4.4.3.1.1 Etching Method. - The band shall be removed by machining the band and chemically etching without damaging the base metal of the band seat (see 6.3).

4.4.3.1.2 Alternate Machining Method. - The band shall be removed by machining to the band seat diameter to produce alternate areas of base metal and band material (latticelike effect). Sample not able to be machined to the latticelike effect condition shall be chemically etched as specified in 4.4.3.1.1.

Paragraph 4.4.5, delete: on the applicable specification; add: in TT-C-490.

PAGE 15

Paragraph 4.4.5.1 delete: utilizing the equipment and procedures specified by ASTM Method B-117; add: as specified in TT-C-490.

PAGE 16

Add: new paragraph 6.10 Submission of designs for approval. See MIL-A-48078, Submit designs as required to Commander, US Army Armament Research and Development Command, ATTN: DRDAR-QAR-I, Dover, NJ 07801.

DD FORM 1426

Address: delete: Commander, Frankford Arsenal, ATTN: SARFA-MDM, Philadelphia, PA 19137; add: Commander, US Army Armament Research and Development Command, ATTN: DRDAR-QAR-I, Dover, NJ 07801.

NOTE: The margins of this amendment are marked with an asterisk to indicate where changes from previous amendments were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amandment.
