# COMMERCIAL ITEM DESCRIPTION

## DISINFECTANT, GENERAL PURPOSE
## (QUATERNARY AMMONIUM COMPOUND)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification O-D-1277.

Salient characteristics:

The product shall be a powdered or granular disinfectant containing quaternary ammonium compounds as active ingredients.

EPA registration. The product shall be registered by the Environmental Protection Agency (EPA) as a disinfectant suitable for use in hospitals, clinics or any other medical-related facility. The product shall be labeled with directions for dilution and use. The product and its label shall comply with the Regulations for Enforcement of the Federal Insecticide, Fungicide and Rodenticide Act (Code of Federal Regulations, Title 40, Parts 162-180)

Effectiveness. When used as directed on the label, the use-dilution solution, prepared with hard water containing 250 ppm hardness (as calcium carbonate), shall be:

| | |
|---|---|
| bactericidal against | Staphylococcus aureus (ATCC No. 6538)<br>Salmonella choleraesuis (ATTC No. 10708)<br>Pseudomonas aeruginosa (ATTC No. 15442); |
| fungicidal against | Trichophyton mentagrophytes (ATTC No. 9533); and |
| viricidal against | Adenovirus Type A-2<br>Herpes simplex<br>Vaccina<br>Influenza $A_2$. |

Effectiveness shall be documented by data from test methods and conditions acceptable under the Environmental Protection Agency (EPA) "Efficacy Data Requirements" and "Confirmatory Data Requirements" DIS/TSS 1-10.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description, and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product sold in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Packaging, packing, and marking. The items shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping container shall be in compliance with National Motor Freight Classification and Uniform Freight Classification. Shipping containers shall be marked as specified in the contract or order.

Notes: Purchasers should specify in the contract the size containers of the product required.

Bid evaluation. Bids shall be evaluated on the basis of price per gallon of use-dilution solution obtainable. This is calculated as follows:

$$\text{Price per gallon of use-dilution solution} = \frac{A \times B}{C}$$

Where: A = bid price per container of product,
B = number of ounces of product needed to make one gallon of use-dilution solution, and
C = ounces of product per container.

Bidders shall state on their bid the amount of product (in ounces) required to make one gallon of use-dilution solution as stated on the label. Where more than one use-dilution is stated on the label, the use-dilution with the largest quantity of product per gallon of use-dilution solution shall be used in determining the cost.
