DATA ITEM DESCRIPTIONS

FORM APPROVED
QMB No. 0704-0188

Public reporting burden for the collection of information is estimated 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data need, and completing and review the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Washington Headquarters Services, Directorate of Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-1302, and the Office of Management and Budget, Paperwork Reduction Project (0704-0188), Washington, DC 20503.

1. TITLE	2. IDENTIFICATION NUMBER
GOVERNMENT OWNED MATERIAL (GOM) STATUS REPORT	DI-MGMT-81543

3. DESCRIPTION/PURPOSE

3.1 This report provides the government with an accurate account of Government Owned Material (GOM), traceable to the lowest replaceable unit, in the custody of the contractor, including baseline, residual, and excess assets.

4. APPROVAL DATE	5. OFFICE OF PRIMARY RESPONSIBILITY	6a. DTIC APPLICABLE	6b. GIDEP APPLICABLE
970318	N/SEA 041		

7. APPLICATION/INTERRELATIONSHIP

7.1 This DID contains the format and content preparation instruction for the data product generated by the specific and discrete task requirement as delineated in the contract.

7.2 This DID is applicable to the acquisition of ships, systems and equipment for new start contracts. It may also be applied to existing contracts wherein it is deemed cost effective to retrofit.

8. APPROVAL LIMITATION	9a. APPLICABLE FORM	9b. AMSC NUMBER N7257

10. PREPARATION INSTRUCTIONS

10.1 Format. The Government Owned Material Status Report shall be prepared in accordance with the format described in Figure 1.

10.2 Media.

10.2.1 Magnetic Tape.

10.2.1.a. The EBCDIC characteristics of the GOM status report shall be as follows:

(1) Density: 9 Track, 1600 BPI
(2) Mode: EBCDIC
(3) Parity: Odd
(4) Block Size: 10
(5) Record Size: 126
(6) Labeling: No internal labels; external labels shall appear as follows:
  (a) Activity Name
  (b) Date
  (c) GOM Status Report
  (d) 1600 BPI
  (e) EBCDIC
  (f) Internal label: none
  (g) 10 X 126
  (h) GOMSTAT.TXT (File Name)

10. PREPARATION INSTRUCTIONS CONTINUED

10.2.1.b. The ASCII characteristics of the GOM Status Report shall be as follows:

(1) Density: 9 Track, 1600 BPI
(2) Mode: ASCII
(3) Parity: Odd
(4) Block Size: 10
(5) Record Size: 126
(6) Labeling: No internal labels; external labels shall appear as follows:
  (a) Activity Name
  (b) Date
  (c) GOM Status Report
  (d) 1600 BPI
  (e) ASCII
  (f) Internal label: none
  (g) 10 X 126
  (h) GOMSTAT.TXT (File Name)

10.2.2 Floppy. Characteristics of the GOM Status Report shall be as follows:

(a) Density: High, 1.44 MB
(b) Mode: ASCII
(c) Compression: PKZIP (2.04 G or later)
(d) Record Size: 126
(e) Labeling: No internal labels; external labels shall appear as follows:
  (1) Activity Name
  (2) Date
  (3) GOM Status Report
  (4) PKZIP ver 2.04G (version of PKZIP)
  (5) ASCII
  (6) Internal label: none
  (7) Record size: 126
  (8) GOMSTAT.TXT (file name)

10.3 Content: This report shall specify all the current inventory of GOM baseline, residual, and excess assets including COSAL material, installation and checking material and hazardous material. Specific content requirements shall be as specified in figures 1 and 2 and shall include the following:

10.3.1 Allowance Parts List/Allowance Equipage List. An alphanumeric code, minimum of 8 characters and maximum of 11 characters, that identifies the unique characteristics of an equipment or system provisioned by the Navy Ships Parts Control Center, or the non-installed material collectively known as equipage.

10.3.2 Document/Requisition/Purchase Number. Examples of locally assigned numbers that aid in tracing the identity, locations, and disposition of an item shall be included.

1. TITLE | 2. IDENTIFICATION NUMBER

GOVERNMENT OWNED MATERIAL (GOM) STATUS REPORT | DI-MGMT-81543

10. PREPARATION INSTRUCTIONS CONTINUED

10.3.3 National Item Identification Number. Represents the last nine digits of the 13-digit Naval Stock Number and identifies a specific item catalogued in the Federal Supply System shall be identified.

10.3.4 Part Number. Any number other than a government activity stock number, used to identify an item of production or supply; includes manufacturers part numbers, drawing numbers, and model, type, or source controlling numbers.

10.3.5 Commercial and Government Entity. A five digit number assigned to an individual supplier, manufacturers, corporation or government activity for identification purposes.

10.3.6 Unit of Issue. A two character code that identifies the type of quantity being measured. For example, shoes would be issued as a "pair" (PR) while hammers would be issued one at a time or "each" (EA).

10.3.7 Allowance Quantity. The total number of a given item of replacement allowed onboard.

10.3.8 Quantity on Order. The number of a given item for which requisitions are in process.

10.3.9 Quantity Received. The number a given item acquired as a result of a requisition.

10.3.10 Quantity on Hand. The number of a given replaceable item currently in the storeroom.

10.3.11 Unit Price. The cost of a single item or of the lowest possible acquisition quantity of items.

10.3.12 Extended Price. The cost calculated by multiplying the unit price by the quantity of items.

10.3.13 Material Category Code. A one character alphabetic code that identifies material as either COSAL, installation and checkout, hazardous or other (C, I, H, or O).

10.3.14 Material Accessibility Code. A two character alphabetic code that defines the material's intended use and disposition. Generally speaking, excess assets are available as free issue redistribution's while baseline and residual assets are either non-available for redistribution or are negotiable at the program managers discretion.

10.3.15 Unit Identification Code. A five digit accounting number that identifies a ship, shore activity, operational unit, agency, contractor or other organized entity that may be involved in acquiring and/or managing material.

10.3.16 Type Number Code. A one digit alphabetic code that identifies the data in position 12-28 as either a document number [R] or a contract number (P).
