COMMERCIAL ITEM DESCRIPTION

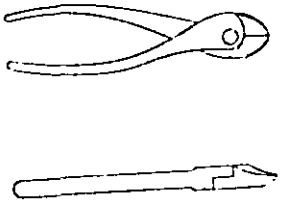

PLIERS, DIAGONAL CUTTING (NONSPARKING AND NONMAGNETIC)

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers one size of short nose diagonal cutting pliers made of a nonferrous alloy having a low sparking hazard and a low magnetic permeability.

Salient characteristics

Type. The pliers shall be similar to the following illustration and have an overall length of 7-1/8 inches, plus or minus 1/4 inch, and a 13/16-inch, plus or minus 1/16 inch long cutting edges (NSN 5110-00-595-9490). The pliers shall be suitable for cutting wires close to flat surfaces, and shall be capable of cutting a two penny (0.072 inch diameter) steel wire nail without visible deformation or damage to the cutting edges.

Pliers, diagonal cutting, short nose

Material. Material shall be a beryllium copper having an iron content not over five percent, and when present, it shall be well diffused throughout the alloy. When tested with a magnetic permeability indicator conforming to Military Specification MIL-I-17214, the magnetic permeability shall not be above 1.2 on the indicator scale.

Surface finish. Surfaces shall be finished in accordance with good commercial practice and shall be free from fins, scale, cracks, seams, burrs, or any other defects which may affect the serviceability or durability of the pliers. Forging flash lines shall be removed sufficiently to blend smoothly with adjacent surfaces.

Heat treatment. They pliers shall have a cutting edge hardness of Rockwell C16, or equivalent, minimum.

Handles. The handles shall be of a size and shape to provide a comfortable grip and be capable of withstanding normal handle loads without distortion or permanent set which would render the pliers unserviceable.

Marking. Pliers shall be marked in a plain and permanent manner with name, abbreviation, or chemical symbol of the alloy, the manufacturer's name or trademark of such known character that the source of manufacture may be readily determined, and the country of origin.

Workmanship. Pliers shall be free from any defect that impairs durability, serviceability, and appearance

FSC 5110

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Check the source to verify that this is the current version before use.

Quality assurance provisions. Sampling for inspection shall be in accordance with MIL-STD-105, Sampling Procedures and Tables for Inspection by Attributes, except where otherwise indicated herein. The lot size shall consist of all pliers offered for acceptance at one time. A sample unit shall be one plier.

A. Examination for design, dimensions and workmanship. The inspection level shall be S-2 with an acceptable quality level (AQL) of 4.0 percent defective.

B. Material. Material shall be ascertained by manufacturer's certification.

C. Hardness testing. Hardness testing shall be in conformance with commercially accepted procedures. The inspection level shall be S-2 with an AQL of 4.0 percent defective.

Regulatory requirements: In accordance with the section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements or exposing suppliers' employees to undue hazards from the recovered materials.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging packing, labeling, and marking shall be as specified in the contract or order.

Notes:

The issue of referenced documents in effect on the date of invitation for bid or request for proposals shall be used to determine compliance with the stated requirements. Sources for obtaining referenced documents may be determined by contacting the Contracting Officer.

MILITARY INTERESTS:

NONE: DoD has determined that no military activity has an official interest in this commercial item description.

PREPARING ACTIVITY:

GSA-FSS
