MILITARY SPECIFICATION

TRAINING DEVICES PHOTOGRAPHY REQUIREMENTS;

GENERAL SPECIFICATION FOR

This specification is approved for use
within the Naval Training Systems Center,
Department of the Navy
and is available for use by all
departments and agencies of the
Department of Defense.

1. SCOPE

1.1 Purpose. This specification covers the general requirements for photography of training devices and their accessories as depicted on black and white negatives, photographic prints, and 35mm (millimeter) color slide transparencies, and the preparation thereof. The black and white negatives, photographic prints, and 35mm color slide transparencies, will be hereinafter designated as negatives, prints, and slide transparencies.

1.2 Classification. For the purpose of this specification training devices are classified as Types I through V as follows:

1.2.1 Type I - Moveable trainers. Moveable trainers used in general classroom instruction, such as tabletop training devices, animated transparencies, display panels, and the like.

1.2.2 Type II - Small, fixed installation trainers. Fixed installation trainers occupying a portion of a room.

1.2.3 Type III - Room-size and van-mounted trainers. Trainers completely occupying a room or installed in a van.

AMSC No. N3849 FSC 6910-N430

DISTRIBUTION STATEMENT A. Approved for public release: distribution is unlimited.

Check the source to verify that this is the current version before use.

1.2.4 Type IV - Multiroom trainers. Trainers occupying more than one room.

1.2.5 Field-installation trainers. Trainers utilized outdoors in field installations, including ground installation and attachments to operational vehicles or weapons.

2. APPLICABLE DOCUMENTS

2.1 Government documents. The following Government document forms a part of this specification to the extent specified herein. Unless otherwise specified, the issue shall be that in effect on the date of the solicitation.

Department of Defense

DOD 5220.22-M Industrial Security Manual for Safeguarding of Classified Information

(Copies of document required by contractors in connection with specific acquisition functions should be obtained from the contracting activity or as directed by the contracting activity.)

3. REQUIREMENTS

3.1 Materials and processes. Materials and processes used for the preparation of negatives, prints, and slide transparencies shall be in accordance with best commercial practice.

3.2 Preparation.

3.2.1 General. Details of subject matter depicted on negatives, prints, and slide transparencies shall be in sharp focus and be clearly defined in relation to other parts in the immediate area. General overall contrast shall be maintained in full gray scale so as to permit reproduction without the need for retouching.

3.2.2 Negative preparation. Any extraneous background shall be removed by opaquing, masking, or other commercially acceptable means that accomplishes this purpose.

3.2.3 Print preparation. Prints shall be black and white with glossy finish on single-weight paper with a white border of 60mm. Except as specified in 3.5.1 and 3.5.4., the face and back of prints shall be free of any extraneous markings. Paper clips, staples, or other fastening devices shall not be used.

Check the source to verify that this is the current version before use.

3.2.4 Slide transparencies. Slide transparencies shall be original positives, in sharp focus, with high resolution, and with proper exposure and color balance for brilliant image projection. Slide transparencies shall be mounted and centrally positioned within standard die-cut cardboard or plastic mounts. The method of assembly shall be such that the slide mount will neither separate nor gap along the edge to an extent to cause jamming in a standard slide projector. There shall be no distortion or bucking of the transparancy or of the cardboard or plastic mount.

3.3 Dimensions.

3.3.1 Negative size. Negatives shall be commercial standard four by five inches.

3.3.2 Print size. Prints shall be commercial standard eight by ten inches.

3.3.3 Slide transparency mounts. Slide transparency mounts shall be commercial standard two by two inches.

3.4 View. Views of training devices and accessories depicted on negatives, prints, and slide transparencies shall be as follows:

3.4.1 General. All views shall be of the complete training device or portions thereof as specified in the contract schedule, as ready for delivery, or as installed in the field. Views shall show the pertinent identifying features of the training devices with necessary detail clearly included. Views depicting personnel in training are recommended. Views of other personnel are not to be included. All images shall be of maximum size within the confines of the information area, yet leave sufficient space surrounding the training device to allow proper sizing or cropping for reproduction purpose.

3.4.1.1 Scale. The actual size of the training device, or portion thereof depicted, shall be indicated by a known factor. In the case of Types I and II, this shall be done by the inclusion of a legible scale in the foreground of the view being photographed.

3.4.2 Type I - Moveable trainers. Except as specified in 3.4.2.1, Type I moveable trainer views shall include front and side views of the complete training device and front views of any associated cabinets or panels.

3.4.2.1 Animated transparencies. Animated transparencies shall be photographed against a contracting background external to the transparancy baseplate perimeter; however, the transparency's projectable area shall be photographed against a white background. Views shall show the details of the transparency's subject matter and mechanisms as well as views of projected images as seen on a projection screen, in Government-selected stages of animation.

3.4.3 Type II - Small, fixed installation trainers. Type II, Small, fixed installation trainer views shall include the top view and views at 2, 4, 6, 8, 10 and 12 o'clock of the complete training device.

