TIER I ADOPTION NOTICE

ISO/IEC/IEEE 24748-4:2016, “Systems and software engineering – Life cycle management – Part 4: Systems engineering planning”, was adopted on 01-Oct-2016 for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity at ODASD(SE), Deputy Director, SE Policy and Guidance 3030 Defense Pentagon, Room 3C167, Washington, D.C. 20301-3030.

ISO/IEC/IEEE 24748-4 provides a requirement for a Systems Engineering Management Plan (SEMP) as well as a definition of the content and recommendations for the format. The SEMP describes the contractor's overall technical approach and plan for the conduct, management, and control of the integrated engineering effort.

This standard should be utilized along with DI-SESS-81785A, “Systems Engineering Management Plan (SEMP)”. The DI-SESS-81785A contains the content and intended use information for the data deliverable resulting from the work task described in paragraph 6.3.1.4 of IEEE 15288.1 or by the specific and discrete task requirements as delineated in the contract.

This standard replaces ISO/IEC 26702:2007, “Systems Engineering – Application and Management of the Systems Engineering Process”, which was cancelled and DoD withdrew its Tier II adoption on 29-Jun-2016.

ISO/IEC/IEEE 24748-4 was prepared by the IEEE Computer Society Joint Systems Engineering Working Group. The IEEE Computer Society collaborated with ISO/IEC JTC1, Subcommittee 7, Systems and software engineering, and SAE International G-23 Manufacturing Management and G-33 Configuration Management committees. Copies of this document may be purchased from the Institute of Electrical and Electronics Engineers at the IEEE Customer Service Center, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331, U.S.A. or via the web at http://www.ieee.org.
