COMMERCIAL ITEM DESCRIPTION

PILLOWCASE AND COVER, HEADREST (DISPOSABLE)

The General Services Administration has authorized the use of this commercial item description, for all Federal agencies.

1. SCOPE

1.1 Scope. This commercial item description covers disposable nonwoven pillowcases and headrest covers intended for one-time use and not suitable for laundering.

2. CLASSIFICATION

2.1 Classification. The pillowcase or headrest cover shall be of the following style and size, as specified:

Style I - Pillowcase
Size 1 - 12.0 -0, +0.5 inches (30.5 -0, +1.3 cm) wide by
17.0 -0, +0.75 inches (43.2 -0, +1.9 cm) long
Size 2 - 21.0 -0, +0.5 inches (53.3 -0, +1.3 cm) wide by
30.0 -0, +0.75 inches (76.2 -0, +1.9 cm) long

Style II - Headrest cover
Size 3 - 19.0 -0, +0.75 inches (48.1 -0, +1.9 cm) wide by
12.5 -0, +0.5 inches (31.8 -0, +1.3 cm) high

The dimensions are inside (between seams) dimensions.

3. SALIENT CHARACTERISTICS.

3.1 Fabric. The nonwoven fabric shall be white, shall feel soft to the skin, and shall have no adverse effect on the skin of personnel when used. The fabric shall be made from fully bleached cellulose, polyester, rayon, or nylon fibers, or mixtures of these; shall have a minimum weight of 1.0 oz/yd^2 (33.9 g/m^2) when tested in accordance with ASTM D 3776; and shall exhibit no blocking when tested in accordance with FED-STD-191, Test Method 5872.

The fabric shall have a minimum dry bursting strength of 12.0 psi (82.7 kPa) when tested in accordance with ASTM D 3786, and a minimum wet breaking strength, each direction, of 1.0 lbf (4.45 N) when tested in accordance with ASTM D 5034, grab test procedure.

3.2 Flammability. The pillowcases and headrest covers shall pass the requirements of FAA, Department of Transportation Flammability Standard No. 25.853(B).

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor Street, Fort Worth, TX 76102

3.3 Construction. The pillowcase or headrest cover shall be fabricated from one or two pieces, at the manufacturer's option, of nonwoven fabric with all seams formed along the edges of the pillowcase or headrest cover. The design shall be a slip-on envelop type with one open edge along the width dimension.

The back height of the headrest cover shall be 6 inches (15.2 cm), minimum, and 8 inches (20.3 cm), maximum. The corners shall be rounded with a radius of 3.75 ± 0.25 inches (95.3 ± 6.1 cm).

Seams shall be sewn, glued, or fused and shall be straight, uniform in width, neatly formed, and free of wrinkles. No seam allowance shall exceed ½ inch (1.3 cm) in width when measured from the inner edge of the stitching, glue, or fuse line to the outer edge of the piece. There shall be no seams, other than the edge seams, on the front or back of the pillowcase or headrest cover.

Thread and stitching used in sewn seams shall conform to standard commercial practice for this product. Thread color shall match the color of the fabric. There shall be no loose or untrimmed threads.

Glued or fused seams shall conform to standard commercial practice for this product. All seams shall adhere securely throughout the entire seam area and shall be stronger than the joining fabric when separation by hand is attempted. There shall be no excess glue and no pronounced discoloration along the seamed area.

3.4 Workmanship. The finished product shall be soft to the skin; shall have no objectionable odor; shall have no objectionable crackling sound or noise when the head is rested upon the pillowcase or headrest cover; and shall be clean and free from breaks, tears, holes, uneven or ragged edges, loose or untrimmed thread, needle chews, open seams, wrinkled seams, spots, stains, streaks, lint, or other defects which would affect the function, serviceability, or appearance of the item. Pillowcases or headrest covers from the same lot shall be uniform in texture, softness, color, and general appearance.

3.5 Measurement system. The values stated in inch-pound units are to be regarded as the standard. The values stated in parentheses are for informational purposes only.

3.6 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within the tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

3.7 Regulatory requirements. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

4. QUALITY ASSURANCE PROVISIONS

4.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The government reserves the right to require proof of such conformance.

5. PACKAGING

5.1 Preservation, packing, and marking. The preservation, packing, and marking shall be as specified in the contract or order.

6. NOTES

6.1 Part Identification Number (PIN). Pillowcases and headrest covers conforming with this commercial item description shall be identified by a part number configuration consisting of identification of a portion of the CID on number, style, and size. An example of a part number configuration is shown below. This part numbering system is intended for identification and cross-indexing of the item within the federal cataloging system. The following part identification numbering procedure is for government purposes and does not constitute a requirement for the contractor.

AA163A11 EXAMPLE: AA163A11 = 12" x 17" pillowcase

|||

|||_____ Size (1 = 12" x 17", 2 = 21.25" x 30.5", 3 = 12" x 19")

||

||_____ Style (1 = Style I, pillowcase; 2 = Style II, headrest cover)

|

|_____ Commercial item description number

6.2 Sources of documents.

Copies of ASTM standards are available from the American Society for Testing and Materials, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959.

Copies of Federal standards are available from Federal Supply System Bureau, Specification Section, Suite 8100, 470 East L'Enfant Plaza, S.W., Washington, D.C. 20407.

Copies of Federal laws and regulations are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

6.3 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a) Title, number, and date of this commercial item description.
b) Style and size required (2.1).
c) The preservation, packing, and marking required.

6.4 National Stock Numbers (NSN's): The following is a list of NSN's which correspond to this commercial item description. This list may not include all possible NSN's.

NSN	Nomenclature	Style	Size	PIN
7210-00-883-8494	Pillowcase	I	1	AA163A11
7210-00-852-3417	Pillowcase	I	2	AA163A12
7290-00-822-9427	Cover, Headrest	II	3	AA163A23

6.5 Supersession data.
