COMMERCIAL ITEM DESCRIPTION

MOISTURE STABILIZER, WELDING ELECTRODE

The General Service Administration has authorized the use of this commercial item description in preference to Military Specification MIL-M-45558B.

1. SCOPE

1.1 Scope. This description covers one type of electrically heated moisture stabilizers of the standard, heavy duty, commercial type, used to protect welding electrodes from absorbing excessive moisture.

2. APPLICABLE DOCUMENTS

2.1 Documents. The following documents of the issue in effect on the date of invitation for bids or request for proposals form a part of this description to the extent specified herein.

Federal Standard FED-STD-376	- Preferred Metric Units for General Use by the Federal Government.
Military Specification MIL-W-45562	- Welding and Soldering Equipment, Supplies and Accessories, Packaging of.
American Society for Testing and Materials ASTM D 3951	- Standard Practice for Commercial Packaging.
Underwriters Laboratories, Inc. UL 499	- Electric Heating Appliances.
Underwriters Laboratories, Inc. UL 873	- Temperature-Indicating and Regulating Equipment.
Federal Acquistion Regulations	- Part 23 Enviroment Conservation and Occupational Satety.

3. SALIENT CHARACTERISTICS

3.1 Design. The moisture stabilizer shall be new and of the manufacturer's commercial design in effect on the date of the solicitation. The moisture stabilizer shall meet the requirements specified herein and conform to current industrial practice.

AMSC N/A FSC 3439

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

3.2 Materials. Materials used in the manufacture of the moisture stabilizer shall be of a quality necessary to produce a product that conforms to the requirements specified herein.

3.3 Container. The moisture stabilizer container shall be designed to hold 50 pounds of 18 inch flux coated electric arc welding electrodes. The container shall be double wall construction, insulated with not less than 1 inch of glass fiber or equal insulation. The container shall be provided with a carrying handle on each side. The container shall have a lid and the lid shall be provided with a piano type hinge, a latch, and a gasket. Dividers shall be provided to divide the container into four equal compartments.

3.4 Heating element. The heating element shall produce not less than 350 watts of power and shall operate from a single phase 120 volt alternating or direct current power source. The heating element shall conform to the requirements of UL 499.

3.4.1 Thermostate. The heating element thermostate shall be preset at the factory to provide an averaged stabilized temperature in the rod compartment of 300 degrees Fahrenheit and shall conform to the requirements of UL 873.

3.4.2 Electrical power cord. A heavy duty, three prong power cord shall be furnished. The power cord shall be not less than 8 feet in length.

3.5 Measurement system. All dimensions in this description are given in US units. These dimensions may be converted to SI units through the use of conversion factors and methods specified in FED-STD-376.

3.6 Regulatory requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

3.7 Workmanship. Workmanship of the moisture stabilizer shall be of a quality equal to that of comparable products furnished to the commercial market.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection, examination, and test requirements specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any other facilities suitable for the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections, examinations, or tests set forth in this description where such inspections, examinations, and tests are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Examination. Each moisture stabilizer shall be visually examined to determine conformance with all requirements of this description.

4.3 Test. The moisture stabilizer shall be connected to the specified electrical power source and tested to ensure compliance with the requirements in 3.4. and 3.4.1.

4.4 Packaging inspection. Packaging shall be inspected for conformance with section 5.

5. PACKAGING

5.1 Preservation, packing, and marking. Unless otherwise specified in the contract or purchase order, preservation, packing, and marking shall be in accordance with ASTM D 3951. When specified (see 6.1) preservation, packing, and marking shall be in accordance with MIL-W-45562, level as specified.

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein, and include the following information in procurement documents:

a. Title, number, and date of this commercial item description.
b. Quantity required.
c. Packaging in accordance with MIL-W-45562 if required; specify level (see 5.1).
