1/ Tolerances on terminal boards up to and including 6 inches in length:
for A dimension +.031, -.016
for B dimension +.031, -.062
Over 6 inches in length:
for A dimension +.047, -.031
for B dimension +.047, -.062

2/ The increase of .016 inch dimension of these points is to take into consideration accumulative tolerances of the terminal board. It in no way affects the nominal .562 inch dimension between terminal rows. The nominal .562 inch dimensions from terminal point to point is maintained to permit the use of such auxiliary hardware as fanning strips, identification plates, etc., where such hardware is required.

3/ Not to be used for new design.
