Hi Joe, Alice -

See confirmation from Tasha below. I think we're clear to taxi.

Should we submit all of the historical documents to be added, similar to what we've done for the Active Document. Then after they are added push the notices through the ASSIST process? Or do you want the notices and documents together?

V/r,

Matt

Matthew,

There are no limitations that I know of that prevents you from pursuing the courses of actions listed below. Have you tried the process updates in this manner and failed? Let me know.

Regards,

Latasha Beckman

Subject: TOPs Inactive/Cancellation Notices
Importance: High

Hi Tasha -

We're working through the TOPs, bringing them into the authoritative data source of ASSIST. These are documents, developed by the DoD, primarily ATEC to provide test methods.

I'd like to follow the standard approach and publish an Inactive or Cancellation notice as we clean these up. In some case, we'll be submitting a notice for an existing document in ASSIST and in others, we'll be submitting both the document and the notice.

Would like to get you concurrence and feedback with this approach. Please note, we are following the plan for ITOPs discussed previously, and processing as international documents (no notices). This request is to get the process defined for TOPs which are national documents.

Thank you for your assistance!

V/r,

Matt
