Check the source to verify that this is the current version before use.

3.2.3 The ironing board shall be a four (4) leg design with plastic caps over the ends of all four legs to prevent creeping or marring any floor surface.

3.2.4 The ironing board shall be capable of being folded flat for storage.

3.3 Size. The ironing board shall conform to the overall surface dimensions, referenced in inches, as shown in Figure 1.

LEGEND

"A" - 54 ± 1 inch

"B" - 32 ± 1.5 inch

"C" - 14.5 ± 0.5 inch

"R" - 2.5 ± 0.5 inch

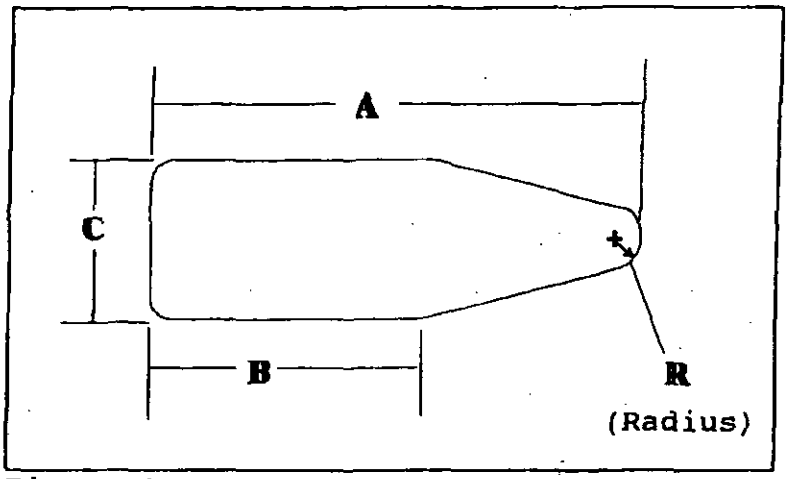

Figure 1

TOP VIEW

3.4 Finish. The surface of the ironing board shall be completely covered with either a baked enamel finish or an electrostatic powder coated finish, at the manufacturer's option.

3.5 Workmanship. The finished ironing board shall be clean, well made, and free from any other defects which may affect appearance, function or serviceability.

3.6 Performance. The ironing board shall be capable of supporting a fifty (50) pound weight placed in the center of the board, with a bearing area of not more than sixty-four (64) square inches. The ironing board shall support the specified weight without any permanent deflection in the top surface and shall maintain all height positions from 24 to 36 inches. The full extended height of the ironing board shall be 36 ± 1 inch.

3.7 Regulatory requirements. Suppliers of this product are encouraged to use recovered materials in accordance with Public Law 94-580, as amended, to the maximum extent practicable.

3.8 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerances specified using conversion tables contained in the latest revision of FED-STD-376, and all other requirements of this commercial item description are met.

3.9 Commercial item. The use of the term "Commercial Item Description" in this document, does not imply that any item or items offered are not required to conform with all requirements specified herein.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the contractor shall be permitted to use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification, where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Sampling. Sampling for inspection and tests shall be performed in accordance with MIL-STD-105.

4.3 Lot formation. All ironing boards of the same manufacturer offered for delivery at one time shall be considered a lot for the purpose of inspection.

4.4 Sampling for visual and dimensional examination. A random sample of ironing boards shall be selected from each lot in accordance with inspection level I, AQL 6.5, expressed in terms of defects per hundred units (DHU). The sample unit shall be one ironing board.

4.5 Sampling for tests. A random sample of ironing boards shall be selected from each lot in accordance with inspection level I, AQL 6.5, expressed in terms of defects per hundred units (DHU). The sample unit shall be one ironing board.

4.6 Visual and dimensional examination. The sample ironing board shall be visually and dimensionally examined to verify compliance with this commercial item description. Tolerance limits specified are absolute limits as defined in ASTM E 29.

4.7 Testing. The ironing board shall be capable of supporting a fifty (50) pound weight placed in the center of the board, with a bearing area of not more than sixty-four (64) square inches (see 3.6).

4.8 Examination for preparation for delivery. An examination of unit, intermediate and shipping containers (as applicable) shall be made to determine conformance with the packaging, packing, and marking as required in the contract or purchase order. Samples shall be selected in accordance with inspection level S-2, AQL 6.5, expressed in terms of defects per hundred units. The sample unit shall be one shipping container.

5. PREPARATION FOR DELIVERY

5.1 Packaging, packing, and marking. The packaging, packing, and marking shall be as specified in the contract or purchase order.

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. The packaging, packing, and marking desired.

MILITARY INTERESTS:

NONE: DOD has determined that no military activity has an official interest in this Commercial Item Description
