DATA ITEM DESCRIPTION

Title: Naval Aviation Cyber Analysis of Commercial Off-The-Shelf and Non-Developmental Items

Number: DI-MGMT-82145
AMSC Number: N9844
DTIC Applicable: N/A
Preparing Activity: AS
Applicable Forms: N/A

Approval Date: 20170726
Limitation: N/A
GIDEP Applicable: N/A
Project Number: MGMT-2017-044

Use/relationship: This Data Delivery Item contains the format and content for the analysis that demonstrates commercial off-the-shelf (COTS) and/or non-developmental items (NDI) are appropriately configured, integrated, software / hardware / firmware is controlled, and any unique risks they pose are mitigated as tailored in the system spec.

This DID contains the format, content, and intended use information for the data product resulting from the work task.

Requirements:

1. Referenced Documents: The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.

2. Format: Contractor format is acceptable

3. Content: The analysis shall contain the following:

    3.1. Provide a description of the COTS/NDI item and the functions/tasks the item will perform with in the system.
    3.2. The as built configuration of the COTS/NDI item as delivered prior to incorporation into the system. This shall include hardware, software, and firmware. Identified cyber risks prior to modification shall also be included.
    3.3. Provide information on how the COTS/NDI item has been modified and/or configured to meet the needs of the system. Include how these modifications/configuration updates address cyber risks identified in the previous paragraph.
        3.3.1. Include a recommended future support concept of the COTS/NDI based on modification(s) made.
    3.4. Include a list and description of unmitigated cyber risks that modifications/configuration updates do not address.

End of DI-MGMT-82145
