Requirements Control List (AMSDL), must be researched to ensure that only current, cleared DIDs are cited on the DD Form 1423.

(Data Item Description related to this specification and identified in Section 6 will be approved and listed as such in DoD 5000.19L., Vol. II, AMSDL. Copies of DIDs required by contractors in connection with specific acquisition functions should be obtained from the Naval Publications and Forms Center or as directed by the contracting officer.)

6.4.1 Sample COTS manual. When COTS manuals are required for evaluation to determine their acceptability, the solicitation should state how many samples of the COTS manuals should be included in the bid package.

6.4.2 Sample qualification. Sample COTS manuals should be evaluated by use of Appendix 4A, Manuals Evaluation Checklist or other applicable document(s) determined by the Government. It should be noted that preestablished checklists may not contain all requirements, but each manual's content requirements depend on the item(s) covered by the manual. As well, the same concept applies when using Appendix 4C Content and Format Selection Summary or other equivalent contractual document(s) to solicit or contract for supplemental data to augment the acceptable COTS manual.

6.5 Definitions. The words or phrases used throughout this specification must be as defined in MIL-M-24784 and the following.

6.5.1 Commercial off-the-shelf (COTS) manuals. Manuals available off-the-shelf from a commercial source which include operation, maintenance, and other instructions for commercial equipment. Commercial manuals are developed to support the equipment in the commercial market.

6.5.2 Supplemental data. Any data whether by change, addition, or separately numbered manual that augments or complements a commercial off-the-shelf manual to make the manual acceptable for use by the Department of Defense.

APPENDIX 4A

MANUALS EVALUATION
(Commercial Off-the-Shelf)

10. SCOPE

10.1 Scope. This appendix may be used by contracting activities to evaluate commercial off-the-shelf (COTS) manuals to determine their acceptability for use by Department of Defense activities. This appendix is not a mandatory part of the specification. The information contained herein is intended for guidance only.

10.2 Application. This appendix is intended to be copied or reproduced and completed to determine whether or not the reviewed manuals prove to be acceptable or nonacceptable. Appendix 4A, Manuals Evaluation Checklist and Appendix 4B, Acceptability Certification are companions in that decisions reflected on the completed certification reflect evaluations shown on the completed checklist.

10.3 Limitations. This appendix is limited in that it provides evaluation results and recommended actions(s) to be taken concerning the use and acquisition of COTS manuals only. In itself, it is not to be construed as an acquisition document, but may be helpful in selecting applicable supplemental data.

20. APPLICABLE DOCUMENTS

(This section is not applicable to this appendix.)

30. MANUAL EVALUATION CHECKLIST

30.1 Explanations of columns - Manuals Evaluation Checklist.

(a) The REQUIREMENTS -(Paragraph) column contains the name of the requirement followed by the number of the paragraph where the requirement is located.
(b) The ACCEPTABLE column has four subcolumns. If the manual contains the adjacent requirement and it is acceptable, mark an "X" in the YES column. If the manual does not contain the requirement or it is not acceptable, mark an "X" in the NO column. If the manual does not completely contain the requirements, or if the material is incorrect, mark an X in the INCOR/IMCOMP (INCORRECT/INCOMPLETE) column and make appropriate comments in the REMARKS column. If the listed requirement is not needed, mark an "X" in the NA (NOT APPLICABLE) column.
(c) Make necessary comments in REMARKS column. If more space is needed, add extra sheet(s) of paper.

APPENDIX 4B

ACCEPTABILITY CERTIFICATION
(Commercial Off-the-Shelf Manual)

10. SCOPE

10.1 Scope. This appendix is not a mandatory part of the specification, but may be used as required by the Government to certify the acceptability or nonacceptability of COTS manuals.

10.2 Application. This appendix is intended to be copied or reproduced and completed when the COTS manuals are evaluated by use of Appendix 4A. It will reflect the evaluations shown on the Manuals Evaluation Checklist, Appendix 4A.

20. APPLICABLE DOCUMENTS

(This section is not applicable to this appendix.)

30. ACCEPTABILITY

30.1 Certification. If the COTS manual is determined to be acceptable, the ACCEPTABLE block will be marked with an "X", and one of the subboxes must be marked to indicate any further action required. When the COTS manuals are not acceptable, the NOT ACCEPTABLE block will be marked.

APPENDIX 4B

ACCEPTABILITY CERTIFICATION

(Commercial Off-the-Shelf Manual)

Procurement/Contract No: _____

Equipment Model No: _____

Equipment Name: _____

Manual Publication No: _____

☐ - **ACCEPTABLE:**

☐ No further action required - use as is.

