COMMERCIAL ITEM DESCRIPTION

WRAPPING TOOL, WIRE

The General Services Administration has authorized the use of this commercial item description as a replacement for Type 3, part number MS3508/6-001 of MIL-T-83508/6 which is canceled.

This commercial item description covers a portable wire wrapping tool intended for use in making solderless connections of stripped wire on terminal pins.

Salient characteristics:

The wire wrapping tool shall be the hand held, pistol grip type and shall be battery powered using rechargeable type batteries. A battery charger shall be provided with the tool and shall be capable of fully charging the battery in not more than 14 hours. A full charge shall yield not less than 1000 complete solderless connections at the tool's rated RPM. The tool shall operate with wire sizes 22 through 30 AWG. Rotation shall be clockwise. The connections, except for the first and last turn, shall, for each turn, exhibit a gas-tight area on at least 75 percent of the corners in contact with the uninsulated wire. The wrapped connection shall be resistant to stripping from the pin but shall be capable of being unwrapped from the pin with an appropriate tool such that the wire can be straightened without breakage. A positive locking index mechanism shall be incorporated in the tool. The tool housing shall be reinforced polycarbonate or similar non-metallic material such that the tool is able to withstand the shocks and stresses encountered during normal use without malfunctioning. The tool shall be so designed and constructed as to preclude the accumulation of metal particles in any manner that would contribute to tool malfunction or failure. The tool shall be marked in a plain, permanent, and legible fashion with the manufacturer's name or trademark, model or serial number, RPM, and type of batteries and charger to be used. The tool shall be furnished without bits and sleeves.

Workmanship: The wire wrapping tool shall be free of any defects that impairs serviceability, durability, and appearance.

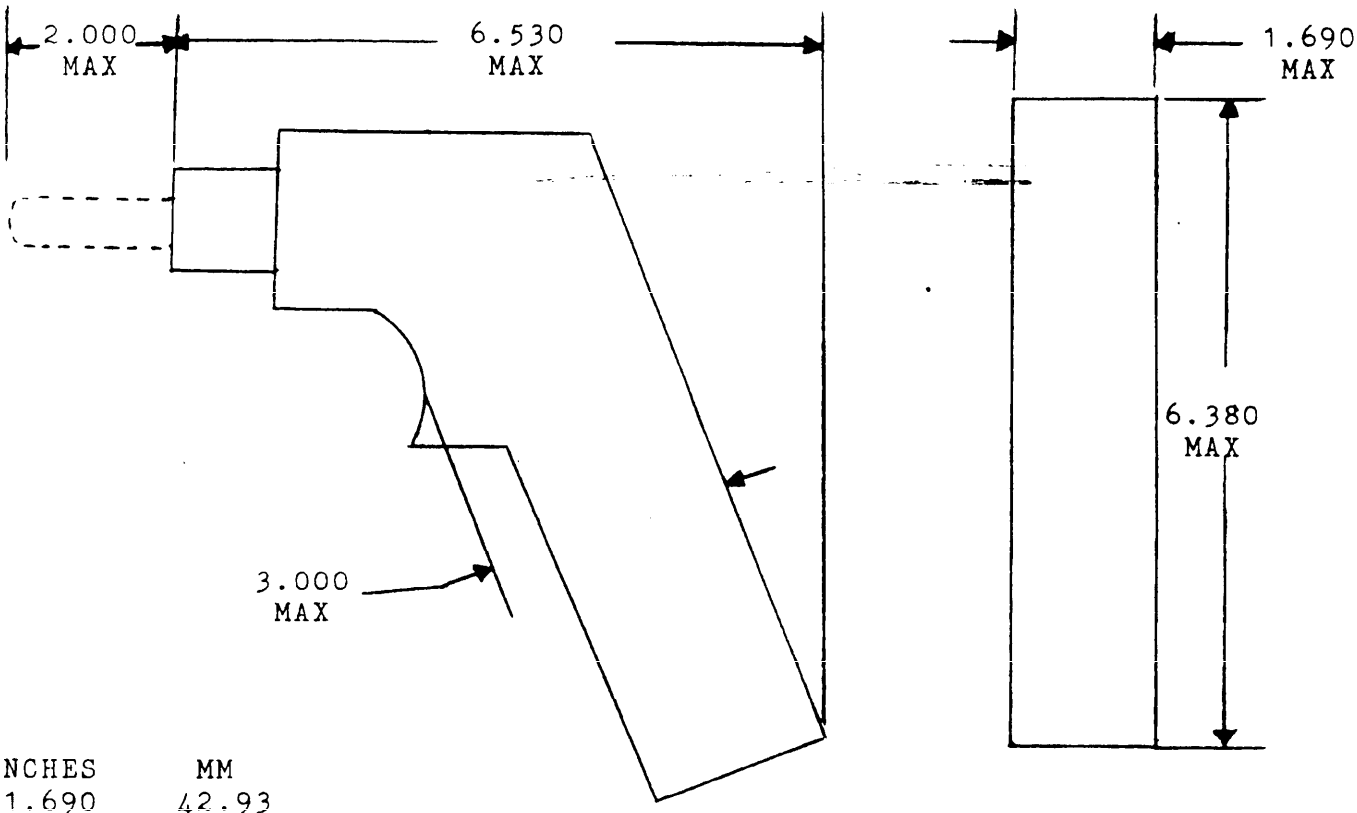

Regulatory requirement. Contractors/offerors are encouraged to utilize recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

Preservation, packaging, packing, labeling, and marking. Preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.

Note: Assigned National Stock Number (NSN) is 5130-00-919-3486.