3.4.4 Type II - Room-size, and van-mounted trainers. Type II - Room-size and van-mounted trainer views shall include the front view and 3/4 front view of the complete training device, and views of the instructor area, instructor console, trainee station, computer area, maintenance area, any unique features of the trainer, and any other views specified by the Procuring Contracting Officer.

3.4.5 Type IV - Multiroom trainers. Type IV - Multiroom trainer views shall include an overall view of each room and major area, front and side views of instructor station, operator station, and trainee station, any unique features of the trainer, and any other views specified by the Procuring Contracting Officer.

3.4.6 Type V - Field-installation trainers. Type V - Field-installation trainer views shall include a view looking down at the trainer installation from above, and views at 2, 4, 6, 8, 10 and 12 o'clock.

3.5 Identification markings.

3.5.1 Prints. When more than one view is required, the prints for the training device shall be regarded as a set. Each print of a set shall be marked with the print number and the number of prints in the set, e.g., 1 of 3, 2 of 3, etc. The following information shall be typewritten on lightweight paper approximately four by five inches and secured on the back of each print with rubber cement:

(a) Government activity (i.e., Naval Training Systems Center)

(b) Name of training device

(c) Device number and identification of view

(d) Manufacturer's name

(e) Contract number

(f) Date photographed

(g) Set number (if applicable), e.g., 1 of 3, 2 of 3, etc.

(h) Security classification designation as applicable (see 3.5.4).

3.5.2 Negatives. Each negative shall be enclosed in a glassine envelope, which in turn is enclosed in a commercial type brown paper envelope. Identification markings of 3.5.1 and 3.5.4 shall be typewritten or hand-lettered in black india ink on the face of the brown paper envelope. In

addition, the training device number, date photographed, set number (if applicable), and security classification (if applicable) shall be hand-lettered in black india ink along the bottom edge of the negative.

3.5.3 Slide transparencies. Identification markings listed under (a), (b), (c), (g), and (h) of 3.5.1 shall be hand-lettered in black india ink on the cardboard or plastic mount. Lettering shall not exceed five lines, exclusive of security markings. Lettering shall be readable from the side of the mount away from the screen when the slide transparancy is in position for insertion in the projector slide carrier. When in this position, a mark consisting of a black dot approximately 3/16 of an inch in diameter shall be inked in the upper right-hand corner of the mount on the side where the lettering appears.

3.5.4 Security markings. Classified negatives, prints, slide transparencies, envelopes, mounts, and containers shall be plainly and conspicuously marked or stamped with the appropriate classification in accordance with DOD 5220.22-M security requirements.

3.6 Workmanship. Negatives, prints, and slide transparencies shall be thoroughly cleaned of residual salts and shall be free of waterspots, stains, reticulation, fog, static marks, abrasion, scratches, dust, dirt, or other foreign matter.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the supplier may use his own or any other facilities for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Inspection. Each negative, print, and slide transparancy shall be examined to determine compliance with the requirements specified herein.

5. PREPARATION FOR DELIVERY

5.1 Packaging. Negatives, prints, and slide transparencies of like type shall be unit-packaged in accordance with manufacturer's commercial practice.

5.2 Packing. Units packaged as specified in 5.1 shall be packed in containers which will ensure acceptance by common carrier and safe delivery at destination. Shipping containers shall conform to common carrier's rules or other regulations as applicable to the mode of transportation.

Check the source to verify that this is the current version before use.

5.3 Classified material. Classified negatives, prints, and slide transparencies shall comprise a separate shipment and shall not be combined with unclassified negatives, prints, and slide transparencies. Preparation for delivery, markings, and transmittal of classified material shall be in accordance with DOD 5220.22-M.

6. NOTES

6.1 Intended use. The negatives, prints, and slide transparencies covered by this specification will be used to identify, record, and display training devices, and in the preliminary orientation of personnel.

6.2 Data requirements. When this specification is used in an acquisition and data are required to be delivered, the data requirements identified below shall be developed as specified by an approved Data Item Description (DD Form 1664) and delivered in accordance with the approved Contract Data Requirements List (CDRL), incorporated into the contract. When the provisions of DOD FAR Supplement, Part 27, Sub-Part 27.410-6 (DD Form 1423) are invoked and the DD Form 1423 is not used, the data specified below shall be delivered by the Contractor in accordance with the contract or purchase order requirements. Deliverable data required by this specification are cited in the following paragraphs:

Paragraph No.	Data Requirement Title	Applicable DID No.	Option
3.4	Still Photo Coverage	DI-MISC-80169	----
3.4	35mm Slide Transparencies	DI-MISC-80170	----

(Data item descriptions related to this specification, and identified in Section 6 will be approved and listed as such in DOD 5000.19-L., Vol. II, AMSDL. Copies of data item descriptions required by the Contractors in connection with specific acquisition functions should be obtained from the Naval Publications and Forms Center or as directed by the Contracting Officer.

6.3 Subject term (key word) listing.