☐ Make corrections/substitutions -
(attach sheet specifying details).

☐ Supplement manual in accordance with Appendix 4C -
use completed Evaluation Checklist to prepare
Content/Format/Selection Summary Sheet (Appendix 4C).

☐ - **NOT ACCEPTABLE** (Prepare TM per applicable
military specification).

The above recommendation(s) are based on the completed Manual Evaluation Checklist.

APPENDIX 4C

CONTENT AND FORMAT SELECTION SUMMARY

10. SCOPE

10.1 Scope. This Appendix is not a mandatory part of this specification. Completion of the Content and Format Selection Summary Sheet may be used for acquisition of supplemental data for commercial off-the-shelf manuals. Information contained herein is for guidance or compliance as determined by the Government.

20. APPLICABLE DOCUMENTS

(This section is not applicable to this appendix.)

30. SELECTION SUMMARY

30.1 Content and Format Selection Summary Sheet(s). The summary sheet(s) (the following pages) may be reproduced or adapted for specific application; however, the content and format should remain unchanged.

30.2 Completion of Summary Sheets. The Government is responsible for filling in the pertinent information (contract number, manufacturer, model number, acquiring or contracting activity, and so forth) at the top of the sheet and for indicating data required. All supplemental data required by this specification for a specific acquisition should be indicated by an "X" in the "Selected Content" column.

30.3 Explanation of columns - Content and Format Selection Summary Sheet. Column (1), self-explanatory. Columns (2) and (3) are the names of requirements and their respective paragraph numbers in this specification. Column (4a) should be marked with an "X" for each item or requirement applicable to the solicitation or acquisition. Column (4b) is provided to allow for remarks when explanations of selected requirements are needed.

PUBLICATION NUMBER
DATE

IDENTIFYING TECHNICAL PUBLICATION SHEET

1. IDENTIFICATION DATA

2. PURPOSE: This technical publication is issued for the purpose of identifying an authorized commercial manual for Navy use and for providing supplemental technical information thereto.

(a) MANUFACTURER: (Name and address)
(b) PURCHASE ORDER OR CONTRACT NO.
(c) EQUIPMENT: (Type, model, part number, nomenclature, Federal Item Name, serial numbers)
(d) REQUISITION NO: (If furnished by the contracting activity)
(e) FEDERAL STOCK NO: (If furnished by the contracting activity)
(f) TITLE: (Operating Instructions, Maintenance Instructions, Parts List, as appropriate)
(g) ADDITIONAL IDENTIFICATION (if any): Volumes, Parts, and so forth
(h) DATE: (If any)
(i) Preparing activity (if other than prime contractor)
(j) Applicable TMCR number
(k) Extent of proposed supplement (10 percent maximum)

(1) Estimated number of proposed text pages.
(2) Estimated number of proposed illustrations.

(l) List identical manual (if any) acquired under another contract.

3. ADDITIONAL COPIES: Additional copies are available from_____. (Contracting activity will furnish information, but if no information is furnished, this paragraph will be omitted and the following paragraph moved up into its place.)

4. FILE LOCATION: The above described commercial manual is filed in ___ ___ ___ ___ ___ ___ ___ ___ ___. (Each library will fill this in if this identifying technical publication sheet is filed separately from the commercial manual.)

FIGURE 4-1. Identification sheet for a commercial manual. (Sample)

5. COVER PAGE. The cover page shall contain the following information:

(a) PUBLISHED BY DIRECTION OF THE COMMANDER, NAVAL SEA SYSTEMS COMMAND
(b) For unclassified manuals the following paragraph shall be used:

THIS PUBLICATION IS REQUIRED FOR OFFICIAL USE OR FOR ADMINISTRATIVE OR OPERATIONAL PURPOSES. DISTRIBUTION IS LIMITED TO US GOVERNMENT AGENCIES. OTHER REQUESTS FOR THIS DOCUMENT MUST BE REFERED TO: COMMANDER, NAVAL SEA SYSTEMS COMMAND (SEA 9941), ARLINGTON, VA 22242

(c) For classified manuals the following paragraph shall be used:

NOTICE: THIS MATERIAL CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE LAWS, TITLE 18, USC SECTION 793 AND 794, THE TRANSMISSION OR REVELATION OF WHICH IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW.

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

INSTRUCTIONS

1. The preparing activity must complete blocks 1, 2, 3, and 8. In block 1, both the comment number and revision letter should be given.

2. The submitter of this form must complete blocks 4, 5, 6, and 7.

3. The preparing activity must provide a reply within 30 days from receipt of this form.

NOTE: This form may not be used to request copies of documents, nor to request waivers, or clarification of requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements.
